She Loves Tech is a global platform committed to closing the funding gap for women entrepreneurs.

Launched in 2015, She Loves Tech runs the world's largest startup competition for women and technology, which has attracted thousands of startups from around the world and operates in over 50 countries. The platform seeks out and accelerates the best entrepreneurs and technology for transformative impact, providing both the funding and global community which helps these entrepreneurs grow and scale their businesses. She Loves Tech aims to unlock over US$1 billion in capital by 2030 for women-led businesses.

This report utilizes data provided by more than 4000 startup from the She Loves Tech 2021 Global Startup Competition.

"Women entrepreneurs often do not receive the recognition and support they deserve in the startup and tech space, and this is reflected in the huge funding gap that currently exists. So we made it our mission to champion the development of strong female representation in technology and to fund women who are building worthy technologies."

-Rhea See, Leanne Robers and Virginia Tan
She Loves Tech Co-Founders
**MILESTONES**
Our Journey Through the Years

**2015 - 2016**
- She Loves Tech started in 2015 as the first global startup competition for women and technology
- A year after, She Loves Tech expanded to 4 countries

**2017-2018**
- In 2017, She Loves Tech Doubled to 8 locations across 3 continents
- In 2018, She Loves Tech doubled again to 16 locations across 4 continents

**2019**
- By 2019, She Loves Tech have expanded to 20 locations across 5 continents

**2020**
- Following the effects of the pandemic, She Loves Tech went 100% virtual and expanded to 30+ countries across 6 continents

Now Bigger than Ever in 6 continents and 50+ locations worldwide!
This year, we also launched the She Loves Tech Global Fund

What's New in 2021:

She Loves Tech Fund

She Loves Tech Fund is a global early-stage VC fund investing exclusively in women-led technology startups coming out of She Loves Tech Global Startup Competition

Why we are building She Loves Tech Fund?

Since 2015, we have helped startups scale, effectively fundraise, acquire the right customers, and more. To date, our top startups have gone on to raise more than USD 250 million in funding. And now, we’re taking that to the next level.

The Global Fund is geography and industry agnostic, and seeks to be the first institutional cheque for the best women entrepreneurs globally, acting as catalytic capital to mobilise up to 10x in funding with each investment it makes. This further reflects our 2020 commitment to unlock US$1B for women entrepreneurs by 2030.
Countries & Regions 2021

All data from this report are derived from 2021 She Loves Tech startups coming from 83 countries and regions.

Andorra  Angola  Armenia  Australia  Austria  Azerbaijan  Bahrain  Bangladesh  Belgium  Bosnia  Brazil  Cambodia  Cameroon  Canada  Africa  Chile  China  Chinese Taipei  Colombia  Costa Rica  Cyprus  Congo  Denmark  Egypt  Estonia  Finland  France  Germany  Ghana  Hong Kong SAR  India  Indonesia  Iran  Ireland  Israel  Italy  Japan  Jordan  Kenya  Kyrgyzstan  Latvia  Lithuania  Luxembourg  Macau SAR  New Zealand  Nigeria  Norway  Pakistan  Philippines  Poland  Portugal  Qatar  Romania  Russia  Rwanda  Singapore  South Africa  South Korea  Spain  Sri Lanka  Sweden  Switzerland  Tanzania  Thailand  Tunisia  Turkey  Uganda  Ukraine  UAE  United Kingdom  USA  Vietnam
Healthcare & Wellness remains to be the most popular industry at She Loves Tech since 2020. This year, out of all of the startups that applied, 15.34% are categorised as Healthcare & Wellness companies, with most coming from United Kingdom (24.57%), North America (12.80%), India (11.07%), Australia (10.03%), and Pakistan (6.92%).

Education also maintains its position as the second most popular industry at 10.56%. We found that this industry is especially popular with startups that are applying from countries such as India (15.58%), Pakistan (14.57%), Indonesia (13.07%), the United Kingdom (12.56%), and North America (8.04%).

**2020 VS 2021**

Top 5 Industries 2020: Healthcare & Wellness, Education, Social Impact, E-Commerce, and Artificial Intelligence

Top 5 Industries 2021: Healthcare & Wellness, Education, SaaS, E-commerce, FinTech

Last year, FinTech and Clean Tech were not part of the top 10 list. This year, we saw a rise of companies in these industries. The rise of Fintech can be attributed to the disruption brought about by the pandemic, but is expected to continue to grow even post-covid.

The Healthcare market is projected to grow to $11.9 Trillion USD by 2022 (Businesswire, 2019)

The Healthcare industry continues to close the gender gap with women representing 61% of all roles in 2020 (World Economic Forum, 2021)

Women represent 57% of roles in the Education industry. (World Economic Forum, 2021)
Demographics

31% of startups are revenue generating
8% of startups are profit generating
18% of startups have launched with no revenue yet
33% of startups are MVP ready
83% of startups have less than 10 employees
72% first-time founders

Top Startup Regions

The Top 10 regions with the most startup applications in 2021 are: United Kingdom, North America, Pakistan, India, Australia, Indonesia, Africa, Western Europe, China-Mainland, Singapore

Business Models

Business to Business, Business to Business to Consumers, and Business to Consumers remains to be the top 3 most popular business models based on the 2021 startup application.
Investment Highlights

**Target Investment**
Most startups are primarily targeting investment from Equity (38%) and Grants (31%). Funded startups have mostly received investment from Angel investors (31.04%), Accelerators (16.06%) and Venture Capital funds (10.24%)

**Top Funded Industries**
The Top 5 funded industries in 2021 are Healthcare & Wellness, Education, SaaS, FinTech and E-commerce. Healthcare & Wellness remains at the top of the ranks, having collectively raised $124M usd

**Top Challenges**
Fundraising remains to be the top challenge for startups with finding the right investor and access to investor networks being the top barriers.
Gender Lens Metrics

**Women-Founded**
99% of our startups applicant this year have at least 1 female founder in their company.

**Women-led**
75% of startups have over 50% C-level women executives with 28% of startups having 100% C-level women executives.

**Top 10 Industries that is dominated by Women.**
76% of startups have significant female end-users and among them, 54% of startups designed their products specifically targeting women users. Women make up of 85% of global consumer spending and accordingly, women are driving the growth of the following industries:

1. Healthcare & Wellness
2. Education
3. E-commerce
4. Saas
5. Artificial Intelligence
6. Fashion
7. Social Networks
8. Marketplace
9. Fintech
10. Social Impact

**Why we need more women entrepreneurs**
Women entrepreneurship can be an opportunity for women to have business and working environment tailored to women’s needs especially when traditionally women have greater domestic responsibility and women entrepreneurship can help fill in the global funding gap (Rafi, Forbes, *Why Women Entrepreneurs Are Critical To Economic Growth*, 2021)

**Why we need more women in C levels**
Recent article by Harvard Business Review mentions how Firms with women in their C-suite have reportedly become more open to change, focuses more to research and development, and makes greater impact towards female appointments. (Post, Lokshin, and Boone, Harvard Business Review, Research: Adding Women to the C-Suite Changes How Companies Think, April 2021)

$12 trillion USD could be added to global GDP by 2025 by advancing women’s equality. The public, private, and social sectors will need to act to close gender gaps in work and society (McKinsey Global Institute report, 2015)
Key Takeaways 2021:
1.5 Years in The Pandemic

What have we seen so far?

Women in The Workforce

Although the COVID-19 Pandemic affects both men and women, reports have repeatedly shown that women are impacted more significantly than men. The pandemic, which started in 2020, has brought a huge impact on women’s employment and participation in the workforce. In Asia and the Pacific, 1 in 4 women considered leaving the workforce due to family commitments and household responsibilities since the pandemic began. There are also another 25% of self-employed women who reported job loss due to the COVID 19 Pandemic. Both numbers are higher than their male counterpart. (Source: UN Women Report)

On a positive note, women managers have been seen to step up more than their male counterpart, leading and supporting their colleagues during these times as well as bringing more revenue and raising more funding.

Women in Healthcare

Women made up of 70% of the health workforce at the frontline, most of whom are nurses, midwives, doctors and caretakers.

She Loves Tech data also shows women’s increased participation in healthcare and wellness industry with it being the top industry since 2020. Additionally, the femtech category which tackles reproductive health, maternal care and chronic diseases, has also been seen to be on the rise. Funding for women-focused digital health startups rose 105% from last year, and this is only for the US alone. As reported by Bloomberg, the pandemic brought health to the forefront of people’s consciousness and with it an explosion in digital health solutions, from teledmedicine to wearables and digital health tracking. These developments amplified the opportunity to target women’s unique health needs.
Women Entrepreneurship to Bring More Opportunities to Women in The Economy

According to BGC, if women and men participated equally as entrepreneurs, global GDP could rise 3%-6%, boosting the global economy by $2.5 Trillion - $5 Trillion. Although, women still face significant challenges when it comes to funding especially with dip of 27% in 2020, the overall trend these 5 years is still considered to be going on a positive curve with an increase of funding accumulated up to 72% even with the pandemic, as reported by Crunchbase.

This year, we have received 4000+ applications from 83 countries, ranging across 60 industries. 72% of these applications are companies founded by first-time founders which shows positive growth in entrepreneurship even during the pandemic. From our previous findings, there are 99% of the companies have at least 1 women founder in their company which shows that more women are increasingly taking part in entrepreneurship and leadership. This positive trend is expected to continue to accelerate the growth of women's opportunities in the workforce in 2022.
Meaningful growth in the number of women in decision making roles

Increasing the roles of women in decision-making processes especially around prevention and response to COVID-19 in all countries have been taken very seriously, and most notably in development and humanitarian settings.

Number of Active Female Angels Investors has grown by over 1,100% in 10 years

There has been a rise of more active female angel investors in the venture capital world following the COVID-19 pandemic. This is particularly essential as the report has shown that female angels are mostly backing more for female founded startups.

Female Founded Companies Raised $40.4B Through 1st 3 Quarters of 2021

Women-led firms and companies are raising larger funds in a shorter time horizon compared to 2020. The majority of these funds are focusing on seed and early-stage startups. Following the years, more women firms are focusing on raising enough funds to invest in female-founded startups.

Female founded companies exited for a combined $58.8bil, 143.6% higher than 2020

Female founders have raised more venture capital dollars and have exited at greater values, 143.6% higher than last year. This surge is living proof of women founders receiving more confidence in the capital venture world. Though the number is increasing, more efforts are needed to ensure the percentage of funding for women can increase towards the double digits.
Key Takeaways 2021: Industry Growth along with the Pandemic

Though the pandemic brought the world to a standstill, there are some industries that not only showed resilience but have actually flourished rapidly during this period.

**GLOBAL TECHNOLOGY TRENDS**

1. Next Level process automation (IoT, Robots)
2. Future of Connectivity (5G)
3. Distributed Infrastructure (Cloud and edge computing)
4. Next-generation computing (Neuromorphic chips)
5. Applied AI (computer vision, speech technology)
6. Future of programming (Software 2.0)
7. Trust architecture (Zero trust security, Blockchain)
8. Bio Revolution (Biosystem, bio machines)
9. Next-generation materials (Nanomaterials, graphene and 2-D materials)
10. Clean Technologies (Nuclear fusion, battery storage)

These technology trends are expected to reshape the future of markets and industries for the next few decades. Not only will they disrupt company strategy, organization and operations, they can also help solve humanity's biggest challenges.

Out of the 4000+ registration we received this year, around 7% of the startups are from the global technology trends. Among this 7%, Artificial intelligence and Clean Tech stand the highest percentage, with 24.7% and 22% respectively compared to the other industries.
Presentations are communication tools that can be used as demonstrations, lectures, speeches, reports, and more. It is mostly presented before an audience. It serves a variety of purposes, making presentations powerful tools for convincing and teaching. To create a stunning presentation, it's best to simplify your thoughts.
CardMedic is a communication tool designed to improve the transfer of vital information between healthcare staff and patients, across any barrier - whether visual, hearing or cognitive impairment, foreign language or PPE.

**Best Advice for fellow founders:**

She Loves Tech x Kontinentalist
Breaking into the boys club: The rise of women in tech
This year, She Loves Tech collaborated with Kontinentalist on an article to spotlight the women in tech landscape in Asia and the rest of the world.

About Kontinentalist:
Kontinentalist is an award-winning data storytelling and visualisation studio focussed on making data accessible, bridging research and the public, with the aim of changing conversations about Asia.
Women-led businesses benefit society and the economy, but bias in the male-dominated start-up industry remains a major obstacle. Female founders often struggle to get a word in at networking events and are unfairly grilled when pitching. In general, women have to work harder than men just to prove that they are credible, and even then they struggle to raise as much money as men to get their businesses off the ground.

Research shows that women-led startups receive around $1 million less in funding than their male counterparts, even though their businesses perform better in the early stages and are better for the bottom line. Having female investors at the table might equalise the playing field, but women remain underrepresented on investment teams.
This disparity is not new. It is further reflected in situations that impede a woman's ability to build work experience, exposure, and confidence to succeed in the tech industry. For instance, women are expected to juggle domestic responsibilities on top of caring for children and the elderly. When the burden of unpaid care work falls solely on a woman, she is deprived of the time and energy required to pursue a startup career.

Despite these challenges, women are claiming opportunities to scale their businesses and create support networks for other female entrepreneurs to thrive. With the growth of gender lens investing, more funds are being poured into businesses that directly improve the lives of women and girls, or that empower women on their boards and across their supply chains.

Read the full story, “Breaking into the boys’ club: The rise of women in tech”, in collaboration with She Loves Tech, at www.kontinentalist.com/the-rise-of-tech-women-in-asia.
