## Education

**MS Human-Computer Interaction** — DePaul University
2018-2020 — Chicago, IL

**Minor Graphic Design** — DePaul University
2014-2018 — Chicago, IL

**BS User Experience Design** — DePaul University
2014-2018 — Chicago, IL

**Minor Information Technology** — DePaul University
2014-2018 — Chicago, IL

## Experience

**Senior Product Designer** — Ascent Global Logistics
Oct 2021 - March 2024 — Remote

Worked as a Senior Product Designer for Ascent's PEAK On-Demand web application, which provides premium mission critical air and ground transportation solutions across North American companies. Designed new features such as Order Entry, Planning & Options, interactive dashboard with customizable widgets, and shipment detail view pages. Built and launched a new design system for our products. Created new branding and marketing styles as well as redesigned Ascent's main customer-facing website.

**Product Designer** — Hyatt Hotels Corporation
Sep 2017 - May 2020 — Chicago, IL

Worked as a Product Designer for Hyatt Privé, which is an exclusive program for luxury travelers and travel agents. Designed new architecture and implemented consistent design systems and standards within the site. Performed numerous user testing sessions to gather feedback from active travel agents to improve the B2C experience between us and our guests. Designed interactive desktop application experience for travel agents to track various data metrics, such as revenue, hotel points, and clientele.

**Product Designer** — Ascent Global Logistics
Nov 2020 - Oct 2021 — Remote

Worked as a Product Designer for Ascent's PEAK transportation management systems, specifically within the International space. Designed a new web application called PEAK Essentials, which is a supply chain management and logistics tool for international shipments. Created a variety of new features such as a customizable dashboard, live shipment tracking, order visibility, advanced analytics, live bid boards, KPI accountability, freight auditing, and automatic shipment tendering.

**UX Design Intern** — Hyatt Hotels Corporation
Jul 2017 - Sep 2017 — Chicago, IL

Worked as both a UX Interaction and Visual designer on both mobile and web platforms. Designed user flow to allow guests to stream Chromecast directly from their mobile device. Developed interaction design to allow users to view map directions to hotel within mobile app. Designed visual layouts for various screens in mobile app. 1st place winner of the Hyatt Intern Challenge for developing a new app feature to allow users to track and receive updates from housekeeping services during stay.
