Attn: MaryAnn Nisperos

Dear Ms. Nisperos,

Axis Communications is pleased to affirm that our entire current product portfolio, which includes solutions marketed to the US government, Department of Defense (DoD) and associated contractors and affiliates, is fully NDAA-compliant.

Furthermore, Axis Communications does not employ any SoC (System on Chip), telecommunications equipment or other components capable of processing software, from the banned Chinese companies outlined in the John S. McCain National Defense Authorization Act (NDAA) for Fiscal Year 2019 that was signed into law on August 13, 2018. All Axis products use NDAA-compliant chipsets and most products use the in-house developed ARTPEC® chips which are only available to Axis.

For more information, please contact government@axis.com.
