About the poll

These results are based on a survey of 1,001 Massachusetts residents. Responses were collected via online survey interviewing April 4 - 17, 2024. The data were weighted to reflect known and estimated population parameters for race, age and gender, education, geography, and political party. Population targets were based on 5-year estimates from the American Community Survey. Party identification was estimated using MPG survey data. The credibility interval for this survey is +/- 3.4 percentage points for the entire sample, including the design effect. All surveys are potentially subject to non-sampling error. This project was conducted by The MassINC Polling Group.
