

Cosmetic Services

Cosmetic Services

Yordas Group offers a comprehensive suite of services tailored to cosmetic products, including the EU Cosmetic Products Regulation (Regulation (EC) N° 1223/2009) and other cosmetic legislation around the world.

EU Responsible Person Services

Each cosmetic product placed on the EU market must be allocated a Responsible person. Yordas Group offers Responsible Person services for cosmetic products, where we:

- Take responsibility for the products' regulatory compliance
- Manage associated regulatory obligations for your products (e.g. post-marketing surveillance)
- Communicate with competent authorities

Compliance Documents and Reports

Yordas Group can create, maintain and store regulatory reports and assessment documentation required for your cosmetic product compliance around the world.

For example, in the EU the Cosmetic Products Regulation requires the following to be prepared and stored:

- The Product Information File (PIF)
- Contains information on the product and its production
- Cosmetic Product Safety Report (CPSR) - Contains information derived from scientific reviews to demonstrate the safety of the cosmetic product

Testing

Yordas Group collaborates closely with an established network of service providers to offer the full suite of testing services, including:

- Toxicology
- Microbiology
- Claim substantiation

We offer guidance and impartial advice to our clients to develop relevant testing strategies that aim at minimising testing while meeting regulatory requirements.

Company Values

Yordas recognises the importance of cosmetic products and the daily impact they have on the lives of consumers. Consumer safety is our highest priority and our aim is to help you meet compliance to develop safe products for consumers.

Formulation Assessments

Yordas Group can advise on product formulation, helping you to design and customise your ingredient list to meet your regulatory obligations. With regulatory and technical experts to assess and advise, your product can be safely tailored with your goals in mind.

Using modelling and our in-depth chemicals knowledge we can also suggest alternative assessments to replace ingredients which may be of concern.

Labelling & Claims

Our hazard communication experts are on hand to help design and review your cosmetic products labels to ensure the information and claims presented are suitable, accurate and compliant with the relevant cosmetic products regulation.

Yordas Group can also advise on the packaging for the cosmetic product, to ensure that the container meets the regulatory requirements.

Yordas Hive

Yordas Hive provides a comprehensive chemicals management solution that enables clients to manage their product portfolio with alerts of regulatory changes that affect their products.

- Empower clients to manage their chemical compliance
- Customised compliance updates
- Accurate regulatory information tailored to the client's products

EU Cosmetic Product Notification Roadmap

To market a cosmetic product in compliance with the Cosmetic Products Regulation (Regulation (EC) N° 1223/2009) involves a number of steps which have been outlined in the form of this EU regulatory roadmap:

1. Scoping Assessment

First, Yordas can conduct a Cosmetics Scoping Assessment to determine if the product is considered a cosmetic product in the relevant regulatory landscape.

2. Assign Responsible Person

A Responsible Person is a legal or natural person based in EU. This person is responsible for ensuring compliance of the cosmetics products. Yordas Group offers Responsible Person services.

3. Formulation Review

Yordas can conduct a formulation review to ensure the product does not contain prohibited substances and that there are no ingredients above limits set out by the regulation. A review of the toxicological profile of each ingredient is also conducted.

4. Create a Product Information File (PIF)

Yordas Group can generate PIF files and hold them for cosmetic products as the Responsible Person. The PIF includes the following information:

- Description of cosmetic product
- Cosmetic Product Safety Report (CPSR)
- Product is evaluated to ensure it is safe for use
- Must be carried out by a qualified safety assessor
- Method of manufacture and statement on GMP compliance
- Proof of effect claimed by the cosmetic product, with a substantiation of all claims
- Data on animal testing

5. Labelling

Yordas can create compliant labels, including translation to required languages.

6. CPNP Notification

The Cosmetic Product Notification Portal (CPNP) is the online notification system used to notify the European Commission for the relevant territory. Prior to placing a product on the market, specific information must be notified to the Commission electronically through means of the CPNP. The Commission then makes this information available to the competent authorities.

7. Placing Product on the Market

Following the successful completion of the previous steps, the product may be placed on the market. It should be noted that placing the product on the market may be subject to additional requirements depending on the territories selected.

8. Active Post-Marketing Surveillance

The Responsible Person manages the post-marketing surveillance. Part of this activity requires the PIF to be retained for 10 years after the product has been removed from the market.

Safety Assessments Explained

Before a product can be placed on the market it must undergo a safety assessment by a qualified professional.

Yordas Group's safety assessor can assess your products to generate the Cosmetic Products Safety Report (CPSR). This assessment takes into account the toxicological profile and the exposure level for each ingredient while considering the intended place where the cosmetic product will be applied (e.g. face, body etc) and for how long. Additionally, the assessment in the CPSR considers the type of persons for whom the product is intended (e.g. children, adults etc).

Post-Market Surveillance Explained

Post-Market Surveillance is in force for cosmetic products on the EU market to protect the health of consumers. Surveillance is conducted by the Responsible Person using a harmonised approach to investigate, document and report incidents of undesirable effects relating to cosmetic products use.

Our post-market surveillance activities also include monitoring of regulatory changes that may impact the conditions for which your cosmetic product may be placed on the market within defined territories.

About Yordas

Yordas is a leading provider of scientific, environmental, human health, and global regulatory consulting services. Our unique collaborative approach is designed to build strong working relationships, allowing us to create a customised and integrated service specifically tailored to the needs of each individual customer.
