

DESOLV

DESCRIPTION:

Desolv is DSC's product designed to remove coffee, tea, and other tannin stains that leave behind a brown or yellow stain. While these stains are often tricky to remove with a general purpose cleaner, Desolv is packed with de-browning agents that will restore the brightness to carpets and fabrics after a spill. Use it as a spotter for single stains or as a prespray to tackle larger vending areas, break rooms, or coffee shops. In addition, Desolv can also be used on hard surfaces to remove rings and drips on countertops and tables.

DIRECTIONS:

For use as a spotter: Use as-is and apply directly to the stain. Use a tamping brush to agitate the area. Allow solution to set for 2 minutes before extracting. For very old set stains, use a steam iron brought to temperature with a clean cloth or paper towel kept moistened with Desolv. Turn towel to clean area and press every 15 to 20 seconds until stain is removed.

For use as a prespray: Dilute 1:20 (6 oz. per gallon) and spray at 100 sq ft. per gallon.

PACKAGING OPTIONS:

- 12/pts.
- 12/qts.
- 4/1 gal.

SPECIFICATIONS:

Appearance: Clear liquid

Odor: Citrus

pH: 3

Storage: Store at room temperature away from direct sunlight.

Freeze/Thaw: Will recover with warming.
