

Essential List 1 Differentiated Word Unscramble Game

Teacher Instructions

There are two ways to play this game, so you can choose the right level of challenge to suit the children you are working with.

Level 1

Each word is a different colour so the children can match the colours, and then spell the word. The colour matching will support children to complete this activity independently.

Level 2

All the letters are black so children need to work out what cards they will need to spell each word. This activity works well when a buddy or a teacher calls out the word and the children then create it.
