Communicable Disease Prevention Policy

At Mayne, the health and safety of our team members, contractors and guests are top priority. As the overall risk of COVID 19 transmission is reduced, our company updated our policy to clearly define the procedures required to prevent the transmission of communicable disease in the workplace.

The Management Team reviewed our current policy in compliance with provincial health requirements and other relevant mandates. The following are implemented and must always be followed:

- Front office reception has barriers, and all guests are requested to complete a Screening Form prior to meeting with their host. This form is also available online on our website to be completed prior to coming for an appointment.
- Guest arriving from US and other countries will be allowed in our facility upon compliance to the defined travel entry requirements as stated in travel.gc.ca
- Guests aren’t required to wear a mask but are recommended while in our facility.
- Cleaning stations are provided across the facility.
- Cleaning protocols are implemented and posted for all common areas, shared spaces, and commonly touched surfaces such as tables, button panels, doorknobs, light switches tools, before and after use.

It is important that we continue to work together to prevent any communicable disease spread in our work environment.

Thank you!
