

# Yordas Hive

A complete solution for your  
chemicals management and  
regulatory compliance needs.

**Yordas Hive was created to meet growing market demand for accurate, up-to-date regulatory data on chemicals globally.**

Our customers were looking for a tool that brings them updates faster, in a platform that is highly customisable to their regulations and substances of interest. Yordas Hive provides this and much more...

**We view regulatory management as an opportunity for companies to gain a competitive advantage.**

**Sharing information quickly and efficiently is the hallmark of any hive.**

We use the approach of informed joined-up thinking to help you solve complex problems, identify and prepare for future change and manage current regulations.

Our ethos here at Yordas Group has always been to work collaboratively and to offer tailored solutions so that we enable you to thrive.

## At Yordas Hive, we offer a unique package of in-depth expertise, high-quality current data and intuitive software features.

Our aim is to support all of our customers with complying with chemical regulations and anticipating future business risks.

# Yordas Hive Flagship Features

## Hive Notifier

Save time and money with customised compliance updates to suit your business needs.

Works with your substances and formulations to bring you relevant regulatory updates only - no sifting through information that doesn't concern you.

## Hive Integrator

Enrich your in-house business systems with the wealth of regulatory data from Yordas Hive.

Highly adaptable API solution for customised data access.

# Yordas Hive Core Functions

## Substances

Gain access to global regulatory data on over 250,000 substances, actively maintained by our team of experts to ensure you always have the latest updates at your fingertips.

## Regulations

Determine what the regulatory barriers to any market may be for your business with clear information on over 1000 global regulations.

## Materials

Evaluate and manage the risk of non-compliance for your complex articles, through our comprehensive database of materials and the regulated or hazardous substances that they might contain.

## Products

Create your own in-house database of products to help you manage and maintain your compliance data. Works with Hive Notifier to deliver notifications for regulatory changes affecting your substances and formulations.

## Safety Data Sheets

Protect your workers by managing and distributing reliable safety information across multiple sites.

---
