**BUILDING THROUGH
INNOVATION & SUSTAINABILITY**

**PRODUCT
BROCHURE**

Nicsons Building Products are leading manufacturers and suppliers of waffle pod slab and steel packages.

1090MM WAFFLE POD THICKNESSES

150mm, 150mm (solid pod),
225mm, 300mm

ADVANTAGES OF WAFFLE POD SLAB SYSTEMS

- Easily shaped and therefore adaptive to all slab dimensions and service penetrations.
- The only formally recognised void former system under Australian Standards (AS2870-2011 Residential slabs and footings).
- 100% recyclable materials.
- Cost effective – achieved by reducing number of concrete cubic metres required and simplifying the installation process.
- 100% Australian made.
- Lightweight for safe handling and installation.
- Improved energy efficiency created through insulation voids.

WAFFLE POD SLAB ACCESSORIES

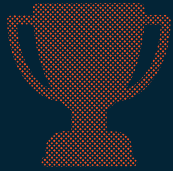

Nicsons Building Products offers a comprehensive range of plastic accessories – each product is tested as per AS/NZS 2425:2015 Bar chair in reinforced concrete – Product requirements and test methods.

| 1W110 | 1 Way Spacer 110mm | 20 | 2640 | 60 |

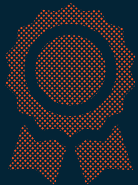

Why Choose Nicsons Building Products?

INDUSTRY-LEADING TECHNOLOGY

The machinery utilised in our factories have been sourced from the world's most recognised brands in plastics and polystyrene manufacturing. Our world class production facilities provide absolute certainty that each product is created to the highest standard.

QUALITY ASSURANCE

Our commitment to our customers begins with providing unparalleled quality in our polystyrene and plastic products. We conduct ongoing testing on our building materials to ensure that we exceed the strength and compression requirements of all Australian Standards.

100% AUSTRALIAN MADE PACKAGE

Nicsons Building Products offers a complete package for waffle pods, steel reinforcement and plastic accessories. We offer our customers Australian made building materials and premium Australian steel.

LOGISTICAL EFFICIENCY

We are capable of providing Just-in-Time (JIT) service for our customers. With an extensive fleet of delivery trucks and highly efficient production technology, we are able to deliver materials as required by our customers on site.

SUSTAINABLE BUILDING MATERIALS

Our manufacturing and reprocessing cycle is a sustainable solution for customers looking to manage their carbon footprint. Our polystyrene products are 100% recyclable and our solar powered factories will reprocess all scrap wastage collected from our customers.

COMPLEMENTARY ESTIMATING

We offer our customers a complementary estimating service – using structural engineer drawings, we conduct thorough takeoffs of each unique job's requirements. This service assists customers in avoiding unnecessary costs and allows us to uphold our commitment to minimising wastage.
