Kahn Academy for Math Grades 6—12 and High School Science and Social Studies

If your student already has a Khan Academy account that they use at school: Navigate to https://www.khanacademy.org and sign in with their username and password. Skip the rest of these instructions if your student already has an account and can sign in. They will work on the assignment set by their teacher or follow the daily lessons.

If your student does NOT have an existing Khan Academy account: Please follow the written instructions below. In these steps, you will be creating an account on behalf of your student.

For additional information or for setup assistance, please visit: https://khanacademy.zendesk.com/hc/en-us

Set-up Preparation: Parents will need the following to set-up an account
• Access to a device that allows them to get online
• Access to a working email address they can access during the set-up process
• 5 minutes to set up a single login for Khan Academy use at home
• A safe place to record the username and password for each account created

New Account Set-up - Step-by-step Instructions
1. Go to https://www.khanacademy.org/signup?isparent=1 and create an account using your Google or Facebook account. You may also sign up with an email account by providing the required information.

2. As soon as You register, you will be taken to the “Parent Dashboard” where you will need to click on the “Add a child” button.
3. Please enter your child’s birthdate. You may opt to have an email invitation sent to your student, but we recommend creating a username and password for them now, and writing it down and keeping it in a safe location.
4. You may now add another child, visit the parent home page or logout so that your child may login.

Your child's account has been created! For your child to log in now, you will first need to log out.

Log out and have your child log in
Visit your parent homepage
Add another child

Student Access

1. Go to https://www.khanacademy.org/login and enter the username and password created in Step 3 above.
2. When logging in the first time, your student must agree to the “Terms of Service” and “Privacy Policy”.

Welcome to Khan Academy!

We're excited to have you studying with us. To help you learn as much as possible, we'll be following your progress and guiding you through what to learn next.

I agree to the Terms of Service and Privacy Policy.

Logout or Start learning

3. Your student may need assistance selecting the appropriate course from the course(s) dropdown menu. You may use your parent login to assign course work as well as monitor progress.

Courses

4. Congratulations you have completed the setup process.
