About Star of the South

Star of the South is an up to 2.2 GW offshore wind project proposed in Bass Strait, off the coast of Gippsland in Victoria, Australia.

Developed to its full potential, Star of the South would generate clean electricity to power more than 1.2 million homes, invest billions in the local economy and create an estimated 2,000 Victorian jobs across its lifetime.

Star of the South is backed by Copenhagen Infrastructure Partners, together with Cbus Super and Australian founders.

Front cover photo courtesy of Keppel Prince Engineering; inside cover photo courtesy of RPS

Acknowledgement of Traditional Owners

We acknowledge and pay respect to the people of the Gunaikurnai nation as the Traditional Owners and custodians of the land the waters where Star of the South is proposed. We honour their Elders past and present, whose knowledge and wisdom has ensured the continuation of culture and traditional practices.

We are committed to working in partnership with Aboriginal and Torres Strait Islander peoples.

The Offshore Wind Supplier Showcase was supported by the Victorian Government through the Energy Innovation Fund.

Welcome

Offshore wind is set to bring new supply opportunities to Australian shores.

Australia has the experience, skills and capability to support the growing offshore wind industry.

In Gippsland, the home of the most advanced offshore wind projects in Australia, local suppliers have been servicing the energy and offshore oil and gas industries for decades. These local suppliers, along with a skilled local workforce, are well placed to apply their experience to this new industry.

By harnessing all that the Gippsland, Victorian and Australian supply chain has to offer, significant benefits from the offshore wind industry will also flow through to the local economy, businesses, workers and communities.

Showcasing local suppliers to the world

We've created this showcase to highlight local supply opportunities and to give major offshore wind suppliers a glimpse of what local businesses have to offer.

As Australia's offshore wind industry grows and projects are approved, major contractors will be appointed to construct and operate the wind farms. By sharing this showcase with major contractors around Australia and the world, we hope to support new connections and partnerships with local suppliers.

This showcase has been informed by:

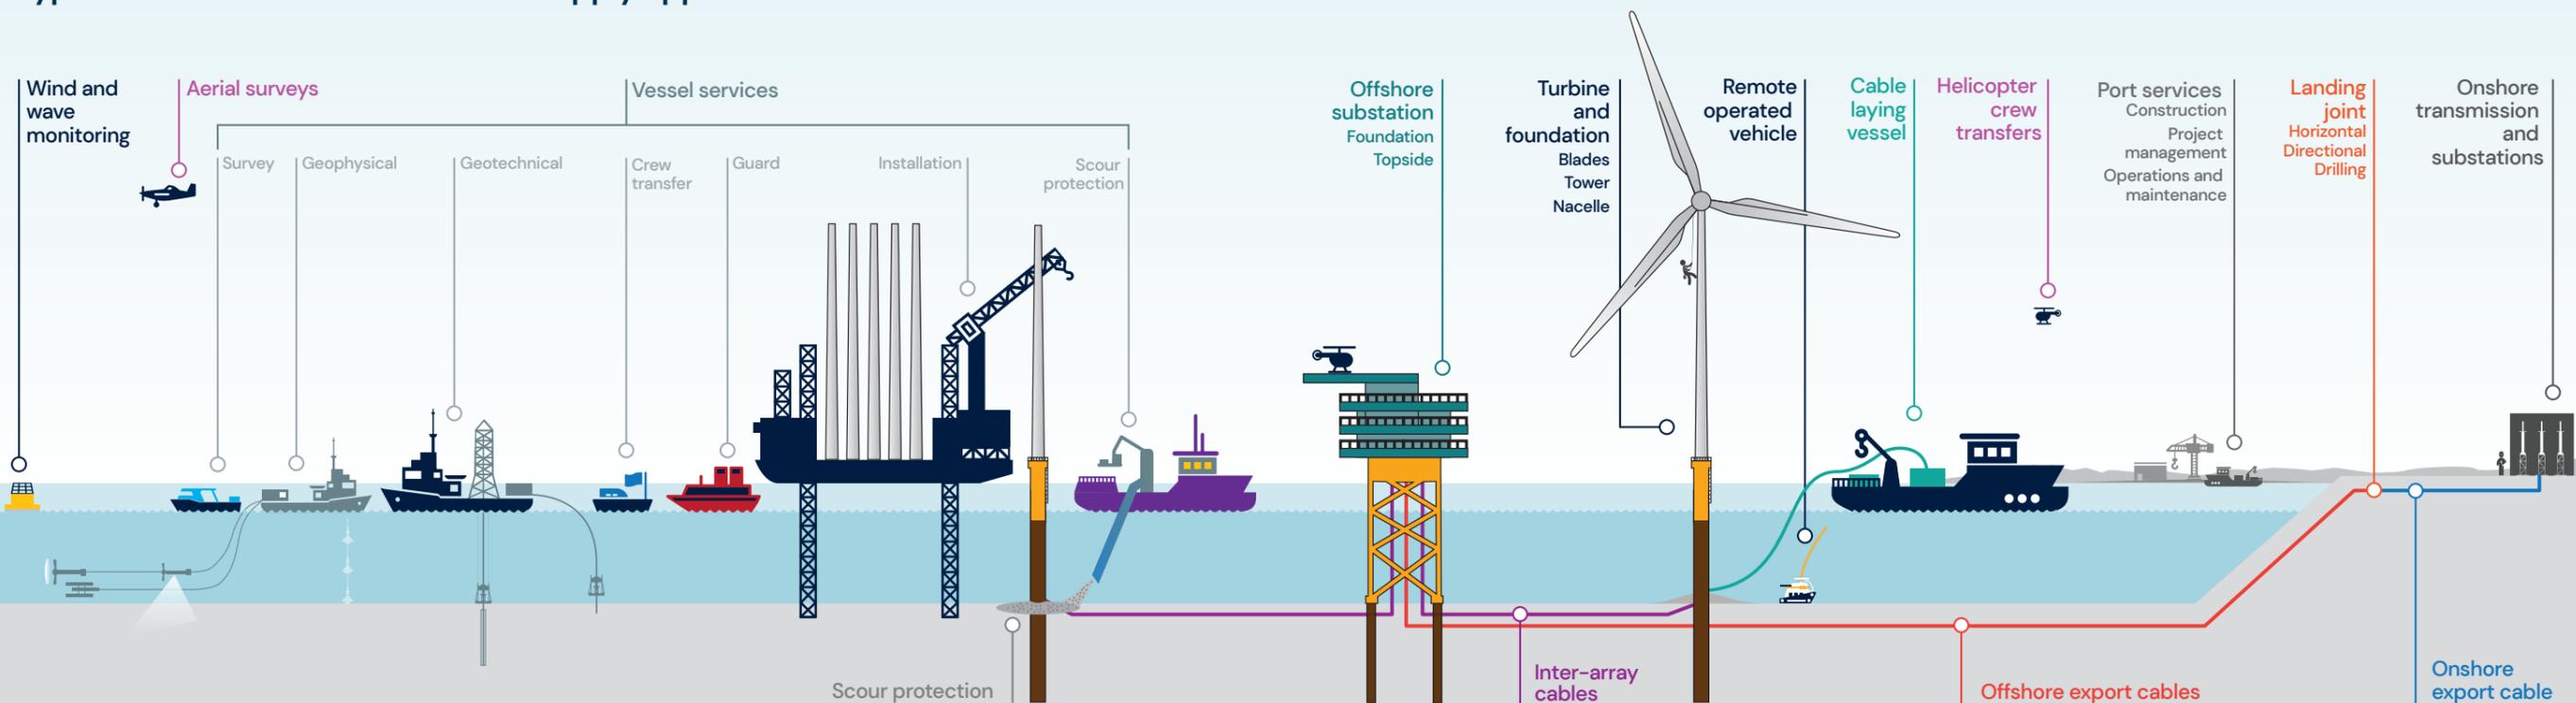

- Hundreds of meetings and conversations with individual businesses and major offshore wind suppliers
- Industry briefings and events
- Thousands of expressions of interest collected through the Industry Capability Network
- Advice from Gippsland's existing industry leaders about their established supply chains

- Advice from Kinaway Chamber of Commerce, Gunaikurnai Land and Waters Aboriginal Corporation, the Australian Steel Institute, Committee for Gippsland and other industry representatives
- Working with all levels of government – with a focus on Gippsland local government.

Inside you'll find profiles and contact details for more than 450 businesses who have expressed their interest in supplying Star of the South, as well as many of the local suppliers we're already working with.

We'll continue working with major global suppliers, local Gippsland industry, and other emerging offshore wind regions around the country, to build a strong local supply chain that benefits all Australians.

Typical offshore wind activities and supply opportunities

Scan the QR code to see a full list of supply categories and to register for Star of the South's ICN Gateway.

Harnessing local experience

Many Australian businesses already have the capability to supply the offshore wind industry.

There are exciting opportunities for suppliers to leverage existing capabilities to deliver new offshore wind goods and services.

A thriving domestic offshore wind industry may also attract investment in new Australian-based facilities to deliver major components such as offshore wind towers.

'Look Local First'

Star of the South's mission is to advance the offshore wind industry in Australia, leaving a positive legacy for future generations. One way we're doing that is by supporting local suppliers to participate in, grow with, and maximise opportunities created in Australia's new offshore wind industry.

Together with our key contractors, we'll look to Gippsland first, then Victoria, Australia and New Zealand. When local suppliers can't supply what we need, we'll seek the support of the international supply chain. Our contractors will take the same approach.

We are committed to supporting Aboriginal and Torres Strait Islander businesses to participate in the offshore wind industry and derive economic benefit.

Aboriginal businesses

Gunaikurnai businesses and partners

The Gunaikurnai people are the Traditional Owners of much of Gippsland.

The Gunaikurnai Land and Waters Aboriginal Corporation (GLaWAC) is the Registered Aboriginal Party that represents the Gunaikurnai people, as determined by the Victorian Aboriginal Heritage Council under the *Aboriginal Heritage Act 2006*. GLaWAC was legally recognised by the Federal Court of Australia under the *Traditional Owners Settlement Act 2010*. GLaWAC offers several direct commercial services and has established partnerships with local businesses.

Cultural services and consulting – Under traditional laws and customs, Gunaikurnai people have a responsibility to welcome visitors to Country – by fire, smoke, water ceremonies and with other specific cultural details including language, customs, protocols, and dreaming stories. In addition to conducting traditional ceremonies, GLaWAC offers cultural education and awareness sessions, and cultural consultation services.

Cultural heritage protection – GLaWAC participates in the preparation of Cultural Heritage Management Plans (CHMPs) and evaluates plans prepared by its Cultural Heritage Advisors. It also advises state and local governments on applications for Cultural Heritage Permits, negotiates and enters into Cultural Heritage Agreements, and advises on and negotiates the repatriation of Aboriginal cultural heritage.

Land management services – GLaWAC’s contract services team offers a range of services to protect Country, and support and empower the community, working with private businesses, partner agencies, community groups and landholders to deliver practical and insightful solutions to enhance the environment and support healthy Country. The team provides meaningful employment and training to Aboriginal people across Gippsland through learning, working, and caring for all aspects of Gunaikurnai land, waters and biodiversity. Services provided include:

- Revegetation and restoration projects
- Propagation and supply of native plants
- Pest plant and animal management
- Biodiversity monitoring
- Weed control
- Civil services
- Roadside management
- Machinery works
- Landscaping
- Site surveys.

Partnerships – GLaWAC has partnered with businesses in the Gippsland region to provide sustainable and meaningful training and employment for members of the local community.

Address: 27 Scriveners Road, Kalimna West VIC

Cranes Civil & Surfacing
(Photo courtesy of GLaWAC)

Cranes Civil & Surfacing

GLaWAC partnered with Cranes to construct wetlands in Broadlands, East Gippsland, with GLaWAC's Natural Resource Management Crew planting more than 80,000 native seedlings to provide food and habitat for local wildlife.

The partnership combined each organisation's specialist expertise. Cranes was responsible for construction, and GLaWAC prepared the planting and is responsible for ongoing site management.

It worked closely with Latrobe City Council's Indigenous Employment program to source local Aboriginal or Torres Strait Islander employees for the project.</p>

Other Victorian Aboriginal businesses

The Kinaway Chamber of Commerce is the leading Victorian organisation dedicated to supporting Victorian Aboriginal and Torres Strait Islander business owners.

Kinaway is focussed on changing Aboriginal and Torres Strait Islander people's lives through a strength-based model of business ownership and participation in the Victorian economy.

Kinaway works closely with businesses by providing:

- Support
- Networking
- Advocacy
- Partnerships.

These services provide an essential framework to promote and support the ongoing operation of Aboriginal and Torres Strait Islander businesses.

Supplier	Native Oz Group
Location	Somerville, VIC
Website	www.nativeozgroup.com.au
Categories	Civil works, electrical, plumbing, labour hire, traffic management

Supplier	PavFab Engineering & Fabrication
Location	Yarram, VIC
Website	www.pavfab.com
Categories	Metal fabrication
Contract capacity	\$2,000,000 to \$5,000,000
Overview	<p>PavFab Engineering & Fabrication is a metal fabrication company located in South Gippsland. PavFab has over 24 years' experience in the industry, providing tailored and appropriate solutions, and supplying and servicing a range of industries including the follow sectors:</p> <ul style="list-style-type: none"> • Agriculture, farming and dairy • Oil and gas • Food production • Rail and transport • Residential, commercial, and industrial services • Clean renewable energy • Forestry and timber • Marine/fisheries • Health • Aboriginal and Torres Strait Islander.
Key clients	TEK-Ocean, ViPlus Dairy
Relevant experience	<p>PavFab provided fabrication services to TEK-Ocean to maintain the structural integrity, sea fastening, and safety systems for the floating LiDARs used by Star of the South.</p> <p>PavFab designed and manufactured a portable aluminium safety work platform to suit Australian standards for TEK-Ocean's operations.</p>

Supplier	Abicor Southern
Location	Wonthaggi, VIC
Website	www.abicorsouthern.com.au
Categories	Office supplies and amenities
Contract capacity	Up to \$1,000,000
Overview	Abicor Southern is a wholesale supplier of hospitality and hygiene products, including: <ul style="list-style-type: none"> Toilet paper/handtowels PPE Garbage bags Cleaning hardware and chemicals Lunchroom supplies.
Key clients	Gumbuya World, Phillip Island Nature Parks
Relevant experience	Abicor Southern supplied office supplies and amenities to the main contractor for the construction of the Wonthaggi Desalination Plant. It has ongoing supply agreements with large Gippsland-based operations, including Gumbuya World and Phillip Island Nature Parks.

Supplier	O&M
Location	Morwell, VIC
Website	www.omaustralia.com.au
Categories	Engineering services
Contract capacity	\$10,000,000 to \$20,000,000
Overview	O&M is a locally owned and based operations and maintenance company, established in 2013 and currently employing more than 120 people. It delivers: <ul style="list-style-type: none"> Electrical (HV/LV) Instrumentation Fibre optic Scaffolding Mechanical, engineering and project management services to large commercial and industry clients operating in the power, mining, water, petro-chemical, pulp and paper, gas and infrastructure industries, across private and government sectors. O&M holds accreditation to the current ISO Standards for quality, safety and environment, and also CM3 accreditation. O&M are a supplier of the Layher Allround Scaffold System for the Latrobe Valley region.
Key clients	AGL, Energy Australia, Gippsland Water, Fluence Energy Latrobe City Council, Graymont Sibelco, GHD/HRL, Engie, Opal, Pacific Energy
Relevant experience	<ul style="list-style-type: none"> 150MW Battery Energy Storage System (BESS) – Supply and installation of HV/MV/LV/fibre optic/switchyard/control systems; installation and terminations of telco racks, inverters, batteries, core transformers, RMUs, MV switchgear; as well as L&P and control room testing, commissioning, quality assurance, OH&S and management. Hydrogen Energy Supply Chain (HESC) – Delivery of full E&I construction scope, commissioning support, and roperations and maintenance. 100MW Temporary Power Station (Aggreko) – Installation of 105 generators and 19 transformer C containers to establish 105MW temporary power station.

Supplier	TOP Welding & Construction
Location	Morwell, VIC
Website	www.topwelding.com.au
Categories	Fabrication and welding of piping and structural steel components
Contract capacity	\$2,000,000 to \$10,000,000
Overview	TOP Welding & Construction (TOP) specialises in the fabrication and welding of piping and structural steel components, tanks/vessels in stainless steel and carbon steel. It can carry out weld procedures which are covered under ASMEB31.3, AS4041 and AS1554 Part 1, using various welding techniques and processes with TIG, MIG, STT, Flux Core and Sub Arc capabilities. TOP has a Quality Management System fully accredited to AS/NZS ISO 9001-2008 which provides 100% traceability of all materials and welding, together with vendor documentation. TOP also offers a full dimensional survey service on critical dimensional spooling to guarantee 100% fit-up in critical areas and shutdown periods.
Key clients	Alinta Energy, Beach Energy, Exxon Mobil, Gasco, WOOD Group, Worley Parsons
Relevant experience	Over 45 years' experience with Exxon Mobil/Esso onshore and offshore, Bass Strait process plants at Long Island Point and Longford Gas Plant.

Drakeford Studios

Established in 2018 in Yarram by locals Holly and Steph, Drakeford Studios provides graphic design and specialist printing services including:

- Wall stickers
- Large-scale signage
- Corflute signage
- Car signage
- Small format printing
- Metal signage
- Temporary stickers
- Logo stickers.

Drakeford Studios puts creative design at the forefront of everything they do and understand how to make a business stand out.

They have supplied Star of the South with office signage, small and large-scale printing, and workwear.

“This new offshore wind industry will be a great asset to Gippsland businesses, providing more jobs for our community and a cleaner future.”

Supplier	Hardchrome Engineering
Location	Yallourn, VIC
Website	www.hardchrome.com.au
Categories	Engineering services
Contract capacity	\$50,000,000+
Overview	<p>Hardchrome Engineering is an ISO 9001 accredited Gippsland local heavy engineering company specialising in large-scale fabrication and machining work to the highest specification. Hardchrome manufacture a range of products to service industries such as rail, power, mining, oil and gas, with 120+ local employees over two sites.</p> <p>In addition to turnkey projects, Hardchrome provides comprehensive maintenance services to various industries Australia-wide, offering fabrication, fitting and machining support. It has the plant and capabilities to rapidly expand to meet large-scale project demands.</p>
Key clients	AGL, BlueScope, BHP, Snowy Hydro
Relevant experience	<ul style="list-style-type: none"> • AGL - Manufacture projects on dredger forechutes, ringchutes, track pads • Snowy Hydro - Turbine overhaul projects • AGL, Energy Australia - Beater wheel refurbishment projects.

Supplier	Genertech
Location	Morwell, VIC
Website	www.genertech.com.au
Categories	Electric motor and generator repairs and maintenance
Contract capacity	Up to \$1,000,000
Overview	<p>Genertech has the capacity to supply, overhaul, repair and service equipment such as:</p> <ul style="list-style-type: none"> • High and low voltage AC motors and generators • High and low voltage DC motors and generators • Electrically operated actuators • Electrical brake thrusters • Electrical contactors • Electrical solenoid coils • Electrical motor shaft, mounting and coupling modifications • Custom electric windings. <p>Genertech's customers include some of the biggest electricity producers in Victoria and Australia, along with leading paper and steel manufacturers and international power plant manufacturers.</p>
Key clients	Hitachi/Downer, Siemens Energy, GE Renewable Energy, Energy Australia, Yallourn Power Station, Opal Australian Paper, AGL
Relevant experience	<ul style="list-style-type: none"> • AGL Loy Yang A Power Station – Motor Rewind – 8000kW, 11000v, Mitsubishi Motor. Transport, assessment, materials supply, overhaul, repair, high voltage rewinding, high voltage electrical testing and no-load equipment test run. • GE Renewable Energy – Generator Overhaul – 3988kW, 6000v, General Electric Generator. Transport, assessment, materials supply, overhaul, repair, high voltage electrical testing and no-load equipment test run.

Supplier	Condex Services
Location	Sale, VIC
Website	www.condexservices.com.au
Categories	Electrical instrumentation
Contract capacity	\$5,000,000 to \$10,000,000
Overview	<p>A family owned and operated business, Condex Services is a leading electrical instrumentation specialist in the oil and gas sector operating out of Gippsland, Victoria.</p> <p>With over 25 years' industry experience, Condex offers a range of services, quality workmanship and safe work practices in both onshore and offshore installations.</p> <p>Primary focuses include:</p> <ul style="list-style-type: none"> • Hazardous area electrical wiring • Inspection services • Instrumentation • Testing and maintenance • Workshop fabrication • Rope access.
Key clients	Exxon Mobil, Jemena, Snowy Hydro
Relevant experience	Ongoing maintenance, labour support and project works on Esso Australia's onshore and offshore installations.

Supplier	Stable Australia
Location	Morwell, VIC
Website	www.stableengineering.com.au
Categories	Mechanical fabrication and assembly, maintenance and repairs
Contract capacity	\$20,000,000 to \$50,000,000
Overview	<p>Stable Australia has a 40+ year history in the power and oil and gas industries. Its capability includes:</p> <ul style="list-style-type: none"> • Maintenance and fabrication of pressure parts and structural steel • Mechanical fabrication and assembly • Maintenance of mechanical plant • Rotating equipment mechanical repairs and rebuilds • Labour hire for site works • Project scheduling and measurement • Structural design and computations • CAD drafting • Hire of general plant and equipment • Painting and blasting services. <p>Stable Australia is ISO9001 certified and has a Certificate 10 international welding specialist on site.</p>
Key clients	Cross Yarra Partnership, CPB Contractors, John Holland, AusNet Services
Relevant experience	<p>Stable has worked with Cross Yarra Partnership and CPBJH JV, providing structural steel, bog mats, walkways and grid mats, for the Westgate Tunnel project.</p> <p>Stable has previously built transmission towers for AusNet.</p>

Supplier	GQS Australia
Location	Traralgon East, VIC
Website	www.gqsgroup.com
Categories	Quality Assurance and Quality Control services
Contract capacity	\$50,000,000+
Overview	<p>GQS is worldwide provider of technical, quality assurance and quality services. It has a comprehensive range of experience providing quality assurance/quality control (QAQC) services worldwide to both operators and Tier-1 contractors.</p> <p>GQS' services include:</p> <ul style="list-style-type: none"> • Second and third party inspection services • Expediting services • Quality management services • Technical audits • Technical manpower • Pressure equipment inspection • Welding QAQC services • Offshore and onshore pipelay QAQC.
Key clients	Mitsui, Hai Long Offshore Wind Farm, Woodside Energy, APA
Relevant experience	<p>Hai Long Offshore Wind Farm – all onshore and offshore scopes for both the Hai Long 2 and 3 Wind Farms. Conducting independent due diligence witness Inspection Activities in line with the defined Inspection and Test Plans (ITPs) to ensure product compliance and integrity is maintained/ not compromised, at all times. The whole project is managed through GQS's bespoke management system with client log in, cost controls, controlled inspector competencies, and customised dashboard reporting.</p>

Supplier	Gippsprint Office Choice
Location	Traralgon, VIC
Website	gippsprint.officechoice.com.au
Categories	Office supplies, IT consumables
Contract capacity	Up to \$1,000,000
Overview	<p>Gippsprint Office Choice has been operating in the greater Latrobe Valley region for over 35 years. It is a locally owned business and major supplier of stationery, office furniture, janitorial products and IT consumables.</p> <p>Gippsprint Office Choice service the Yarram region on a weekly basis and are proud members of Office Choice, a buying group of independent dealers that are all 100% Australian owned and operated.</p>
Relevant experience	<p>Gippsprint Office Choice has undertaken refurbishment (office furniture) projects within the power industry of significant value (>\$150k) and is a supplier to Star of the South.</p>

Nanoo Nanoo

Based in the Latrobe Valley, creative producers Dan Clancy and Eloisa Tripodi specialise in video production for instructional, educational, industry, corporate, documentary and historical archive purposes.

Nanoo Nanoo provides services including live streaming, event management, stage and video production, workshop facilitation, creative consulting on community arts projects, and media training.

They supported Star of the South with live streaming, hybrid meeting tech support, filming and video production.

Delta Group is an Australian privately-owned business established in Victoria in 1988 that operates in all states and territories across the nation. It recently opened a Gippsland office in Traralgon, demonstrating a commitment to support the future delivery of renewable energy projects in the region.

The business has evolved into one of the largest diversified contractors of its type in the world, delivering a range of services including civil engineering and construction, site remediation, recycling, piling, rehabilitation and revegetation, heavy plant rental, and commercial and industrial decommissioning and demolition.

With more than 30 years of experience, 1300+ skilled, qualified, and trained staff, and Australia's largest privately-owned fleet of specialist machines, triple certified management systems and Federal Safety Commissioner Certification (FSC), Delta Group has the scale and triple certified management systems needed to mobilise people and its plant to meet the needs of clients, and the FSC.

Delta has completed major projects including Hazelwood Power Station and Mine (demolition and rehabilitation works), Hazelwood Battery Energy Storage System – BESS (civil construction), HMS Cerberus (demolition/civil) North East Link (early civil works), the CNRM Quarantine Facility Mickleham (civil construction), Longford ALA CO2 Plant (civil construction) and offshore Esso maintenance works through UGL (hazmat removal and resheeting).

Offshore wind opportunity

- Category:**
- Civil construction/plant hire/recycling/piling

- Project phase:**
- Construction/operations

Experience and capability

- Delta continues to deliver large projects within the Latrobe Valley/Gippsland region and maintains a 95% local workforce content.
- With proven local success supporting workers to transfer their skills from coal generation into civil construction and site remediation, Delta is working with the local community to invest in the education and training pathways needed to meet industry and worker demand, to support renewable energy needs.
- Delta has the unique ability to offer the security of a Tier-1 contractor, and the local engagement and support of local contractors to complement their services where required.

BMC Group is a privately owned and operated Gippsland business specialising in mechanical and electrical engineering services. Established in 2003 primarily to support the electricity industry in the Latrobe Valley, BMC now operates across a range of industries including water, petrochemical, oil and gas, pulp and paper, and mining and resources, both within Australia and internationally.

In 2019, BMC acquired a local Gippsland civil construction company, expanding its capability and capacity to support projects in the region.

BMC employs a team of approximately 600 employees and accesses a mobile labour force of more than 4,000 people to meet client needs.

Offshore wind opportunity

Category:

- Mechanical and electrical engineering

Project phase:

- Construction/operations

Experience and capability

- BMC Group has the experience and capability to provide a broad suite of services to support offshore wind projects during both construction and operations.
- During construction, BMC can provide specialist manufacturing and fabrication services, trenching and other civil works to support the onshore requirements of the project.
- During operations, BMC can provide electrical and mechanical maintenance and support services.

www.bmcgroup.com.au

Supplier	Bambach Wires and Cables
Location	Rosedale, VIC
Website	www.bambachcables.com.au
Categories	Speciality cables
Contract capacity	\$2,000,000 to \$5,000,000
Overview	<p>Bambach Wires and Cables is an Australian-owned manufacturer of low voltage speciality cables. The manufacturing facility based in Rosedale comprises of 30,000m² of covered area on a 50-hectare site, with a further 4000m² building currently under construction.</p> <p>Bambach has a wide range of equipment to manufacture cables of high flexibility, high temperature resistance, various screening types, and insulation and sheathing materials, to suit unique applications.</p> <p>Through its association with overseas cable manufacturers, Bambach is also able to source cables it does not manufacture locally, including Medium Voltage and High Voltage cables.</p>
Key clients	John Holland, UGL, Australian Rail Track Corporation
Relevant experience	<p>Suppliers of cables to major infrastructure projects throughout Australia including:</p> <ul style="list-style-type: none"> • Gippsland Rail Line Upgrade • Glenn Iris to Cockburn Upgrade • Narrabri to North Star Inland Rail.

Supplier	Plasgain
Location	Drouin, VIC
Website	www.plasgain.com.au
Categories	Drainage pipes, solar lighting, electrical cable covers, sustainable manufacture
Contract capacity	\$1,000,000 to \$2,000,000
Overview	<p>Plasgain is a manufacturer located in Gippsland with a mission: to solve engineering challenges sustainably. It offers solar lighting solutions for both temporary and permanent works, and manufactures a range of products from recycled plastic, including:</p> <ul style="list-style-type: none"> • Stormwater drainage pipes • Electrical cable covers • Light poles.
Key clients	Winslow, Underground Cable Systems, Symon Bros Construction
Relevant experience	Plasgain have supplied lighting infrastructure and electrical cable covers to a wide variety of projects from urban developments to green fields, brown fields, and major infrastructure.

Supplier	Arborzone
Location	Inverloch, VIC
Website	www.arborzone.com.au
Categories	Arborist
Contract capacity	Up to \$1,000,000
Overview	Arborzone Total Tree Care was started in 1991 and offers up-to-date pruning techniques, a wide range of arboriculture knowledge and prompt, professional and qualified tree care services throughout South Gippsland and Bass Coast.
Relevant experience	Arborzone has extensive experience and accreditation in both the public and private sectors.

Supplier	CMTA International
Location	Longford, VIC
Website	www.cmtainternationalcorp.com
Categories	Environmental services
Contract capacity	\$50,000,000+
Overview	<p>CMTA is the exclusive agency for Oil Spill Eater II® (OSEII) throughout Australia, South East Asia, Middle East, and parts of Europe.</p> <p>OSE II is the world's most environmentally safe and cost-effective bioremediation process for the mitigation of hazardous waste, oil spills and contamination of any size, large or small, virtually anywhere.</p> <p>OSE II is an environmentally safe clean-up method because it uses nature's own bioremediation processes to effectively eliminate hazardous materials such as crude oil, all hydrocarbons, and other hazardous substances.</p> <p>OSE II is listed on the Australian Government's National Contingency Plan for Oil Spills.</p> <p>CMTA can provide oil spill planning, oil spill clean-up and oil spill emergency response services, is supported by the manufacturer, and holds all required plant, equipment, product and resources to support project needs.</p>
Key clients	Shell, BP, Chevron, Australian Government
Relevant experience	OSE II has been used globally since 1989 to clean up oil and other hydrocarbon spills on water (offshore), on land and underground.

Supplier	Phoenix Aerial Solutions Australia
Location	Sale, VIC
Website	www.phoenixaerial.com.au
Categories	Drone services
Contract capacity	Up to \$1,000,000
Overview	<p>Phoenix Aerial Solutions, based in Gippsland, provides professional data acquisition, aerial inspection, RGB/Thermal monitoring, and zero latency live stream, operating with the latest enterprise technology. It provides services to oil and gas, government, agriculture, horticulture, mining and renewable energy industries.</p> <p>With over 25 years' aeronautical experience of flying helicopters in both Australia and overseas, Phoenix Aerial Solutions has an in-depth understanding of airspace rules and regulations and a strong commitment to maintaining the highest levels of safety standards.</p> <p>Phoenix Aerial Solutions has offshore experience, local area knowledge, security and military clearances. It owns all equipment required, and has all the required licences, operator certificates and specialist training.</p>
Key clients	Exxon Mobil, Oceaneering
Relevant experience	Phoenix Aerial Solutions has supported several solar farms within Gippsland to carry out inspections of solar panels and infrastructure.

Supplier	Protective and Safety Services
Location	Traralgon, VIC
Website	www.protectiveandsafetyservices.com
Categories	Safety training, and emergency response and consulting services
Contract capacity	\$1,000,000 to \$2,000,000
Overview	<p>Protective and Safety Services (PASS) is a Gippsland company that specialises in the provision of safety, training, emergency response and consulting services across several sectors including renewable energy, marine, oil, gas and petrochemical, construction, power generation and mining.</p> <p>With 26 years' experience, PASS has established solid networks with industry and government agencies as well as relationships on a local and national level</p>
Key clients	Exxon Mobil, Energy Australia, Gippsland Water, Fire Rescue Victoria, Star of the South, Marinus Link
Relevant experience	PASS employees have in-depth experience working on offshore installations during construction, maintenance and operation, as well as in the construction and maintenance of onshore wind farms. This experience includes training staff in safety skills to a national and global level, including Global Wind Organisation Training, as well as the provision of safety and rescue professionals for offshore facilities.

Supplier	Undersea Marine Australia
Location	Lakes Entrance, VIC
Website	www.underseamarine.com
Categories	Vessels and subsea services
Contract capacity	Up to \$1,000,000
Overview	<p>Undersea Marine Australia (UMA) is an Australian-owned family company that has been providing underwater marine services since 1990. The company is managed by Captain Eric W Beddome, a commercially accredited dive supervisor and mariner with more than 30 years' experience supplying divers, remotely operated vehicles (ROVs) and vessels to the offshore oil and gas and marine industry.</p> <p>UMA provides vessels and subsea services which include:</p> <ul style="list-style-type: none"> • Hydrographic survey • Underwater remote vehicles • Crew transfer • Dive support when required. <p>UMA is based in Lakes Entrance, Portarlington and Melbourne. It has a berthing and onshore engineering and storage facility at Lakes Entrance. Berthing is also available at the secondary ports of Welshpool and Port Albert if required.</p> <p>All marine personnel are sourced and based locally.</p>
Key clients	Star of the South
Relevant experience	Since early 2020 UMA have carried out six ecological survey programs to RPS for Star of the South, which included acoustic monitoring, Benthic ecology, hydrophone servicing, sea bird tagging, recovery and redeployment of sea noise recorders, and a pilot study for a potential second wind farm.

Supplier	Season Marine
Location	Welshpool, VIC
Website	www.seasonmarine.co
Categories	Vessels and subsea services
Contract capacity	Up to \$1,000,000
Overview	<p>Season Marine is a new business established to service the needs of the emerging offshore wind industry. Located at Barry Beach, near Barry Beach Marine Terminal and Port Anthony, Season Marine have confidence this area will play an important role in supporting the offshore wind projects in Bass Strait.</p> <p>Season Marine owns commercial land and has a new 500m² industrial building on the site with options to expand as required.</p> <p>Season Marine can offer a range of services, including:</p> <ul style="list-style-type: none"> • Commercial vessels, such as crew and equipment transfer, guard vessels • Vessels to support scientific research and data gathering • Storage and logistic services • General engineering design and fabrication in steel and aluminium.
Key clients	New business
Relevant experience	Season Marine has qualifications and experience with domestic commercial vessels in Australia, including extensive work with aluminium fast ferry operations and a large network of qualified crew and vessel owners, with options to lease vessels to meet the needs of clients.

The Silver Star undertook an offshore geophysical campaign for Star of the South, March 2020. (Photo courtesy of Atoll Offshore)

Supplier	Atoll Offshore
Location	Lakes Entrance, VIC
Website	www.atolloffshore.com.au
Categories	Vessels and subsea services
Contract capacity	Up to \$1,000,000
Overview	<p>Atoll Offshore, based in Lakes Entrance in Victoria, has a comprehensive fleet of aluminium vessels. Its services include:</p> <ul style="list-style-type: none"> • Transferring personnel and supplies, diver/ROV support, logistics, construction, research, and other offshore works • Self-propelled construction barges which are practical and safe work platforms or solutions for transporting gear and machinery. <p>Atoll Offshore vessels include:</p> <ul style="list-style-type: none"> • Calypso Star: a twin hull, aluminium alloy catamaran. It has two upper decks, a bulbous bow, transom stern and transverse and longitudinal framing. There is a 100m² flat and sheltered area on deck, a fully equipped workshop and a three-tonne crane; making this an ideal work boat for crew or equipment transfers • Starlight: a twin hull, aluminium catamaran. There is a 100m² flat and sheltered area on deck, a fully equipped workshop and a three-tonne crane; making this an ideal work boat for crew or equipment transfers • Constructor 2 and Constructor 3: two vessels designed for the construction industry. The barges are motorised, have multiple holding tanks and are controlled with a Neonav positioning system. <p>Atoll Offshore staff and crew have maritime expertise and extensive local knowledge of Bass Strait.</p>
Key clients	Star of the South
Relevant experience	Atoll Offshore was engaged by Fugro to provide the Silver Star to support the Star of the South geophysical campaign to map the seafloor in 2020. Note: the Silver Star is no longer part of the Atoll fleet.

Photo courtesy of AGA Apprenticeships Plus

Supplier	AGA Apprenticeships Plus
Location	Gippsland (various)
Website	www.aga.com.au
Categories	Employment and training services
Contract capacity	\$50,000,000+
Overview	<p>AGA Apprenticeships Plus, which is part of the IntoWork group, is one of the largest providers of employment and training services in Australia. AGA offers a wide range of workforce development solutions which can be tailored to many different industries and professions. AGA has a significant footprint across Gippsland and Victoria.</p> <p>AGA's model supports effective delivery of programs to support employment, aligning its services to the performance and quality framework. It embeds principles of candidate-centric career and education pathways linked to local labour market demand. AGA uses a strengths and needs based assessment approach, and provides strong participant engagement by facilitating capacity-building activities.</p> <p>AGA leverages existing services and Aboriginal and Torres Strait Islander programs and provides opportunities for people to engage in a wide range of activities, to support upskilling and employment, including employment in apprenticeships and traineeships.</p>
Key clients	Victorian Government, Tier-1 construction companies
Relevant experience	AGA has been selected as a provider to deliver, through its alliance partners, Australian Apprenticeship Support Network services across Victoria, South Australia and Tasmania, and nationally.

Right: Photo courtesy of Wood

Wood is a global leader in the delivery of project management, engineering, consulting and technical services to energy and built environment customers. Wood operates in more than 60 countries and employs around 55,000 people, with revenues of about \$10 billion.

While Wood is a multinational organisation with headquarters in Scotland, the business has over 20 years' experience supporting Esso Australia (Exxon Mobil) in the Gippsland region.

In Gippsland, Wood has provided brownfield engineering, procurement and construction service support to the Gippsland Basin Joint Venture's offshore facilities in Bass Strait, and onshore facilities at Longford Gas Plant, Long Island Point and Barry's Beach Marine Terminal.

Wood provides a significant contribution to the Gippsland economy, currently employing more than 300 people supporting Exxon Mobil projects in the region.

Offshore wind opportunity

Category:

- Scouring material; offshore balance of plant operations and maintenance

Project phase:

- Construction/operations

Experience and capability

The scouring process provides protection to the subsea cables and base structures on the seabed, protecting them from erosion and potential instability.

Wood has the experience to support the offshore wind industry with the delivery of scour protection, including significant experience in Gippsland, where Wood has supported Exxon Mobil with scouring expertise, and implemented the scouring program for Exxon Mobil's two concrete gravity-based platforms in Bass Strait.

Wood has an experienced local workforce and supply chain, and the ability to scale the business based upon the project's demand, making it uniquely placed within the Gippsland region.

www.woodplc.com

Latrobe Valley Enterprises (LVE) is a registered Social Enterprise and Australian Disability Enterprise based in Morwell. Commencing as a sheltered workshop in 1967 with only a handful of employees, the business has evolved into a highly commercial operation delivering a range of services and employing over 100 staff and employees living with disabilities. The business delivers a greater social purpose by employing people living with disabilities and supports large projects with products of the highest quality.

In recent years, LVE has supported several major projects including the construction of the new Avon River Bridge, Melbourne Metro Tunnel, Level Crossing Removal project and Regional Rail Revival, primarily providing a range of indoor and outdoor signage. LVE has recently invested heavily in new technology to further expand sign-making capabilities.

Services include:

- Sign making
- Recycling and secure document destruction
- Grounds and facilities maintenance
- Business support services, including mail collation and promotional show bag assembly.

Offshore wind opportunity

Category: Signage, facilities management

Project phase: Construction/operations

Experience and capability

Offshore wind projects will have significant permanent and temporary signage requirements including safety and construction, electrical hazards, restricted areas, and safety signs for both onshore and offshore applications.

By partnering with LVE, projects can access commercially competitive, locally manufactured signs with 90%+ of materials sourced locally, while also supporting the employment of disadvantaged jobseekers in the region.

LVE has existing relationships with local suppliers and employment providers to scale and tailor products to the projects’ demands.

Victorian businesses

JK Marine Services

JK Marine Services, with berths at Port Albert, Port Franklin and Port Welshpool, is owned and operated by Jake and Katie Cripps. It has grown from their family roots in commercial fishing in Bass Strait and Corner Inlet into an efficiently-run and reliable marine services operator.

JK Marine Services provides a range of commercial and trade services including crew transfer, charter, towing and salvage. Its vessels include the versatile 16m 'Investigator' and the 12m landing barge 'Fleetwood'.

JK Marine Services has undertaken work for Star of the South, including floating LiDAR and wave buoy servicing and retrieval, and gillnet fish surveys.

"We look forward to evolving JK Marine to work closely with the offshore wind industry."

- Jake Cripps

Phone: 0448 403 176

Website: www.jkmarineservices.com.au

Far Out Charters

Far Out Charters has been operated for 20 years by Gippsland local and commercial fisher Tony Kemna.

Tony has provided vessel services for Star of the South for boat-based bird surveys and fish surveys.

"Star of the South is welcome in our backyard, and it's great to be involved in the project doing what I love. I'm looking forward to seeing more employment opportunities in this new industry, especially for the younger generation. That's what makes a great local community - being able to live and work close to home."

- Tony Kemna

Phone: 0428 401 819

Website: www.faroutcharters.com.au

Email: info@faroutcharters.com.au

Port Albert Fishin' Charters

Brian Spiteri is the proud owner and operator of Gippsland business Port Albert Fishin' Charters. Brian grew up around Port Albert and has been working as a maritime operator for over 30 years.

Port Albert Fishin' Charters has provided vessel services for Star of the South marine surveys and site visits since 2020, providing not only the vessel but its local knowledge and experience.

"I'm looking forward to an offshore wind industry coming to the region. I can see some great opportunities not only for my business, but for many others around Gippsland."

- Brian Spiteri

Contract capacity	\$50,000,000+
Overview	Brockman is a specialised mechanical engineering business with in-house design, a large workshop facility and site construction expertise, servicing major industrial and energy sector clients. Its core expertise is in large and heavy plate fabrication and erection (fuel and chemical tank farms, and large welded steel reservoirs) and associated works such as piping, access structures and foundations.
Key clients	Exxon Mobil, Ampol, Rio Tinto
Relevant experience	Caltex jet fuel tank – increased terminal storage capacity with our design, fabrication and construction of new 1.6ML Jet A1 hydrocarbon storage tank.

Supplier	Biosis
Location	Port Melbourne, VIC
Website	www.biosis.com.au
Categories	Environmental consulting services
Contract capacity	\$2,000,000 to \$5,000,000
Overview	Biosis provides timely and appropriate expert advice based on its extensive skills and experience in environmental and heritage assessment, and environmental legislation and associated processes. The ecology and heritage environment are important components in developing sustainable projects in Australia. Biosis’ services in assessment and evaluation, including its specialist ecology and heritage assessment and advice, assist its clients to manage their projects within the bounds of environmental and heritage legislation. Biosis has seven offices in South-Eastern Australia, and has provided its services across all states and territories. Its Environmental Planning Team provides practical, innovative advice and solutions to clients on planning approvals, planning scheme amendments, approvals strategies, referrals and Environmental Effect Statements. This advice is based on Biosis’ extensive knowledge of and experience in planning, environmental legislation and associated environmental approvals processes.
Key clients	RPS (Star of the South)
Relevant experience	Biosis was engaged by RPS to provide technical advice and assist with the design and management of marine bird surveys for the Star of the South Offshore Wind Project. Throughout this surveys project, Biosis provided technical oversight and management, and participated in the coordination of field surveys and the preparation of technical reports and collision risk modelling to support the EIS.

Spatial Media

Spatial Media provides people with the digital tools they need to engage with projects.

Spatial Media, established in 2014, is an Australian-owned small business comprising a team of creative and technology specialists who support infrastructure projects with digital engagement and visualisation technologies.

Spatial Media has developed a suite of digital tools for Star of the South, including an interactive 3D model that is accessible on a touchscreen display in the project’s office, an online interactive map, and a 360-degree video for use with virtual reality goggles.

“We’re proud to support Star of the South – it is an exciting time to be involved with an ambitious project. The visualisations are valuable engagement tools allowing the Star of the South team to effectively communicate and consult with Traditional Owners, stakeholders, local communities and landholders.”
– Spatial Media

Dan and Nicole (right) in Star of the South’s Gippsland office

Phone: 1300 772 842
Website: www.spatialmedia.io
Email: dan@spatialmedia.io

Supplier	Thornton Engineering
Location	Corio, VIC
Website	www.thorntoneng.com.au
Categories	Engineering services
Contract capacity	\$20,000,000 to \$50,000,000
Overview	Thornton Engineering provides the design and fabrication of structural steel, pressure vessels, heat exchangers and plate and piling steel products for major projects Australia-wide. Using state-of-the-art technology and facilities, it leverages its extensive engineering and design experience to fabricate products of world-class quality. Thornton works closely with engineering firms and clients operating in the oil and gas, power, petroleum, mining, infrastructure and construction industries.
Key clients	AGL, BHP, BP, Caltex, CPB Contractors, Exxon Mobil, Santos
Relevant experience	Geelong Port: Truss, decks and link spans. Thornton Engineering’s scope for the project included workshop detailing, fabrication of steel truss in seven sections, Grid 4 columns and three link spans, welding to AS1554.1SP, non-destructive testing of welds, surface protection (blast to class 3.0 with a 2-coat and 3-coat paint systems), trial assembly of the truss sections with a dimensional survey, structural fasteners, and transportation of the truss sections to site.

Supplier	Hofmann Engineering
Location	Cheltenham, VIC
Website	www.hofmannengineering.com
Categories	Design, manufacturing, repair and inspection of wind turbine gearbox components
Contract capacity	\$50,000,000+
Overview	<p>Hofmann Engineering is one of Australia's foremost manufacturers of specialist engineered equipment. The Hofmann Group of Companies operates from sites in Australia, Chile, Peru, China and India.</p> <p>Key capabilities include:</p> <ul style="list-style-type: none"> • High-end design, including wind gearbox components • On-site and emergency services of mining and industrial equipment • Product improvement manufacture • Refurbishment • Precision engineering products • Special purpose tooling • Processing equipment and tooling • Inspection • Repair • Gearing for heavy and light industries • Valves • Specialist production line • Load testing • Machining and fabrication.
Key clients	Vestas
Relevant experience	<p>Since 2008, Hofmann Engineering has been extensively involved in repairing and improving the life expectancy of various wind turbine gearbox models for local and overseas markets.</p> <p>Hofmann Engineering designed and manufactured the 1MW planetary gearbox for Atlantis Resources to turn the generator on the world's largest tidal turbine, operating at a depth of approximately 20m below the surface.</p>

Supplier	GVP Fabricators
Location	Mordialloc, VIC
Website	www.gvpfabricators.com.au
Categories	Steel fabrication
Contract capacity	\$10,000,000 to \$20,000,000
Overview	GVP Fabricators is a privately-owned steel fabrication specialist comprising a professional team. Operating since 1983, the company has progressed to become an industry leader in the project management, supply and erection of large-scale commercial and civil steel fabrication works for both government and private sectors.
Key clients	CPB, Lendlease, John Holland, Besix Watpac, Multiplex, Built, Laing O'Rourke
Relevant experience	Dandenong to Caulfield Level Crossing Removal project: Supplied, fabricated and installed steel work main canopy and associated building, stairs and lift-shafts for the Hughesdale Station.

Photo courtesy of Keppel Prince Engineering

Supplier	Keppel Prince Engineering
Location	Portland, VIC
Website	www.keppelprince.com.au
Categories	Steel fabrication, wind tower manufacturing, wind tower fit-out
Contract capacity	\$50,000,000+
Overview	<p>Keppel Prince Engineering specialises in the construction, fabrication and maintenance of industrial structures and equipment.</p> <p>From wind farms to bridges, the team of 300 professionals has the experience and resources to deliver projects on brief, on time and on budget.</p> <p>Keppel Prince offer new solutions to build and maintain a sustainable future for customers, the environment and the community.</p>
Key clients	Acciona, Goldwind, Siemens, Alcoa, Telstra
Relevant experience	<p>Keppel Prince has worked on some of the largest onshore wind farms in Australia.</p> <p>Keppel Prince's world-class facility is designed to fabricate, blast and paint, fit-out and store onshore wind towers, without double-handling. It also supplies and installs complex internal components such as platforms, ladders, electrical cables, lights and fall arrest systems.</p>

The Star of the South team visited the Wilson Transformers factory in Glen Waverley

Supplier	Wilson Transformers
Location	Glen Waverley, VIC
Website	www.wtc.com.au
Categories	Electrical infrastructure
Contract capacity	\$50,000,000+
Overview	<p>Wilson Transformers (WTC) is the largest Australian owned and based manufacturer of power and distribution transformers. WTC operates two Victorian manufacturing facilities in Glen Waverley and Wodonga.</p> <p>For more than 80 years, WTC has been designing and building transformer products and providing life-time management services. It is committed to supporting local and global customers by delivering reliable and high-quality products that meet customers' requirements. Its products range from 16kVA single-phase pole mount transformers and three-phase 100 kVA compact MV substations, right up to three-phase 550MVA 400kV transmission transformers.</p> <p>Through collaboration with international organisations combined with its ongoing focus on innovation, WTC has pioneered a range of alternative solutions that are commercially and technically attractive, for different sectors. Its ideas, experience and commitment to continuous improvement enable it to provide products that minimise the customer's whole-of-life cost and operational risks.</p> <p>Hundreds of thousands of WTC's transformers are in service around Australia and other parts of the world.</p>
Key clients	Ausnet, Goldwind, UGL, Acciona, Downer EDI
Relevant experience	<p>Wilson Transformers has provided products and services to a wide range of renewable energy projects, including:</p> <ul style="list-style-type: none"> • Portland Windfarm • Waubra Windfarm • Ararat Windfarm • One Sun Capital Solar Farm.

Supplier	Aventus Consulting
Location	Cheltenham, VIC
Website	www.ventusconsulting.com.au
Categories	Environmental and safety consulting services
Contract capacity	\$2,000,000 to \$5,000,000
Overview	<p>Aventus Consulting is an independent Melbourne-based consultancy established in 2009 that specialises in providing environmental and safety approvals, advice, auditing, and management services to the energy industry, covering all onshore and offshore activities. This includes:</p> <ul style="list-style-type: none"> • Exploration (seismic, geophysical and geotechnical surveys, and drilling) • Construction/development/installation • Commissioning and operations • Decommissioning. <p>Through the development of Health, Safety, and Environment (HSE) management systems, compliance auditing, regulatory and stakeholder consultation, workforce education and regulatory reporting, Aventus ensures projects or operations meet the necessary regulatory requirements.</p>
Key clients	Star of the South, Corio Generation, Mainstream Renewable Power, Equis
Relevant experience	<p>Aventus has supported Star of the South with various field campaigns (floating LiDAR deployment, offshore geophysical investigations, and onshore and offshore geotechnical investigations) including:</p> <ul style="list-style-type: none"> • Development of compliance registers • HSE evaluation of contractor tenders • Compliance and assurance management of contractors during pre-mobilisation and operations phases • Assessment of contractor HSE documents • Facilitating and participating in HSE hazard identification workshops • Preparation and delivery of HSE inductions to project crews • Site inspections and audits and preparation of associated reports • General HSE management and compliance advice and support. <p>Aventus is also preparing Management Plans for early stage offshore wind activities, such as metocean measurements (FLiDAR, ADCP) and seabed surveys (geophysical and geotechnical).</p>

Supplier	GAM Air
Location	Essendon Fields, VIC
Website	www.gamgroup.com.au
Categories	Aviation services
Contract capacity	\$5,000,000 to \$10,000,000
Overview	<p>GAM Air was established over 30 years ago. It operates a fleet of 38+ aircraft with the capability to carry out multiple different missions, and is one of the largest general aviation fleets in Australia.</p> <p>GAM Air's capabilities include freight and passenger air transport, aerial surveys and special missions.</p>
Key clients	Star of the South
Relevant experience	GAM Air conducted monthly aerial spotting tasks for the Star of the South project, including whale spotting over the proposed site to ensure current and future ecological impacts were closely observed.

Supplier	Civil Contractors Federation
Location	Notting Hill, VIC
Website	www.ccfvic.com.au
Categories	Training
Contract capacity	\$2,000,000 to \$5,000,000
Overview	<p>The Civil Contractors Federation (CCF) is the peak industry body representing Australia’s civil construction industry. CCF members are responsible for the construction and maintenance of Australia’s infrastructure, including roads, bridges, pipelines, drainage, ports, and utilities. CCF has branches in all states and territories, representing more than 2,000 contractor and associate members nationally.</p> <p>CCF’s civil training experts provide training in all aspects of civil construction across Victoria. It provides over 250 short courses annually to the civil industry and services the training needs of over 2,300 contractors.</p> <p>CCF is the largest provider of civil apprentices and currently has over 300 civil construction and plant operations apprenticeships.</p>
Key clients	Victorian Government
Relevant experience	Training for the civil construction industry

Supplier	ASP Ship Management
Location	Melbourne, VIC
Website	www.aspships.com
Categories	Ship and crew management
Contract capacity	\$50,000,000+
Overview	<p>ASP Ship Management (ASP) is a global provider of ship and crew management services as well as marine logistics support, including technical support services for new buildings as well as major ship conversion projects.</p> <p>ASP currently manages 150+ vessels on a global basis.</p> <p>ASP has offices in Australia, New Zealand and all major maritime operating centres. It has extensive expertise across both government and commercial contracts.</p> <p>ASP’s Australian offices are based in Melbourne (head office) in Victoria, Gladstone in Queensland and Rockingham in Western Australia.</p>
Key clients	Large mining houses, oil majors, governments, research clients and ship owners/operators
Relevant experience	ASP managed two windfarm crew transfer and maintenance vessels from 2011 to 2015. The vessels operated in the Greater Gabbard windfarm and London Array windfarm (England), Borkum West windfarm, Helgoland and Rostock (Germany), and Esbjerg (Denmark), transporting technicians and spares to and from wind turbines. These vessels were built, owned and operated by ASP.

Spence Consulting facilitated the Star of the South Steel Industry Briefing in 2022

Supplier	Spence Consulting Group
Location	Northcote, VIC
Website	www.spence-consulting.com
Categories	Consulting services
Contract capacity	Up to \$1,000,000
Overview	Spence Consulting Group is a Victoria-based consulting firm that provides tailored support and services, to assist organisations and major project proponents, in the areas of local industry and workforce development, social inclusion, Aboriginal and Torres Strait Islander engagement and participation, advocacy and government relations, community and stakeholder engagement, and project management.
Key clients	Star of the South, Opal Australia, Webuild, Equis, CPB, Laing O’Rourke, WSP, Capella Capital, Kane Construction, Honeywell, Compass, GLaWAC
Relevant experience	<p>Spence Consulting Group has supported the planning approval, community industry, and workforce engagement processes for major project proponents across Gippsland and Victoria, including:</p> <ul style="list-style-type: none"> • Star of the South offshore wind farm • Opal Australian Paper/Suez, Energy from Waste Project • Octopus Investments, Perry Bridge and Fulham Solar Farms • Equis/SSE Renewables offshore wind farm • Spark Consortium, North East Link • WGB-JV, Suburban Rail Loop.

CNC has supported the Star of the South's landholder and community engagement since 2020

Supplier	CNC Project Management
Location	Melbourne, VIC
Website	www.cncprojects.com.au
Categories	Consulting services
Contract capacity	\$20,000,000 to \$50,000,000
Overview	<p>CNC Project Management is an Australian company servicing the infrastructure and energy sectors. Established in 2006, CNC assists its clients to plan and operate projects.</p> <p>CNC Project Management support clients in:</p> <ul style="list-style-type: none"> • Project management and planning • Permitting and approvals • Pipeline and risk engineering • Environmental management • Land access and property services • Communications and stakeholder engagement • Spatial, digital and data services • Agreement and payment management.
Key clients	Star of the South
Relevant experience	CNC Project Management supported the Star of the South project through the provision of landholder liaison services for the onshore transmission component of the project. CNC Project Management has also provided support in spatial services.

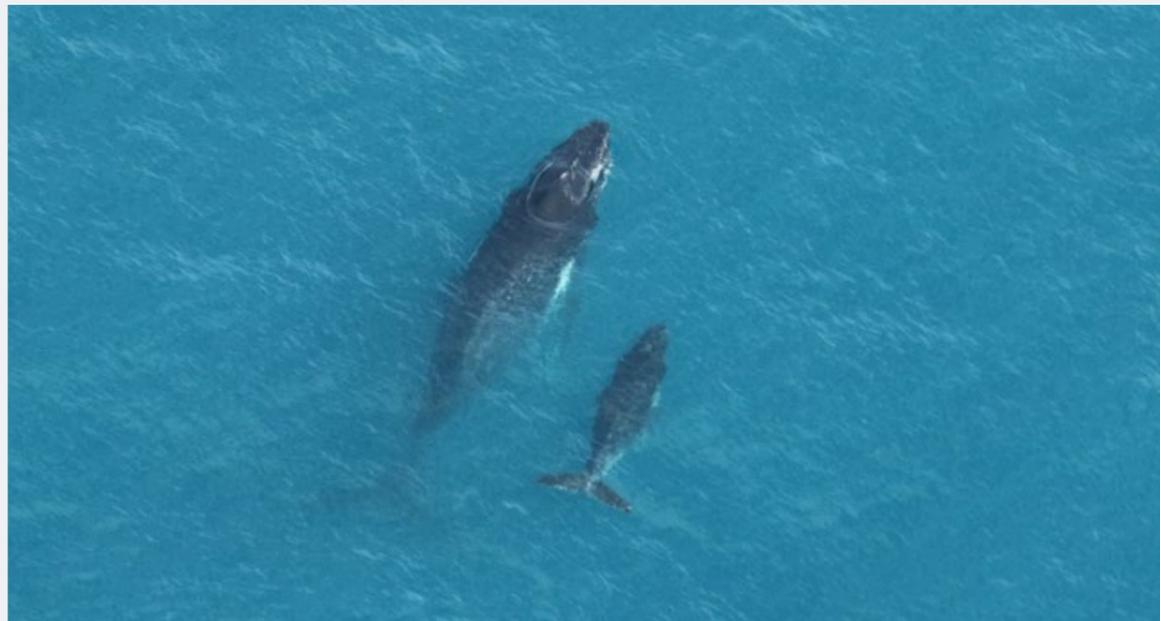

Supplier	HES Cranes
Location	Epping, VIC
Website	www.hescranes.com.au
Categories	Cranes
Contract capacity	\$5,000,000 to \$10,000,000
Overview	<p>HES Cranes specialises in the supply of premium lifting equipment, including:</p> <ul style="list-style-type: none"> • Gr100 chain slings • Synthetic (round and flat – all sizes) and Dyneema slings • Wire rope and snatch block combinations • Shackles • Lifting clutches to 32T • Spreader bars • Equalisers • Bespoke and custom items • Work cages • Load monitoring equipment • Height safety • Load restraint equipment (MaxiBinders, chain sets, RTD). <p>HES Cranes has an extensive history in, and knowledge of, working on major infrastructure projects Australia-wide, including: rail, roads, bridges and tunnels, transport, civil, wind industry, power authorities, oil and gas, and entertainment projects.</p>
Key clients	Vestas, Nordex, Acciona
Relevant experience	<ul style="list-style-type: none"> • Worked alongside Vestas on many Australian sites • Assisted Nordex/Acciona with Mortlake South wind farm • Principal supplier of lifting equipment to Professional Wind • Provides services to BMS Cranes and Acciona for the MacIntyre Wind Farm Project in Queensland, one of the largest onshore wind farms in the world.

Supplier	BMT
Location	Melbourne, VIC
Website	www.bmtglobal.com
Categories	Marine technical services, boat design
Contract capacity	\$10,000,000 to \$20,000,000
Overview	<p>BMT is a global specialist marine engineering, environment and naval architecture consultancy that has supported offshore energy operators for more than 30 years. With the energy transition, BMT has also transitioned to assisting clients in offshore wind and marine renewable (tidal and wave) energy.</p> <p>Within Australia, BMT has approximately 250 professional staff working on marine and coastal studies. Its multidisciplinary team includes:</p> <ul style="list-style-type: none"> • Marine and coastal environmental scientists • Ecologists • Environmental planners • Oceanographers • Hydrodynamic modellers • Ocean and coastal engineers • Systems engineers • Naval architects. <p>The team is supported by in-house remote sensing, GIS experts and cartographers, and an array of specialised instrumentation maintained and deployed by specialist technicians.</p> <p>BMT's key areas of expertise in offshore wind cover are:</p> <ul style="list-style-type: none"> • Metocean studies and advisory • Marine environmental studies and field surveys • Marine and ocean engineering • Ports, shipping and logistics including planning, engineering design, discrete events • Simulation • Asset integrity monitoring of fixed and floating assets • Vessel design including Crew Transfer Vessels, service accommodation transfer vessels, and offshore support vessels, including low emissions designs.
Key clients	Include Woodside, Chevron, Ørsted
Relevant experience	<ul style="list-style-type: none"> • BMT has undertaken and is currently undertaking assessments on offshore wind farms across Australia. • BMT has conducted numerous metocean studies for offshore projects assisting with site selection, engineering design and operations for offshore projects in Bass Strait and along the Victorian coastline. • BMT has experience and understanding of the logistics requirements of offshore wind projects in relation to ports and vessels in construction/installation and operations/maintenance phases.

Supplier	P&O Maritime Logistics
Location	Southbank, VIC
Website	www.pomaritime.com
Categories	Marine logistics and shore-based infrastructure
Contract capacity	\$50,000,000+
Overview	<p>P&O Maritime Logistics (P&OML) is a leading provider of marine solutions with a focus on cargo transport, port services and offshore energy. Operating worldwide, it owns and operates approximately 400 vessels and provides a wide portfolio of value-added marine services.</p> <p>P&OML is a wholly owned subsidiary of DP World (www.dpworld.com).</p> <p>P&OML is a driving member of the International Marine Contractors Association (IMCA), and actively participates in the development and implementation of marine standards globally.</p>
Key clients	P&OML's client base includes prominent international and regional based companies including Glencore, New Century Resources, OK Tedi Mining Ltd, Puma Energy, BP, Chevron, Eni, Saipem, Shell, Total, Saudi Aramco, Maersk Oil, and Maputo Port Development Company.
Relevant experience	<p>P&OML is currently involved in the construction and support of the following projects:</p> <ul style="list-style-type: none"> • Yunlin offshore wind farm – 82km² with 80 wind turbine generators (640MW) • Greater Changhua 1 offshore wind farm – 108km² with 112 wind turbine generators (605MW).

Supplier	Survitec Group
Location	Dingley Village, VIC
Website	www.survitecgroup.com
Categories	Offshore survival technology
Contract capacity	\$50,000,000+
Overview	<p>Survitec is a Global Survival Technology leader in the maritime, defence and government, aerospace, and energy sectors. Survitec has over 3,000 employees worldwide. It has 11 manufacturing facilities and 400 service centres that operate in 2,000 ports, spanning 96 countries.</p> <p>Survitec is the world's largest manufacturer and supplier of life raft, Marine Evacuation Systems (MES), and offshore rental PPE. In the offshore wind industry, it supplies the unique 'Evacuator' descent system as well as lifejackets, immersion suits and other marine and aviation safety equipment.</p>
Relevant experience	Survitec is active in the North Sea wind energy sector and has in-house expertise ready to support offshore wind projects in Australia.

Blue Whale Study

Dr Pete Gill has been involved in large whale research since 1983 and has studied a range of cetacean species in the waters around Australia, South West Pacific, New Zealand, California and Antarctic. He initiated the first blue whale research project in southern Australian waters in 1998 and founded Blue Whale Study (BWS) in 2007.

BWS is a not-for-profit research institute dedicated to the study of endangered blue whales. It conducts ecological research and education programs to promote the understanding and conservation of this species and its feeding habitat. BWS also offers scientific consultancy services, including marine fauna monitoring and surveying.

BWS has conducted over 270 aerial surveys searching for whales and dolphins, for state and commonwealth governments, marine NGOs, the oil and gas industry, offshore

Photos courtesy of Blue Whale Study

wind energy projects and their own research projects.

BWS conducted marine mammal aerial surveys in the Star of the South project area in central Bass Strait during 2019–21 and 2023.

Australian businesses

Supplier	Altrad Services
Location	Perth, WA
Website	www.altrad.com
Categories	Various
Contract capacity	\$50,000,000+
Overview	<p>Altrad is a global provider of industrial and asset integrity services, offering a range of cost-driven integrated solutions principally for the mining and minerals, oil and gas, power, water, renewable energy and defence sectors.</p> <p>Altrad has operated in Australia for more than 40 years and employs approximately 2,000 highly skilled people across the country.</p> <p>Combining the expertise of its construction and maintenance group Valmec (acquired in 2021), and Sparrows (including Alpha) and RMD Kwikform (acquired in 2022), Altrad is now positioned as a new and unique best-in-class service provider for the Australian market. Altrad builds, protects and extends the life of clients' assets, its services including engineering, inspection, operations and maintenance to the offshore energy and renewables sectors.</p> <p>Services provided include:</p> <ul style="list-style-type: none"> • Scaffolding • Rope access • Surface preparation • Coatings • Crane operations • Rigging and lifting • Equipment sales and rental, electrical and instrumentation • Fabrication and machining • Commissioning • Civil and earthworks.
Key clients	Offshore wind projects including Barrow, North Hoyle, Scroby Sands, Kentish Flats, Thanet, Northwind
Relevant experience	<p>Altrad (via Alpha) has delivered a variety of technical personnel, integrated engineering, maintenance, repair and inspection services to offshore and onshore wind energy projects.</p> <p>It has worked with wind farm operators and Original Equipment Manufacturers (OEMs) during the installation and commissioning, and operations and maintenance stages of developments. Altrad also provided rope access services for an offshore wind turbine blade campaign in the Netherlands, supporting major structural repairs.</p>

Douglas Partners completed geotechnical investigations for Star of the South in 2022

Supplier	Douglas Partners
Location	West Ryde, NSW
Website	www.douglaspartners.com.au
Categories	Geotechnical investigations
Contract capacity	\$5,000,000+
Overview	Douglas Partners is an Australian engineering company specialising in the fields of geotechnical, environmental and groundwater engineering.
Key clients	Powerlink, Transgrid, Ergon Energy, Energex, Blair Fox Pty Ltd John Holland, KBR, Star of the South
Relevant experience	Experience in transmission line investigations, solar farm investigations, wind farm investigations, rail tunnels and level crossing removal projects. Douglas Partners was also contracted by Star of the South to carry out its onshore geotechnical investigations.

Supplier	Garde Services
Location	Silverwater, NSW
Website	www.garde.com.au
Categories	Underground cable installation
Contract capacity	\$50,000,000+
Overview	Garde Services is Australia's leader in underground infrastructure services to the electricity industry, and a NSW Level 1 Accredited Service Provider (ASP). Garde Services is a specialist supplier to the electrical construction industry, focussed on civil construction, that supports the installation, maintenance and protection of high voltage underground electricity cables and assets. Garde has been responsible for the design, construction, and installation of transmission cables for numerous electricity authorities, including Ausgrid, TransGrid, and Endeavour Energy, over the past 40 years. Garde Services supports the installation, maintenance, and protection of high voltage underground electricity cables and assets. Various cable installation methodologies are utilised, including open trench excavations, ducted excavations, tunnels, submarine cables and underground tunnels and chambers. The scope of installations ranges from urban streets to rural areas and includes switch stations, substations and power stations.
Key clients	TransGrid, Ausgrid, Endeavour Energy
Relevant experience	As part of the 330kV Powering Sydney's Future project, Garde was awarded the contract for the installation of 20km of 330kV underground transmission feeder cables from Transgrid's Rookwood Road Substation to Alexandria Substation. Garde were also heavily involved in the circuit design and appropriate route selection.

Supplier	EnerMech
Location	Henderson, WA
Website	www.enermech.com
Categories	Various
Contract capacity	\$50,000,000+
Overview	EnerMech provides services to customers across the entire spectrum of the energy asset lifecycle, on either a stand-alone or integrated basis, providing flexible commercial models that can be tailored to each customer's needs. EnerMech offers: <ul style="list-style-type: none"> • Cranes and lifting services • Hydraulic products and services • Pipeline, process and umbilical services • Valve services, supply and manufacture • Equipment rental • Industrial services • Training services • Electrical and instrumentation services. EnerMech's skilled workforce can mobilise to any site across Australia as required. Management personnel are positioned in all locations to coordinate projects thoroughly and safely.
Key clients	Balfour Beatty
Relevant experience	EnerMech rapidly responded to an issue on two offshore substations on the Gwynt y Mor offshore wind farm. Using its expertise, EnerMech's technical team released problematic knife gate valves and isolated the fire suppression system so essential maintenance could be carried out.

Supplier	Havfram Wind
Location	Perth, WA
Website	www.havfram.com
Categories	Turbine and foundation installation
Contract capacity	\$50,000,000+
Overview	<p>Havfram Wind is headquartered in Oslo, Norway, with offices in Stavanger, Aberdeen and Perth, and representation in France and Korea.</p> <p>Havfram Wind is a global offshore wind installation company with competency in both floating and bottom-fixed foundations. In the bottom-fixed segment it provides installation services for turbines and foundations through its own fleet of next-generation Wind Turbine Installation Vessels (WTIVs). In the floating wind market, its focus is on transport and installation activities (including permanent equipment procurement) on a global basis, using key vessel partners for delivery of projects.</p>
Key clients	Equinor, RWE Renewables, Ørsted, Vattenfall, Iberdrola, Ocean Winds, Mainstream Renewable Power, Oceanex
Relevant experience	<p>Havfram Wind has a highly experienced team with 10+ years' experience in offshore wind, both in critical onshore and offshore positions. The core team has a proven track record with over 600+ turbines installed.</p> <p>Havfram Wind is currently constructing its fleet of next-generation WTIVs, based on the Gusto NG20000X design and future proofed for very large turbine systems; this will be delivered during 2025.</p> <p>Havfram Wind is also active in many commercial-scale floating wind activities globally with ongoing Front-End Engineering Design (FEED)-level engineering support in preparation for the delivery of these giga-projects towards 2030.</p>

Supplier	MS Diversified Services (Protectorshell)
Location	Matraville, NSW
Website	www.protectorshell.com
Categories	Cable installation, testing and commissioning
Contract capacity	\$2,000,000 to \$5,000,000
Overview	<p>MS Diversified Services (MSD) has over 30 years' hands on experience in the installation, repair and maintenance of submarine, optical, offshore wind and power cables. Its services include:</p> <ul style="list-style-type: none"> • Shore end cable installation • Subsea cable installation • Jointing testing and commissioning services for optical, offshore wind and power cables • Fibre optic cable jointing. <p>MSD also supplies the cable protection system (Protectorshell articulated pipe), providing cable protection in shallow water abrasion and impact protection for subsea cables and offshore wind cables. MSD locally manufactures the accessories for the cable protection system.</p>
Key clients	Various
Relevant experience	<p>MSD has undertaken many shore-end cable installations, from remote oilfield locations to the heart of a city's most popular beach.</p> <p>Operations vary greatly in scope, from short sections above ground from ship to shore, through to directionally bored conduits of up to 2000 metres in length.</p> <p>MSD has the experience required to carefully plan the entire operation and manage external factors. As part of a shore-end installation, it can also deliver associated works such as articulated pipe installation, beach burial and cable testing.</p>

Supplier	Pipeline Drillers Group
Location	Tingalpa, QLD
Website	www.pdgroup.com.au
Categories	Horizontal Directional Drilling
Contract capacity	\$5,000,000 to \$30,000,000
Overview	<p>Pipeline Drillers Group (PDG) is Australia's largest horizontal directional drilling (HDD) company. Established in 1999, it currently employs more than 40 skilled employees in the field of trenchless technology.</p> <p>The company has been proudly Australian owned and operated since its inception and has grown from its humble beginnings of just one rig, to now having 11 directional drilling rigs ranging from 30 to 500 tonne of thrust/pull force.</p> <p>PDG is a leader in the HDD industry, completing projects across Australia while continuing to develop new and innovative methods for the trenchless installation of steel and High Density Polyethylene (HDPE) pipelines.</p> <p>Based in the Brisbane suburb of Tingalpa, and proficient in mobilising equipment nationwide, PDG caters for the logistics of transporting HDD equipment across state and territory borders.</p>
Key clients	Ampol, CPB Contractors, Santos, IOR, UnityWater, Fulton Hogan, Pensar, MPC Kinetic and McConnell Dowell
Relevant experience	<ul style="list-style-type: none"> • Sole Development Project for Cooper Energy – Pipeline Drillers HK250 successfully completed two ocean outfalls for the Sole Development Gas Plant upgrade. The 1200m and 1400m pipelines were welded and field joint coated to the required specifications. • Dulacca Wind Farm – to assist with the construction of the wind farm, Pipeline Drillers were employed to install four 110mm HDPE and two 180mm product pipes. All pipes were successfully installed with no major incidents. • Project Thenus: Stage 2 for Australian Bay Lobster Producers (ABLP) – Stage 2 of the Project Thenus Water Intake Pipeline saw the successful completion of four onshore HDPE installations and two 1100m ocean outfalls. Pipeline Drillers enlisted the help of marine subcontractors to successfully float the pipe offshore, connect the pipe to the drill string for installation and assist with a successful pipe pullback. • Tasmania Outfall for TasWater – Pipeline Drillers successfully installed two ocean outfalls using HDPE product pipe, at Dover and Cygnet. Both pipes were welded inland and were safely towed for 50km along the Tasman Sea to the project site. Extensive marine works were undertaken including installing a diffuser. Due to the highly sensitive environmental area, a qualified mammal observer was present during the pipe installation period. • Clarence Valley Council River Outfall for Clarence Valley Council – Pipeline Drillers successfully completed the Ebb tide release into the Clarence River. Two of PDG's biggest HDD drilling rigs were used to complete the task using a forward reaming methodology. One rig was set up near the marina in Yamba to complete the pilot hole, the other on a barge in the Clarence River to handle the pipe string and pipe pull. Two tugboats and four marine support vessels were utilised to safely manage the floating pipe in tidal shifts during pullback.

Supplier	RPS
Location	Perth, WA
Website	www.rpsgroup.com
Categories	Wind resource measurement, metocean measurement and consulting services
Contract capacity	\$10,000,000 to \$20,000,000
Overview	RPS is an Australian-based end-to-end provider for wind resource measurement, using both fixed and floating LiDAR technology, and broader metocean measurements and consulting, to support the offshore wind industry. The RPS floating LiDAR buoy has been designed and manufactured in Australia and deployed worldwide. The RPS team provides expert guidance and management from the operations base in Perth, and works with local contractors to provide logistics and vessel support for deployment and retrieval operations. RPS employs more than 40 staff locally, and a global team of around 100. Combining the team with one of the largest local metocean equipment pools gives the scale that offshore developers need to ensure a quality and timely campaign.
Key clients	Equinor, Netherlands Enterprise Agency, Equinor/Polenergia, Shell, BP, Woodside, Star of the South
Relevant experience	Completed long-term floating LiDAR measurement programs of one to two years' duration in the United States (US), United Kingdom, South Korea and Europe, including ongoing deployments in the US, South Korea and the Netherlands. RPS completed long-term validation trials off the Western Australian coast, and have commenced fixed LiDAR measurement for another Australian project. RPS has 30+ years of commercial metocean experience globally, including significant volumes of measurement and consulting experience in the Bass Strait region among many other major international projects.

Supplier	Technip FMC
Location	Perth, WA
Website	www.technipfmc.com
Categories	Engineering, Procurement and Construction (EPC)
Contract capacity	\$50,000,000+
Overview	Employing over 20,000 people, TechnipFMC is a global energy technology provider to the traditional and new energy industries, delivering fully integrated projects, products, and services. Technip FMC's Australian operations are based in Perth, and employ around 250 people across all project delivery disciplines including designing, engineering, building and installing high specification subsea architecture. Technip FMC personnel are experienced in operating a fleet of vessels in Australia while meeting regulatory requirements. TechnipFMC also designs and manufactures HV cables in its facility in the UK.
Key clients	Woodside, Chevron, Shell
Relevant experience	Recent Engineering, Procurement, Construction and Installation (EPCI) projects performed in Australia include: <ul style="list-style-type: none"> • Woodside Pluto PL-08 Tie-back, (Pluto Field, Australia) – Subsea EPCI • Woodside Lambert Deep/GWF3, NWS Australia – Subsea EPCI • Chevron Gorgon Stage 2, NWS Australia – Subsea transport and installation.

Supplier	Sapura Energy
Location	Perth, WA
Website	www.sapuraenergy.com
Categories	EPC services
Contract capacity	\$50,000,000+
Overview	Sapura Energy Australia is part of Sapura Energy Berhad, a global integrated energy services and solutions provider operating across the entire upstream value chain. Sapura Energy Australia has had a presence in Perth over more than two decades. The Group's spectrum of capabilities covers exploration, development, production, rejuvenation, decommissioning and abandonment, as well as renewables. Sapura Energy Berhad's engineering and construction business provides end-to-end turnkey engineering, procurement, construction, installation and commissioning (EPCIC) solutions to clients in the oil and gas industry. With support from its in-house engineering team, fabrication yard, strategic assets and capability in subsea, transportation and installation of structure and pipelines, Sapura Energy delivers high-quality products across the full EPCIC spectrum – including installation activities for offshore platforms, submarine pipelines, subsea umbilicals, risers and flowlines, decommissioning, floaters, renewables and onshore modules. With a highly skilled and technically capable workforce, strategic world-class assets, and strong project management capabilities, Sapura Energy Berhad delivers integrated solutions and expertise in over 20 countries.
Key clients	Yunneng Wind Power Company, KPOC, Bechtel International
Relevant experience	Sapura Energy has been awarded the contract for the transportation and installation of offshore wind turbine sub-structures for the Yunlin Offshore Wind Farm in Taiwan.

Supplier	Kuiper Australia
Location	Applecross, WA
Website	https://kuiper-group.com
Categories	Labour hire
Contract capacity	\$50,000,000+
Overview	<p>Kuiper Group is a global provider of diverse, fully integrated human resources and recruitment solutions to the energy industry, with a track record in serving some of the world's biggest projects and companies. For over 20 years it has successfully connected people to energy projects across the globe.</p> <p>Kuiper Group's focus is to deliver market leading recruitment, selection and crewing services to companies throughout the energy sector supply chain. Its geographic coverage allows it to combine local knowledge with global quality systems. It is agile, proactive, and will partner with clients and candidates to operate and innovate in new sectors or geographic regions.</p> <p>Services provided include:</p> <ul style="list-style-type: none"> • Offshore labour hire for construction, maintenance, hook-up and commissioning • Supply of supervision, craft labour, trades labour and rope access • Support for onshore fabrication of subsea equipment and load out.
Key clients	Subsea 7, Sapura Energy, Technip, Allseas, Hereema, Van Oord, McDermott, Woodside, ExxonMobil
Relevant experience	Since 2012, Kuiper Group has worked on most of the major oil and gas projects in WA.

Supplier	Boskalis
Location	West Perth, WA
Website	www.boskalis.com
Categories	Marine construction
Contract capacity	\$50,000,000+
Overview	<p>Boskalis provides marine construction services specialising in offshore wind projects, including the transportation and installation of:</p> <ul style="list-style-type: none"> • Geophysical and Geotechnical Surveys • Seabed preparation and scour protection • Fixed offshore wind farm foundations and transition pieces • Subsea cables – array and export • Subsea cables – landfalls • Subsea cables – stabilisation with rock • Offshore substation sub-structures • Offshore substations.
Relevant experience	<p>Boskalis has been involved in the construction of more than 100 offshore wind projects, including:</p> <ul style="list-style-type: none"> • Offshore wind farm monopile and transition piece transport and installation, Veja Mate • Transport and installation of 70 foundations on Wikinger offshore wind farm • Wind farm foundation installation, West of Duddon Sands • Offshore installation, SylWin Alpha converter station upside • Transport and installation, Dolwin Beta HDVC platform.

Photo courtesy of BlueScope Distribution

Supplier	BlueScope Distribution
Location	16 sites nationally around Australia
Website	www.bluescopedistribution.com
Categories	Steel
Contract capacity	\$50,000,000+
Overview	<p>BlueScope Distribution is a leading steel and aluminium distributor for the domestic Australian and New Zealand markets, as well as offering export services internationally as part of the broader BlueScope group.</p> <p>BlueScope has 16 sites nationally including its National Product, Processing and Solutions Hub which helps customers deliver significant projects Australia-wide. Servicing customers supporting a wide range of projects, BlueScope can provide a diverse range of high quality steel and aluminium products, complex processing, project management services and national supply chain solutions.</p> <p>The Australian BlueScope operations incorporate the following facilities:</p> <ul style="list-style-type: none"> • Port Kembla Steelworks, an integrated steelmaking operation with an annual production capacity of approximately 2.6 million tonnes of crude steel. Port Kembla Steelworks is the largest manufacturer and supplier of flat steel in Australia by volume and manufactures slab, hot rolled coil and plate products • Two metallic coating and painting facilities located in Springhill, New South Wales and Western Port, Victoria • Steel painting facilities in Western Sydney, New South Wales, and Acacia Ridge, Queensland.
Key clients	BlueScope Distribution's key industry segments include: renewable energy, defence, farming and agriculture, infrastructure, marine, manufacturing, mining, oil, gas, leisure and recreation, non-residential building, residential building and transport.
Relevant experience	Large-scale projects with Keppel Prince Engineering and Wilson Transformers.

Bhagwan Marine (BM) is Australia’s largest privately owned and operated marine provider. It has a national footprint, servicing the east coast, west coast and Northern Territory. BM commenced in 1995 in Geraldton, Western Australia, with only a handful of vessels. Since then, BM have grown to now have about 120 vessels and employ about 700 personnel.

Locally, BM is the current contract holder of the Port of Melbourne and Ports Victoria Marine Maintenance contracts, and service the local offshore operators.

In recent years, BM has supported several major projects including the remediation of the Point Wilson Armament Jetty for Department of Defence, and the Ship Loader and Berth replacement for BHP Mitsui Alliance; and has commenced the planning phase for the decommissioning of Thevenard Island oil and gas infrastructure for Chevron.

BM is investigating new autonomous underwater vehicles for the assessment of marine infrastructure both offshore and ports/ maritime.

Offshore wind opportunity

Category:

- Offshore services
- Vessel and crewing
- Vessel construction and management
- Subsea and diving services

Project phase: Construction/operations/ decommissioning

Experience and capability

- The offshore wind industry will require services through all project phases, including:
 - Marine surveys and ongoing monitoring
 - Vessel services and crewing
 - Vessel construction and management
 - Subsea/diving services.
- BM is a local marine provider with experience in offshore projects while also supporting/creating new marine employment opportunities.
- BM has existing relationships with local contractors and suppliers and employment providers to scale and tailor services to the projects demands.

Barry Beach Marine Terminal (photo courtesy of South Gippsland Shire Council)

Supplier	Qube Energy
Location	Sydney, NSW
Website	www.qube.com.au
Categories	Port operations/logistics
Contract capacity	\$50,000,000+
Overview	<p>Qube is the largest port facility manager and operator in Australia and New Zealand, as well as a provider of import/export supply chain logistics services. It is expert in developing and constructing port facilities and supply bases to suit clients’ projects and cargo profiles.</p> <p>Qube specialises in offshore energy projects, with supply bases servicing oil and gas operations around Australia for ExxonMobil, Chevron, Shell, Santos and Woodside.</p> <p>Qube manages and operates the Barry Beach Marine Terminal (BBMT) under a long-term lease with Esso Australia, and can deliver state-of-the-art facilities at BBMT for offshore wind projects in Gippsland.</p> <p>Services Qube offers include:</p> <ul style="list-style-type: none"> • Full port management services • Port operational services, including stevedoring, warehouse and laydown • Full range of port equipment – SPMT, mobile harbour cranes, reach stackers, forklifts • Experienced labour.
Key clients	ExxonMobil, Chevron, Shell, Santos, Woodside
Relevant experience	<p>Management of BBMT – Esso outsourced 100% management, leases and operations to Qube, including:</p> <ul style="list-style-type: none"> • 24-hour, seven-day access to all services required • Supply base services • Supply base labour for all materials handling at facility • Materials management – receive items, inventory control, pack/unpack containers, storage of equipment in assigned areas • Supply of external lay down, materials handling/processing area • Supply and management of internal storage, handling/processing area and pallet racks • Management and maintenance of all assets at BBMT, including fuel farm, power and utilities, Glycol Plant, warehouses and buildings, all land surfaces.

Supplier	Clarksons
Location	Perth, WA
Website	www.clarksons.com
Categories	Marine services
Contract capacity	\$50,000,000+
Overview	<p>Clarksons offshore renewables team provides offshore vessel chartering, ship building, offshore logistics and strategic marine advisory services. Supporting all vessel types and all offshore energy sources, it can support all stages and sizes of offshore renewables projects.</p> <ul style="list-style-type: none"> • Brokering <ul style="list-style-type: none"> – Supply chain logistics specialist – Marine supply chain experts. • Transport and Installation <ul style="list-style-type: none"> – Consultancy and advisory service – Project heavy lift, transport and installation brokerage – Foundation fabrication and transport scenario analysis – Dedicated installation project analysis – Full EPC and multi-contracting strategic support. • Marine Advisory <ul style="list-style-type: none"> – EPCI and operations and maintenance strategy advisory – Vessel supply chain and procurement – Market Intelligence and Research in collaboration with Clarksons Research.
Relevant experience	<p>Clarksons has led the offshore wind market since its first project – Greater Gabbard Offshore Wind Farm – almost 20 years ago and continues to push the boundaries of the sector with the launch of its new Advisory, Intelligence and Research consultancy.</p> <p>By leveraging the synergies across the business, it can offer logistical and strategic support for offshore renewables projects.</p>

Supplier	MMA Offshore
Location	Perth, WA
Website	www.mmaoffshore.com
Categories	Marine services
Contract capacity	\$50,000,000+
Overview	<p>MMA Offshore services the wider offshore energy and maritime industries both nationally and internationally with experience delivering a wide range of work scopes in multiple regions.</p> <p>MMA Offshore specialises in providing high-quality specification vessels and a comprehensive suite of marine solutions including:</p> <ul style="list-style-type: none"> • Vessel services • Project logistics • Subsea services • Technical marine expertise.
Key clients	Santos, Beach Energy, Australian Hydrographic Office (AHO), Fugro, INPEX, Cooper Energy
Relevant experience	<ul style="list-style-type: none"> • Provision of remotely operated vehicle (ROV) Services for Cooper Energy (Bass Strait) • Vessel positioning services for Seven Group Holding (Bass Strait) • Hydrographic survey services for AHO (Bass Strait) • Geotechnical survey and environmental scientist and infauna testing for Beach Energy (Bass Strait).

The Fugro Mariner undertook offshore geotechnical investigations for Star of the South in 2023 (photo courtesy of Fugro)

Supplier	Fugro
Location	Perth, WA
Website	www.fugro.com
Categories	Marine geophysical and geotechnical investigations and testing
Contract capacity	\$500,000 to \$50,000,000+
Overview	Fugro is a leading geo-data specialist. It supports clients in managing project risk throughout the project lifecycle during the planning, construction, and operation of their assets, both on land and within the marine environment.
Key clients	Woodside Energy, INPEX Australia, Australian Hydrographic Office, Star of the South
Relevant experience	<p>Fugro has more than 30 years' local experience supporting both offshore and onshore projects in Australia throughout the project development activities, including initial feasibility studies, engineering design and advice, construction, operations and maintenance.</p> <p>Fugro has been actively involved in most of the Australian offshore oil and gas developments. It is a leading participant in the national hydrographic survey program and is increasingly focussed on Australia's renewables future, including offshore wind and green hydrogen.</p>

Photo courtesy of Atlas Professionals

Supplier	Atlas Professionals
Location	West Perth, WA
Website	www.atlasprofessionals.com.au
Categories	Labour hire
Contract capacity	\$50,000,000+
Overview	<p>Atlas Professionals is a specialist labour hire company and provider of logistics support, offering borderless offshore solutions to the global marine, energy, and renewable sectors.</p> <p>Atlas Professionals employs personnel in Australia and New Zealand, supporting its clients with the full recruitment and crewing cycles on many of the biggest energy projects in the world.</p> <p>Atlas Professionals is in a unique position as Australia transitions to offshore wind. Locally, it has been contracted to support all the major offshore energy projects.</p> <p>Atlas Professionals has a highly skilled team with specialist areas including:</p> <ul style="list-style-type: none"> • Industrial Relations (including Enterprise Agreements negotiation and set up) • Human resources • Recruitment • Compliance • Training • Aboriginal and Torres Strait Islander engagement • Catering services • Crewing • Logistics • Vessel management. <p>This experience, combined with its international experience as a leading provider to the offshore wind sector in the USA, Taiwan and Europe means Atlas Professionals is well positioned to support offshore wind in Australia.</p>
Key clients	Star of the South, Ostenjso Rederi – Edda Accommodation, Floatel International, FTAI Offshore, Roll Group, Heerema Marine Contractors, Solstad, Boskalis, PACC Offshore Services Holdings Pte. Ltd (POSH).
Relevant experience	In Australia, Atlas Professionals has provided offshore personnel to all major offshore energy projects, including projects in Bass Strait. Internationally, a third of its business services the offshore wind sector.

Supplier	DOF Subsea
Location	Perth, WA
Website	www.dof.com
Categories	Offshore logistics
Contract capacity	\$50,000,000+
Overview	<p>DOF Subsea, established in the Asia-Pacific region in 2005, is part of the larger multinational DOF ASA, a Norwegian-based marine services company with some 1,370 subsea professional employees worldwide and 26 owned and operated subsea offshore vessels within the oil and gas sector.</p> <p>DOF Subsea routinely delivers subsea projects through its integrated offshore services, offering subsea engineering and offshore marine services complimented by regional and global experience in offshore operations.</p> <p>Underpinning DOF Subsea is a fleet which is owned and managed by an in-house team of experienced, vessel-familiar marine and construction personnel.</p> <p>DOF Subsea's main service business lines include:</p> <ul style="list-style-type: none"> • Project management and engineering • Supply chain management • Marine vessel ownership and management • Geophysical, Benthic, geotechnical and geomatics services • Construction and installation services • Vessel Walk to Work Services • Moorings Installation • EPCI/Subsea, Umbilicals, Risers and Flowlines (SURF) • Cable Laying Installation • Diving services • Anchor Handling Tug (AHT) and Platform Supply Vessel (PSV) services.
Key clients	Equinor, Woodside Energy, Beach Energy, Shell and Santos
Relevant experience	DOF Subsea has recently completed the installation of the Hywind Tampen Wind Farm for Equinor in Norway, supplying project management and engineering services for the project along with specialist vessels for moorings Installation and tow-out and hook-up of the floating wind turbines in field.

Supplier	Tasmanian Shipping Supplies
Location	Hobart, TAS
Website	www.tassshipping.com.au
Categories	Shipping supplies
Contract capacity	\$2,000,000 to \$5,000,000
Overview	<p>Tasmanian Shipping Supplies is an ISO 9001:2015 Quality and Hazard Analysis Critical Control Points (HACCP) Food Safety certified company. It specialises in all aspects of ship supply and service, providing the entire range of provisions, cabin, safety and technical stores, including:</p> <ul style="list-style-type: none"> • Provisions – dry, frozen and fresh • Bunkers, chemicals and oils • Fire-fighting apparatus • Life-saving equipment • Deck and engine stores • Medical stores • Pyrotechnics • Electronics.
Key clients	Cargo and bulk carriers, cruise ships, research vessels, offshore support vessels, Antarctic re-supply vessels, naval ships and submarines, fishing trawlers and offshore rigs.
Relevant experience	Tasmanian Shipping Supplies has supported many operations in Bass Strait including Star of the South's offshore geotechnical investigations carried out by Fugro.

Supplier	Jan De Nul
Location	Perth, WA
Website	www.jandenul.com
Categories	Offshore Contractor
Contract capacity	\$50,000,000+
Overview	<p>Jan De Nul is an experienced contractor for engineering, procurement, construction and installation scopes of offshore wind farm developments. With a versatile fleet of offshore installation vessels, it is focussed on transport and installation scopes and can deliver engineering, procurement, construction and installation scopes when required.</p> <p>With heavy lift and cable installation vessels, combined with its dredging and rock installation vessels, Jan De Nul offers services that are tailor made for this market. These services include:</p> <ul style="list-style-type: none"> • Transport and installation of foundations for offshore wind projects • Transport and installation of wind turbines for offshore wind projects • Scour protection • Seabed preparation • Installation of subsea power cables and umbilicals • Offshore trenching.
Key clients	Taiwan Power Company, Vineyard Wind, Ørsted, Vestas, RWE, SSE, Equinor, Vattenfall
Relevant experience	<p>Jan De Nul has been involved in numerous offshore wind projects internationally, including:</p> <ul style="list-style-type: none"> • Dogger Bank A (DBA), Dogger Bank B (DBB), Dogger Bank C (DBC) • Taiwan Power Company Offshore Wind Farm Phase 1 Project • Vineyard Wind 1 (USA) • Vesterhav (Denmark) • Godewind O3 and Borkum Riffgrund O3 (Germany) • Lightning Project (Abu Dhabi) • Greenlink Interconnector (UK/Ireland).

Supplier	Richardson Devine Marine
Location	Hobart, TAS
Website	www.rdm.com.au
Categories	Boat builder, Crew Transfer Vessels, Service Operation Vessels
Contract capacity	\$25,000,000
Overview	Richardson Devine Marine (RDM) is located in Hobart, Tasmania and has been building Aluminium Commercial Vessels (20m–50m) since 1989.
Key clients	NSW Government, Azam Marine, Offshore Unlimited, World Heritage Cruises, Sealink
Relevant experience	<p>RDM has built 80 commercial aluminium vessels constructed from 12m–53m in length, comprising:</p> <ul style="list-style-type: none"> • OSVs (24m–35m) • Fast passenger ferries • Overnight luxury cruise vessels • Work barges.

Photo courtesy of Incat Crowther

Supplier	Incat Crowther
Location	Belrose, NSW
Website	www.incatcrowther.com
Categories	Vessel design, Crew Transfer Vessels, Service Operation Vessels
Contract capacity	\$20,000,000 to \$50,000,000
Overview	Incat Crowther’s team of engineers and innovators provide design, build and consulting services for specialised ships. As a Digital Shipbuilder, Incat Crowther has the versatility to provide multiple design and construction solutions.
Key clients	Farra Offshore, NOS, Windea, Seacor, Ørsted, Surewind, MMS, Offshore Unlimited and others.
Relevant experience	Incat Crowther has designed and arranged for construction of numerous Crew Transfer Vessels for offshore wind and is the only company in Australia with a track record in designing these type of vessels. Its vessels are in operation in the UK, Europe, Taiwan, Japan and are under construction in the US, Europe and Asia.

Photo courtesy of Incat

Supplier	Incat
Location	Hobart, TAS
Website	www.incat.com.au
Categories	Boat builder, Crew Transfer Vessels, Service Operation Vessels
Contract capacity	\$50,000,000+
Overview	<p>With a workforce of over 400, Incat is a builder of large (100+ metre) and small (24 metre) ropax/pax only ferries and offshore support vessels.</p> <p>Incat has been in continuous operation for 50 years. It has 77,000m² of covered construction halls, two covered drydocks, two slipways and over 180m of wharf space.</p>
Key clients	<ul style="list-style-type: none"> • Port Authority of Trinidad and Tobago • Transport for NSW • Armas • Molslinein • Caspian Marine Services • Buquebus • Virtu Ferries.
Relevant experience	<p>Incat is a world leader in design and construction of lightweight aluminium transport solutions and is currently building the world's largest zero emission ferry.</p> <p>It has delivered over 80 vessels, including 52 vessels in excess of 70 metres length overall (LOA).</p>

Supplier	Oceaneering
Location	Jandakot, WA
Website	www.oceaneering.com
Categories	Advanced technology provider
Contract capacity	\$50,000,000+
Overview	<p>Founded in 1964, Oceaneering is an advanced applied technology provider operating at the forefront of subsea, terrestrial and space exploration.</p> <p>Its products and services include the following:</p> <ul style="list-style-type: none"> • Remotely operated vehicles (ROVs) • Marine coordination • Offshore communications • Remote operation centres • Subsea tooling • Decommissioning • Dynamic inter-array power cables • Subsea survey • Topside and subsea balance of plant • Floating offshore wind mooring systems • Automated passive acoustic marine mammal monitoring systems • Suction anchors • Front-End Engineering Design (FEED) studies • Scour protection • Vessels and non-destructive testing (NDT).
Key clients	Moray Offshore Wind Farm, Wave Energy Scotland, Yunlin Offshore Wind Farm
Relevant experience	Moray Offshore Wind Farm (Scotland) – Boulder removal support, anchor positioning checks deployments and recoveries, multi-beam surveys, sound velocity probing, as-left surveys.

Supplier	Subsea Technology and Rentals Australia
Location	Lansdale, WA
Website	www.str-subsea.com
Categories	Subsea electronic equipment sale and rental
Contract capacity	\$2,000,000 to \$5,000,000
Overview	<p>Subsea Technology and Rentals (STR) is a global supplier of subsea electronic equipment for sale or rental. Equipment offerings typically relate to geophysical survey, positioning, remotely operated vehicles (ROVs), environmental and metocean segments.</p> <p>STR have a local branch in Perth to support Australian projects, with a local stock of equipment available for rental, and in-house engineers to support and maintain this equipment in both the workshop and the field.</p> <p>STR also has an operating branch in Singapore, able to support contractor mobilisations from elsewhere in the Asia-Pacific region to maximise efficiency of logistics.</p> <p>STR's clients range from operators through to contractors at various tiers in the supply chain.</p> <p>STR is currently supporting wind projects in Europe, USA and Asia and actively supporting contractors bidding for the emerging work in Australia.</p>
Key clients	STR has provided equipment to contractors, for early geophysical and environmental surveys for the Star of the South project.
Relevant experience	Globally, STR supports contractors working on offshore wind projects ranging from initial geophysical site investigations, UXO surveys, environmental and metocean surveys, installation support, cable lay and burial, and operations and maintenance.

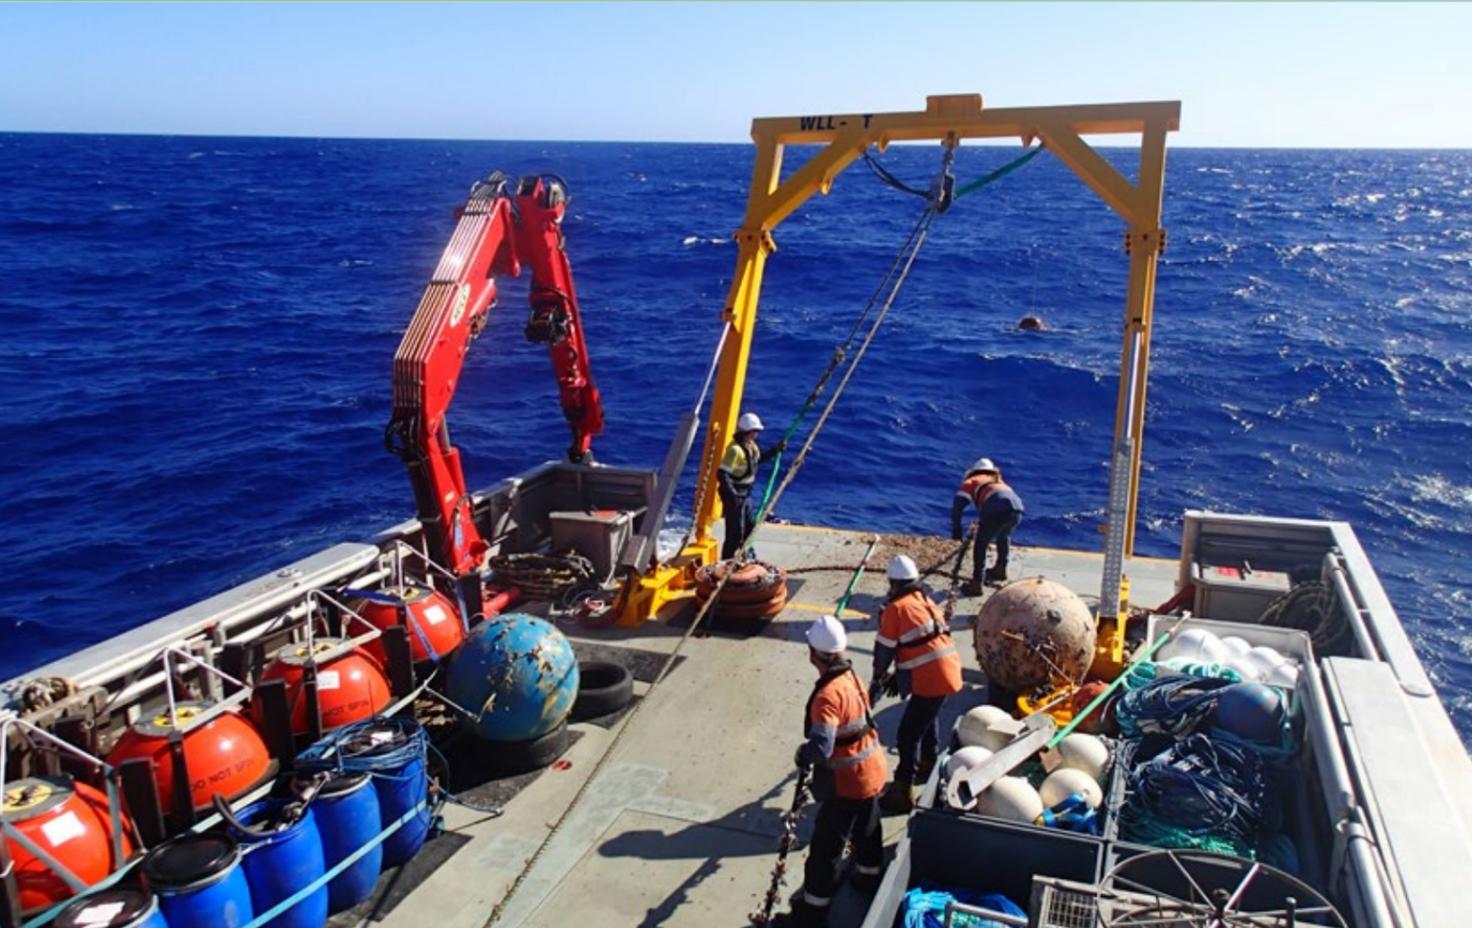

Photo courtesy of Offshore Unlimited

Supplier	Offshore Unlimited
Location	Hobart, TAS
Website	www.offshoreunlimited.com.au
Categories	Offshore logistics (marine survey vessel support operations, crew transfer operations, equipment transfer operations)
Contract capacity	\$5,000,000 to \$10,000,000
Overview	<p>Offshore Unlimited is an Australian owned and operated company that commenced operations in 2007. Its fleet of offshore support vessels operate from the ports service Australia's maritime needs, including oil and gas, science, aquaculture, construction, renewable energy and survey.</p> <p>Offshore Unlimited provides a comprehensive range of offshore services including:</p> <ul style="list-style-type: none"> • Offshore installation re-supply • Survey • Seismic ship re-supply • Standby, dive and ROV support • Crew transfer, scientific research, and chase boat services.
Relevant experience	<p>Offshore Unlimited has experience across the following services:</p> <ul style="list-style-type: none"> • Marine survey vessel support operations: hydrographic surveys, remotely operated vehicle (ROV) surveys, dive support operations • Crew transfer operations: personnel movements between facilities and shore • Equipment transfer operations: equipment movements between facilities and shore.
