

PRESS-IT

DESCRIPTION:

Press-It is a fast acting, water based dye remover for common dyes and pigments used in everyday food and beverage items. It has no fumes or flammable solvents, making it safe to use in any environment. The water based solvents and chelators can quickly remove stains from grape juice, food coloring, Kool Aid, wine, soda, and much more. Press-It can even be used on hard surfaces such as whiteboards and countertops.

DIRECTIONS:

For light staining on carpet and fabric: Apply Press-It directly onto the stain and use a brush or bone knife to work into the fabric. Take a damp, clean towel and gently blot up the stain onto the towel. Rinse area and extract.

For heavier, more set-in stains: Heat a steam iron to high heat. Soak the stain with Press-It. Once iron comes to temperature, place a damp, clean towel onto the stain and press the iron onto the towel. Press the towel for up to 20 seconds, then shift the towel to a clean area before pressing again. Be sure to keep the towel and carpet damp with Press-It and repeat process until stain is removed. Once there is no more transfer from the stain to the towel, rinse and extract.

For hard surfaces: Apply Press-It onto a rag or piece of cloth and wipe the surface to be cleaned. Use a circular motion and turn the cloth or rag frequently to avoid smearing dyes or pigments.

PACKAGING OPTIONS:

- 12/pts.
- 12/qts.

SPECIFICATIONS:

Appearance: Clear liquid

Odor: Characteristic

pH: 7-9

Storage: Store in well-closed containers away from direct sunlight.

Freeze/Thaw: Will recover
