Electric Prank

Caution: Only prank those who want to be pranked. Be prepared, once you prank someone, they can prank you back!

This prank uses everyday materials to create electrostatic charges that you can transfer to your friends or family!

Instructions:

STAND ON CARPET

RUB FEET ON CARPET

GENTLY TAP PERSON YOU WANT TO PRANK

By rubbing your feet on the carpet, you create a build-up of electrons. The shock you feel is the transfer of electrons from your finger to the other person.
