"Why We Must Drink Water"

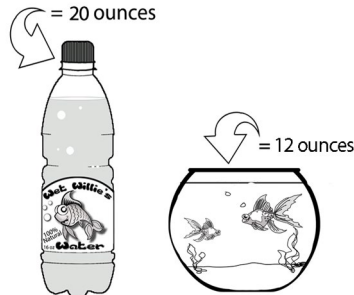

1. Peter and Chris were having lunch. Peter forgot to bring a drink so Chris said he would share. Chris has 16 ounces of water in his bottle. He gave 8 ounces to Peter. How many ounces does Chris have left? Show your math in the box below.

2. Peter, Dee, Maria and Chris are all sharing a bottle of water. They have 16 ounces in the bottle. Chris gives 4 ounces to Maria and 4 ounces to Peter. How many ounces are left? Show your math in the box below.

3. Maria is cleaning out her fish! She has a bowl that holds 12 ounces. If the bottle she uses has 20 ounces in it, how many ounces will she have left after she fills up her fish bowl? Show your math in the box below.

4. Dee brought fresh fruit in her lunch along with her water bottle. Her whole bottle holds four servings of water. Eating her fruit gives her another two servings of water. How many servings of water total will she get with her lunch? Show your math in the box below.
