

Outside Activity

Created by: Thorne Nature Experience

Duplication

This activity will get children exploring while encouraging focus and attention to detail!

Steps:

1. One person starts by gathering different natural items (a rock, a pine cone, different kinds of leaves etc.) and laying them out in a specific pattern on a bandanna or piece of paper.
2. Give children a minute to observe and memorize all of the items and their placement on the bandanna, then cover them up with another bandanna or piece of paper.
3. Challenge children to search for all of the items in nature and duplicate the original arrangement!

Parents can take the lead or children can take turns setting patterns out for each other!
