OBITUARY

John Gage Allee, Jr (1918-1987)
John G Allee, Professor of English Emeritus at George Washington University, Washington, DC, and a member of SSILA since its inception, died from the complications of a heart attack on January 1, 1987. He was 68 years old and had only recently retired from a distinguished career as teacher and administrator at GWU. Awarded his doctorate at Johns Hopkins in 1955, Jack Allee was first and foremost a Germanic philologist, specializing in onomastics and Old Icelandic. Fascination with the Scandinavian north ultimately led him to Greenland, which after about 1965 became his major research interest. He visited Greenland frequently, and in later years he and his first wife, Harriet, maintained a regular summer residence in Godthaab. Jack spoke Greenlandic fluently and was well known in the Greenlandic literary community; at the time of his death he was at work on an English translation of the first Greenlandic novel, Mathias Storch's Sinnattugaq. Jack will be missed by his devoted students and his many friends, not least by the Editor of this Newsletter, who had the privilege of being his colleague for two decades. (VG)

Bloomfield Centenary Commemorated

The 100th anniversary of Leonard Bloomfield's birth (on April 1, 1887) was marked by the publication of a volume of essays, Leonard Bloomfield: Appraisals of his Life and Work (edited by Robert A Hall, Jr.), as a special issue of the journal Historiographia Linguistica. The contents range from anecdotal reminiscences of Bloomfield's personality and dry wit (which seems at times to have bordered on the Thurberesque) to detailed critical evaluations of his work. The essays in the volume include: Leon M Despres, "My Recollections of Leonard Bloomfield"; Frances Clarke Sayers, "The Small Mythologies of Leonard Bloomfield"; J Milton Cowan, "The Whimsical Bloomfield"; C F Hockett, "Letters from Bloomfield to Michelson and Sapir"; Robert A Hall, Jr., "Bloomfield the Man"; Henry M Hoenigswald, "Bloomfield and Historical Linguistics"; David E Rogers, "The Influence of Panini on Leonard Bloomfield"; William G Moulton, "Bloomfield as Dialectologist"; Robert A Hall, Jr., "Bloomfield and Semantics"; Winfred P Lehmann, "Bloomfield as an Indo-Europeanist"; John U Wolff, "Bloomfield as an Austroasiatican"; and Ives Goddard, "Leonard Bloomfield's Descriptive and Comparative Studies of Algonquian". Also included is a complete bibliography of Bloomfield's writings, compiled by Hockett and Hall. (For summaries of the papers dealing with Bloomfield's work on American Indian languages, see In Current Periodicals below.)

Bloomfield's centenary will also be celebrated with a special session at this year's Conference on American Indian Languages (Chicago, November 18-22). Entitled "A Bloomfield Bouquet", the session will include papers by William Cowan, Amy Dahlstrom, Ives Goddard, Eric P Hamp, Roy D Iutzki-Mitchell, and Richard A Rhodes and David Costa. (The full schedule of the 1987 CAIL will be published in the September issue of the SSILA Newsletter).

Plains-SW Language Center Established at U of Colorado

A new center for the study of the Native American languages formerly and presently spoken in the Plains and Southwest has just been established in the D of Linguistics at the U of Colorado, Boulder. The official name of the unit is The Center for the Study of the Native Languages of the Plains and Southwest (CSNLPS; Cesnalps). Funding for the Center is expected to be in the form of grants to members of the Center for specific projects in such areas as lexicography, grammatical description, and language maintenance, as well as the histories of the languages and language families in these areas. In addition to sponsoring research, Cesnalps will also host conferences and symposia, bringing together scholars working in related areas within the Center’s field of interest. Members of the Center will be all faculty and graduate students at the U of Colorado who are working, or eventually expect to work, on any of the Plains or Southwestern languages. Other persons, such as visiting faculty, can also be appointed to the Center. People who want to come to Colorado to work on a project supported by their own or outside funds can be appointed to the Center and receive Center support (space, computer access, etc.). Anyone interested in obtaining further information about Cesnals should contact the Director, Dr Allan R Taylor, D of Linguistics, U of Colorado, Boulder, CO 80309.

All Californianists will be interested in a recently published popular book, The Earth Is Our Mother: A Guide to the Indians of California, their Locales and Historic Sites, by Dolan H Eargle, Jr (Trees Company Press, 1986, 192pp, $11.95). Eargle, a chemist who teaches at City College of San Francisco, is the author of a number of books and articles on popular geography, and he knows how to do his homework. Despite the book's rather off-putting title, it is a thorough directory of the Indian lands of California, locating and describing over 150 reservations, rancherias, schools and health centers, and historical sites. Eargle fleshes out this gazetteer with literate travel essays, a brief (but well-informed) survey of California Indian cultures and languages, and a discussion of the problems facing Indians in contemporary California society. Appendices list missions, major land grants, military posts, museums with Indian collections, archaeological sites, and the general dates of festivals and dances. As books of this sort go, The Earth Is Our Mother is a superior job. Order from: Trees Company Press, 49 Van Buren Way, San Francisco, CA 94131.
The 3rd annual interdisciplinary California Indian Conference has been definitely scheduled for October 16–18, 1987, in Santa Barbara. For further information, or to be placed on the mailing list, write: John Johnson, Santa Barbara Museum of Natural History, Santa Barbara, CA 93105.

RECENT PUBLICATIONS

A Guide to the World's Languages. Volume 1: Classification. Merritt Ruhlen. Stanford U Press, 1987. xxv + 433 pp. $45. (The first in a projected series of 3 volumes. The second volume (Data) will catalog linguistic and sociolinguistic information on many of the world's languages, and the third volume (Language Universals) will "survey the basic linguistic patterns that characterize human language". The series arises out of R's work on the Stanford Universals Project, and more specifically his close association with Joseph Greenberg. R devotes considerable space in the present volume to examining Greenberg's classificatory methods and defending them against the "hostility and misguided attacks" of "traditional scholars". Chapters include: "Genetic Classification: Principles and Methods"; "Europe"; "Africa"; "Asia"; "Oceania"; "North and South America"; "Prospects for Future Research"; and "Genetic Classification of the World's Languages". The areal chapters include surveys of previous classificatory work and selective bibliographies. The chapter on North and South America contains a worthwhile summary of classificatory work in the Americas (mainly N America) from the 17th century onward, with special attention to Eskimo-Aleut and Na-Dene. R follows Greenberg in lumping all other American languages into "Amerind", because "the inadequacies of more conservative classifications are so grievous, and Greenberg's evidence is so overwhelming" (p.229). Stanford has done a fine editorial job on this volume: it is beautifully typeset, with generous indices, numerous maps, and many helpful diagrams. What a pity it is essentially an extended polemic and so out of step with scholarly opinion. Order from: Stanford U Press, Stanford, CA 94305.)

Besides Herzog's own voluminous collection of American Indian and African songs (over 800 cylinders) it includes recordings made by Washington Matthews, Edward S Curtis, George Bird Grinnell, and, especially, by Franz Boas and his students and associates. Linguistic material is often interspersed with the song recordings. Nearly all of the cylinders have been transferred to tape and are available for research. Duke Language Toolkit and Duke Humanities Bulletin Board.

The Duke Language Toolkit (Jeffrey William Gillette, Humanities Computing Facilities, 104 Languages Building, Duke U, Durham, NC 27706; 919-684-3637) is a collection of programs designed to assist humanistic research in a variety of languages. Using the Language Toolkit one may design new fonts and display them on both on the computer display and with several supported printers. Required is a system that includes all of the following: (1) IBM PC, PC/XT, PC/AT, or true compatible; (2) Enhanced Graphics Adapter; (3) Graphics Memory Expansion Card (if EGA is 64K); (4) standard monochrome or Enhanced Color monitor (but not the standard Color Graphics monitor); and (5) a supported printer (currently Toshiba P351, IBM Proprinter, and Epson FX-80/85). Distribution of the Language Toolkit is non-commercial; it is available free of charge to interested scholars and institutions. Send 2 blank 5 1/4″ floppy diskettes and a stamped self-addressed mailer and Duke will return the Toolkit to you in 4-6 weeks.

Duke currently keeps no library of Toolkit-created fonts. However, users of the Toolkit (and all computer users in the humanities) with access to a modem are invited to share their results on the Duke Humanities Bulletin Board. Inaugurated on December 1, 1986, the Bulletin Board provides a medium for dissemination of public domain and specialized software of interest to the practicing humanist. It also provides a forum of the discussion of applications and research problems, and for informal reviews of new products. There is no subscription fee or per-session charge. The Bulletin Board is available at 919-684-3169 from 5 pm to 8 am (Eastern time) weekdays, and all day Saturday and Sunday. 1200 baud, 8 bits, no parity is recommended. For further information call 919-684-3637.
