57.1% of states would like NASHIA assistance

Utilizing Telehealth for Brain Injury Services

- Yes 83.3%
- No 16.7%

COVID and TBI one pager would be great!

Strategies to accommodate for cognitive challenges in a virtual environment would be very helpful.

Examples of how states are using telehealth adjustments or modifications to accommodate cognitive disabilities.

Addressing participant rights in congregate settings.

How to address the barriers created by participants not being able to participate in virtual teleconferencing or even being unwilling to communicate by phone. How do we keep them engaged in the absence of face-to-face meetings if they are unwilling or unable to participate?

Federal programs or policies that have been adapted to meet needs during this COVID time period. How other states have been meeting unique needs of consumers in service, particularly in rural settings.
