Oregon COVID-19 HOSCAP – Additional Status Fields

To support the statewide response to the COVID-19 Pandemic, additional and updated fields are now in place. Please review the following.

All Oregon hospitals have editor access to the HOSCAP system for their facilities. Please work with your hospitals HOSCAP editor to make the requested updates.

Additional user access will be granted, but please work with those internal hospital users who already have access.

Updated Fields: Total Facility Beds

These are the number of beds that your hospital has regardless of current census or staffing limitations. These numbers will act as a denominator of your hospital’s percent of capacity.

Updated Fields: COVID-19

These are the number of patients admitted to your hospital and the number of those patients who are on a ventilator. Frequent updates are requested (twice daily).
Existing Fields: Current Hospital Capacity/HAvBED

These fields are the number of patients that can be admitted to your hospital for each of the listed types of care. Frequent updates are requested (twice daily).

Enter the number of patients that you can receive. For example: if you have 10 open beds, but can only staff 5, please enter 5. I.e., staffed beds.

Existing Fields: Vents

These fields are the number of ventilators that your hospital has available. Frequent updates are requested (twice daily).
