Flow Chart for COVID-19: For Staff/Student Contacts with COVID Cases

**DEFINITIONS:**

**HOUSEHOLD CONTACTS:** A household contact that occurs between someone living in the same home as a probable or confirmed case of COVID (i.e. parent, siblings, grandparent, aunt/uncle)

**NON-HOUSEHOLD CLOSE CONTACTS:** A contact that occurs between an individual and a positive person within six feet for more than 15 minutes OR physical contact with the respiratory secretions of a positive person (i.e. contact with dirty tissue, shared drinking glass, food)

**Staff/Student can return to school when:**

**Non-Household Contacts**

**No Symptoms:**

- 14 Days
  - After the student/staff was in close contact with the positive case
  - Even if tests negative for COVID, must wait full 14 days

**Symptoms:**

1. No fever for at least 24 hours without fever reducing medication
2. Respiratory and presenting symptoms are improving
3. 10 days have passed since date of symptom onset or date of positive COVID test

**Household Contacts**

**Phase 1:**
- Student/staff must follow self-quarantine procedures as defined by the CDC for the duration of the positive case’s isolation period (i.e. typically 10 days)

**Phase 2: 14 Days**
- At the conclusion of the positive case’s isolation period, student/staff must quarantine for an additional 14 days.

**Total Quarantine Period**
- Case’s onset date
- Case’s last day of symptoms (Day 0)
- Student/staff contact is released from quarantine
