SPECTRUM HEALTH 

Overview

The goal of clinicians who work with traumatic brain injury patients is to help them live and function as independently as possible. The 38th annual WMBIN symposium brings together experts in the field to discuss key topics in TBI rehabilitation, including:

- Education on rehabilitation challenges and ethical considerations
- Mood and behavioral disorders following TBI
- Approaches to managing individuals with hemineglect
- Benefits of neurologic music therapy
- Psychological interventions in TBI patients with chronic pain

Target Audience

Physicians, psychologists, case managers, nurses, nurse practitioners, occupational therapists, physical therapists, rehab program administrators, social workers, speech-language pathologists, audiologists, therapeutic recreation specialists, residents, students, brain injury survivors and family members

Outcomes

Attendees will be able to describe ethical considerations in traumatic brain injury and mood and behavioral disorders following TBI. They will be able to explain rehabilitation challenges and approaches to managing individuals with hemineglect. Attendees will be able to discuss psychological interventions in TBI patients with chronic pain and using neurologic music therapy with TBI patients.

Jointly Provided Symposium Collaborators

The WMBIN symposium is a jointly provided educational activity with Mary Free Bed Rehabilitation Hospital, Hope Network Neuro Rehabilitation, and Spectrum Health. Mary Free Bed Rehabilitation Hospital maintains responsibility for this program, its continuing education content and awarding of continuing education credits.

The network provides comprehensive, coordinated rehabilitation services to people with brain injuries. These three organizations, each highly experienced in brain injury rehabilitation, have differentiated areas of specialty and together are capable of serving people with brain injuries at any stage in their recovery process. One of the network's purposes is to assist with the continuing education of professionals working with people who have sustained brain injuries. The objective of the annual symposium is to provide in-depth knowledge of best practices, research and ideas shaping the delivery of brain injury rehabilitation services.
