Magnesium's high solubility is vital to allow the compounds to break their bonds and travel into the pores, through the dermal layers, and into the bloodstream. Ultimately, Magnesium Chloride can be more easily absorbed and utilized by the body, when compared to using Epsom Salts.

Ancient Minerals Magnesium Bath Flakes dissolved in warm water, provides a highly soluble magnesium chloride. Effective for stress relief and relaxation, great for soaking muscles and joints, and soothes and nourishes the skin.

Suggested Use: Simply dissolve 1-3 cups or more of the magnesium flakes into a warm, but not hot, footbath or tub bath, and soak for 30 minutes or more.

Ingredients: Genuine Zechstein magnesium chloride flakes (and trace minerals). One cup contains approximately 15 g elemental magnesium.

Size: 4.4 lbs
