

GLASSource

SHOWER DOOR CARE & MAINTENANCE

Your GLASSource Shower Enclosure is a quality product that should last for years if properly maintained. When properly installed, the unit will be trouble free and need only proper cleaning to provide years of service.

Checking for Proper Installation

If your unit is properly installed, it should slide or swing freely without any obstruction. At no point should the glass drag on, or hit against, the aluminum. For sliders, the inside panel is supposed to close against the wall on the same side as the shower head. The vertical edge of the glass should be adjusted parallel to the wall. The outside panel should be parallel to the opposite wall. Both panels should slide into the jamb without hitting the aluminum. Special bumpers help to guide the glass into the jambs. Your unit should be checked periodically to insure that it remains in proper adjustment. Using the unit when it is out of adjustment may cause the glass to break.

Care of Aluminum

The aluminum in your shower unit is durable and resistant to water damage. It is advisable, but not necessary, to wipe it dry with a towel after your shower. It should be cleaned weekly with a soft damp cloth to remove any buildup. If you have hard water and need to use a detergent or a stronger cleaning agent, be sure to rinse completely. Never use an abrasive cleaner of any kind. Many glass cleaners can damage the aluminum if allowed to remain on the metal for any length of time. BEMA, the Bath Enclosure Manufacturing Association endorses the use of Comet Brand Non-Abrasive Bathroom Cleaner for the safe cleaning of glass and anodized aluminum.

Care of Glass (WITHOUT GLASSGUARD™)

Glass can be kept clean with Comet Brand Non-Abrasive Bathroom Cleaner or any glass cleaner used in the home. Rinse glass cleaner off the aluminum as soon as possible to avoid damage to the anodized surface. Our shower door

glass is tempered safety glass manufactured in accordance with federal standards, (Consumer Products Safety Code 16CFR1201 II). Tempered glass is much stronger than regular, (annealed) glass, but is still breakable. Avoid striking glass with any sharp or hard objects. Such damage can cause either immediate, or delayed breakage (usually at a time of temperature change). If your glass does break, it will break into countless very small pieces. This is somewhat startling, but substantially safer than when annealed glass breaks. The small pieces sometimes cause superficial cuts, but never cause the severe injury that can occur with regular glass.

Care of GLASSGUARD™ Treated Glass

To maintain GLASSGUARD™ treated shower glass simply spray cool water along the top edge of the glass with shower head or pour water with a cup. Most soapy residue will run right off. Periodic rubbing with a nylon mesh puff will easily remove any buildup that has occurred. If desired, dry glass with a micro fiber cloth. Micro fiber cloth is preferred to a squeegee as it leaves no streaks; just a clean, spotless shine.

Without periodic cleaning water spots will eventually appear and hard water conditions may build up requiring more frequent cleaning. These spots are easily removed with cool water and a nylon mesh puff. Occasional application of GLASSGUARD™ Revitalizer restores the full hydrophobic action to GLASSGUARD™ treated surfaces; plus, has the added benefit of protecting metal, vinyl, and plastic portions of the shower enclosure. Even if the surface has been neglected and significantly stained the glass is still protected! Stubborn build up can be removed using our Ultimate Hardwater Stain Remover, “glass safe” scrubber pad, and GLASSGUARD™ Revitalizer; thus, restoring the glass to its original easy to maintain condition. Follow labels as instructed, keeping in mind a very small amount goes a long way!

SHOWER DOOR WARRANTY

GLASSource offers a five year limited warranty to the purchaser of any new shower door or part manufactured by us, that the product or part will be free from defects in material and workmanship. GLASSource agrees to repair or replace any part or unit determined defective by GLASSource, at no charge to the purchaser within the warranty period. All parts will be F.O.B. GLASSource dock. This warranty does not cover damage resulting from normal wear and tear, accident, misuse or abuse. Corrosive damage due to improper or unapproved cleaning chemicals, or lack of reasonable care in either the installation or use of the product or parts are excluded from warranty claim.

The GLASSource warranty does not cover any special, incidental, or consequential damages or injury, labor costs, or loss of profits.

There are no other warranties, expressed or implied, and your rights may vary from state to state. To make a claim under the provisions of this warranty please contact your authorized GLASSource dealer.

GLASSGUARD™ WARRANTY

GLASSGUARD™ surface protection offers a limited ~~two~~ ^{five} year warranty to the original consumer purchaser when maintained according to manufactures recommendations; not to flake, peel, discolor or change the appearance of the surface to which it is applied.

GLASSGUARD™ is guaranteed to permanently protect the glass surface and improve the hydrophobic characteristics, to make cleaning easier. GLASSGUARD™ will resist the effects of weathering and remain visually transparent when the manufacturer's proper maintenance guidelines are followed. The hydrophobic action can be maintained with normal water cleaning, and by using GLASSGUARD™ revitalizer spray. Revitalizer is available to the consumer through our dealer network to enhance or restore the hydrophobic properties portion of GLASSGUARD™, as needed.

GLASSGUARD™ is designed to protect surfaces from damaging environments, and to reduce maintenance time. GLASSGUARD™ will not eliminate cleaning, maintenance, or spotting, but will dramatically reduce the time, effort and chemicals needed to keep glass surfaces looking new.

Limitations: The GLASSGUARD™ limited warranty covers replacement glass provided from ^{GLASSource} the manufacturer only, or a refund of the original sale price only, at GLASSource option. All parts replaced under the terms of this limited warranty are F.O.B. GLASSource and it does not cover breakage, scratching, labor or incidental or consequential damages.
