Michael Krauss, Professor emeritus of Linguistics at the University of Alaska and the founding director of the Alaska Native Language Center, is profiled in a feature article in the current issue of The New Yorker (June 6, 2005). The article, "Last Words," by Elizabeth Kolbert, focuses on Krauss's documentation of Eyak. It is extraordinarily well written, and the Eyak forms that Kolbert cites are transcribed with punctilious accuracy.

"Each language is a unique repository of facts and knowledge about the world that we can ill afford to lose," Krauss tells Kolbert. "Every language is a treasury of human experience. Eyak doesn't give a damn about tenses. But it sure does give a damn about other things, much more than I do."
223.2 ALT Posts Overviews of Recent Grammars

From Peter Bakker (linpb@hum.au.dk) 13 May, 2005:

The Association for Linguistic Typology (ALT) has been publishing lists of recent grammars and other useful typological studies in their newsletter since 2000. This information has now been brought together on a webpage that can be found at:

http://www.lancs.ac.uk/fss/organisations/alt/grammarwatch.pdf

The list covers 49 pages. Pages 22 to 27 list the grammars of Amerindian languages, both South and North, with publication information. Not all SSILA members may be aware of this, and may profit from this useful initiative.

If you know of a 21st century grammar that is missing, you can send a note to the coordinator of the "grammar watch", Frans Plank (frans.plank@uni-konstanz.de). Reviews of grammars, written from a typological perspective, are also welcome for the journal Linguistic Typology, of which Frans Plank is the editor. Contact him if you are interested.

* Ph.D. scholarships in grammatical description (LaTrobe U, Australia)

From Alexandra Aikhenvald (A.Aikhenvald@latrobe.edu.au) 2 June 2005:

The Research Centre for Linguistic Typology at La Trobe University in Melbourne, Australia, invites applications from suitably qualified students to enter the PhD program.

Our Ph.D. candidates generally undertake extensive fieldwork on a previously undescribed (or scarcely described) language and write a comprehensive grammar of it for their dissertation. They are expected to work on a language which is still actively spoken, and to establish a field situation within a community in which it is the first language. They normally undertake a first fieldtrip of 9 to 12 months and, towards the end of their course, a follow-up fieldtrip of 2 to 3 months. Fieldwork methodology should be centred on the collection, transcription and analysis of texts, together with participant observation, and -- at a later stage -- judicious grammatical elicitation in the language under description (not through the lingua franca of the country). Our main priority areas are the languages of Amazonia and the Papuan and Austronesian languages of New Guinea. However, we do not exclude applicants who have an established interest in languages from other areas.

Ph.D.s in Australian universities generally involve no coursework, just a substantial dissertation. Candidates must thus have had a thorough coursework training before embarking on this Ph.D. program. This should have included courses on morphology, syntax, semantics, phonology and phonetics, and comparative-historical linguistics, taught from a non-formalist perspective. We place emphasis on work that has a sound empirical basis but also shows a firm theoretical orientation (in terms of general typological theory, or what has recently come to be called basic linguistic theory).

The scholarship will be at the standard La Trobe University rate, Aust. $18,000 per year. Students coming from overseas are liable for a visa fee (effectively, a tuition fee); we will pay this. A small relocation allowance may be provided on taking up the scholarship. In addition, an appropriate allowance will be made to cover fieldwork expenses. The scholarship is for three years.

It is easier for them to identify the event that way.
