## TEXGARD FINISH | THE SPECIAL ANTI-AGING PROGRAM FOR LASTING BEAUTY

**TEXgard Easy Clean:** High quality, long lasting protection for your awning fabric.

At Sattler, every single fiber is carefully covered with a protective coating. Our proprietary impregnation prevents the permeation by water, humidity and dirt, thus supporting the self-cleaning effect. Dirt pearls roll down the surface like water drops on leaves. This is the TEXgard Lotus effect.

## UV PROTECTION | SATTLER FABRICS REDUCE UV PENETRATION BY UP TO 99%

What many of us ignore: we are also exposed to UV rays, which are harmful to our skin, even in the shade. This is why it is particularly important for Sattler that our fabrics undergo the most rigorous tests.

Our fabrics are tested according to the **UV 801 Standard**. This testing method does not only consider the fabric when new, but also how the fabric behaves **under different weather conditions**. This means the fabrics are exposed to extreme conditions (e.g. extreme exposure to the sun and weather). This helps to determine if the fabric keeps its durability promise over the years. This is the only way to ensure that the fabric you choose will meet your demands.

How much protection do we offer?

**UV 80** = Blocks 98.75% of UV radiation

**UV 40** = Blocks 97.5% of UV radiation

## MATERIAL | SATTLER OFFERS PREMIUM QUALITY IN EVERY FIBER

High-Tex is not only a promise, but a fact that can be found in every yard of our fabrics.

Our premium awning marine fabrics are made from 100% solution-dyed branded acrylic. This guarantees top-level functionality, and outstanding UV protection.

Colours resist fading, and fabric will not break down even after years of exposure to the sun.

### Your benefits:

- Colours remain bright and luminous for many years.
- High UV fastness protecting the colours from fading as well as fabric degradation.
- Outstanding water, dirt and fungus repellency.
- Best weather-proof outdoor fiber.

# Elements Collection

## 100% ACRYLIC STAPLE FIBRE

In our ELEMENTS collection, textured premium yarns, are woven together. This creates a unique textile surface to our fabrics. In addition, the TEXgard impregnation provides outstanding properties, such as weather resistance and dirt repellency. As acrylic yarns are dyed all the way to the core, colours remain bright and attractive.

# Lumera Collection

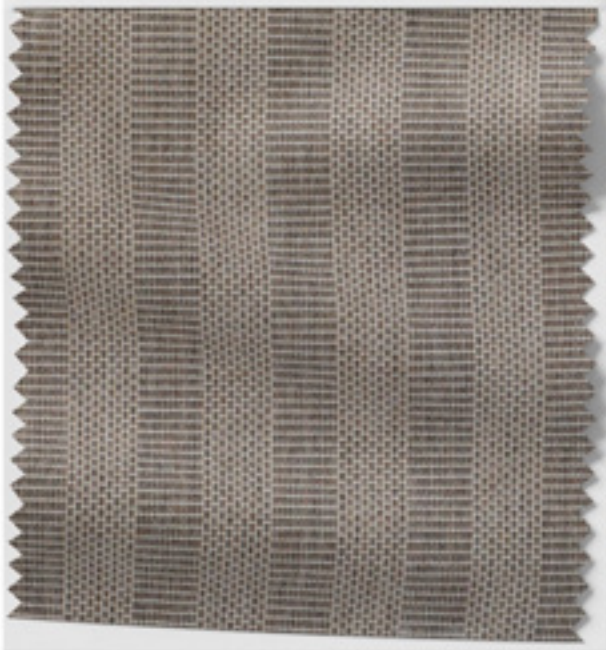

66% ACRYLIC STAPLE FIBRE | 33% CBA

For our LUMERA collection, a Clean Brilliant Acrylic (CBA) yarn is used in the weft meaning one third of the yarn used for LUMERA is CBA yarn.

This results in a smoother and denser surface, which improves the self-cleaning effect and the colours shine more intensive and clear longer.

# Specials Collection

In our SPECIALS collection, woven premium yarns give the glittered effects on the textile surface. The unique textile surface includes glittered yarns which provide outstanding properties such as allowing the colours to remain bright and stunning as well as providing weather resistance and dirt repellence. In this collection, the colours provide a shine and the surface can be maintained longer.
