KNOW YOUR RIGHTS

DID YOU KNOW?
The Americans with Disabilities Act and Rehabilitation Act mandate that patients with disabilities in need of hospital visits during COVID-19 can request reasonable modifications for care, which includes having a support person.

Despite the changes and additional restrictions created by COVID-19, hospitals and doctor’s offices must continue to make reasonable accommodations and modifications to policies where necessary.

This includes, but is not limited to:

01 Deaf and Deafblind patients, especially those who cannot benefit from video relay interpretation

02 Patients with mobility impairments

03 Patients who need in-person communication supports

04 Patients with psychosocial, intellectual, developmental, or cognitive disabilities who rely on in-person supports
