HORNSEY PROJECT, LONDON | INCLINED QUERCUS RHEA | Retractable Pergola

This house in London has been elevated into a gorgeous modern oasis for this family thanks to the subulate quercus minima which compliments their beautiful home wonderfully.

This project had a few added features, such as a L-Shaped Panel, so this customer's project was the perfect fit and mould to their house and garden. This is just one example of how we as a company make all of our projects bespoke as we know no two projects are the same.

In this project, the front post of the left side pergola has been removed and replaced with the L bracket attached to the wall. Middle post moved to the left 500 mm to avoid blocking glazing. Waterproofing provided by the L-shape panel between the wall and the pergola. (required due to WaterPipe)

With the choice of fabric from Serge Ferrari, perfectly complete this pergola. An elegant solution due to the fabrics combination of waterproofing with luminosity, protection against UV and bad weather and finally its transparency with textured effect.

Given all of its pragmatic features and variety of colours, the Serge Ferrari fabric is the perfect fit to pergolas.

TECHNICAL INFORMATION

Category: Retractable Pergola Systems

Product: INCLINED | Quercus Rhea

Aluminium: RAL 7016 Anthracite Grey with
Texture Finish

Fabric Choice: Serge Ferrari Soltis Proof W96 - 2171

Lighting: 3W LED Lighting System (by Samsung)

Additional Item: L-Bracket, Rafter Support Connection

Width: 7720mm

Projection: 3650mm

Front height: 2500mm
