## Acerca de este libro

Esta es una copia digital de un libro que, durante generaciones, se ha conservado en las estanterías de una biblioteca, hasta que Google ha decidido escanearlo como parte de un proyecto que pretende que sea posible descubrir en línea libros de todo el mundo.
Ha sobrevivido tantos años como para que los derechos de autor hayan expirado y el libro pase a ser de dominio público. El que un libro sea de dominio público significa que nunca ha estado protegido por derechos de autor, o bien que el período legal de estos derechos ya ha expirado. Es posible que una misma obra sea de dominio público en unos países y, sin embargo, no lo sea en otros. Los libros de dominio público son nuestras puertas hacia el pasado, suponen un patrimonio histórico, cultural y de conocimientos que, a menudo, resulta difícil de descubrir.
Todas las anotaciones, marcas y otras señales en los márgenes que estén presentes en el volumen original aparecerán también en este archivo como testimonio del largo viaje que el libro ha recorrido desde el editor hasta la biblioteca y, finalmente, hasta usted.

## Normas de uso

Google se enorgullece de poder colaborar con distintas bibliotecas para digitalizar los materiales de dominio público a fin de hacerlos accesibles a todo el mundo. Los libros de dominio público son patrimonio de todos, nosotros somos sus humildes guardianes. No obstante, se trata de un trabajo caro. Por este motivo, y para poder ofrecer este recurso, hemos tomado medidas para evitar que se produzca un abuso por parte de terceros con fines comerciales, y hemos incluido restricciones técnicas sobre las solicitudes automatizadas.
Asimismo, le pedimos que:

+ Haga un uso exclusivamente no comercial de estos archivos Hemos diseñado la Búsqueda de libros de Google para el uso de particulares; como tal, le pedimos que utilice estos archivos con fines personales, y no comerciales.
+ No envíe solicitudes automatizadas Por favor, no envíe solicitudes automatizadas de ningún tipo al sistema de Google. Si está llevando a cabo una investigación sobre traducción automática, reconocimiento óptico de caracteres u otros campos para los que resulte útil disfrutar de acceso a una gran cantidad de texto, por favor, envíenos un mensaje. Fomentamos el uso de materiales de dominio público con estos propósitos y seguro que podremos ayudarle.
+ Conserve la atribución La filigrana de Google que verá en todos los archivos es fundamental para informar a los usuarios sobre este proyecto y ayudarles a encontrar materiales adicionales en la Búsqueda de libros de Google. Por favor, no la elimine.
+ Manténgase siempre dentro de la legalidad Sea cual sea el uso que haga de estos materiales, recuerde que es responsable de asegurarse de que todo lo que hace es legal. No dé por sentado que, por el hecho de que una obra se considere de dominio público para los usuarios de los Estados Unidos, lo será también para los usuarios de otros países. La legislación sobre derechos de autor varía de un país a otro, y no podemos facilitar información sobre si está permitido un uso específico de algún libro. Por favor, no suponga que la aparición de un libro en nuestro programa significa que se puede utilizar de igual manera en todo el mundo. La responsabilidad ante la infracción de los derechos de autor puede ser muy grave.

## Acerca de la Búsqueda de libros de Google

El objetivo de Google consiste en organizar información procedente de todo el mundo y hacerla accesible y útil de forma universal. El programa de Búsqueda de libros de Google ayuda a los lectores a descubrir los libros de todo el mundo a la vez que ayuda a autores y editores a llegar a nuevas audiencias. Hundred 'Tuns, came to my Houfe. I had' formerly been Surgeon of another Ship where he was Mafter, and a fourth Parr Owner, in a Voyage to the Levant; He had always treated me more like a Brother than an inferior Officer, and hearing of my Arrival made me a Vifit, as 1 :pprehended only out of Friendfhip, for nothing paffed more than what is ulual after long Abfences. But repeating his Vifits often, expreffing his Joy to find me in good Health, asking whether I were now fettled for Life, adding that he intended a Voyage to the Eaft-Indies, in two Months. At laft he plainly invited me, though with fome Apologies, to be Surgeon of the Ship; that I hould have another Surgeon under me befides our two Mates; that my Sallary fhould be double to the ufual Pay; and that having experienced my Knowledge in Sea-Affairs to be at leaft equal to his, he would enter into any Engagement to follow my Advice, as much as if I had Ghare in the Command.

 Things, and I knew him to be fo honeft a Mañ, that I could not reject his Pro peifal; the Thirft I had of feeing the World, notwithitanding my paft Miffortanes, continuing as violent as ever. The only Difficulty that remained, was to perfuade my Wife, whofe Confent, however, I at laft obtained by the Profpect of Advantage flie propofed to her Chitdren.We fot out the $\operatorname{sth}$ Day of Auguft, 1706. and arrived ent Fort St. George the inth of Apoil, 1707. ftayed there three Weeks to refrefh our Crew, many of whom wete fick. From theace we went to Tonquin, where the Captain refolved to continue fome Time, becaufe many of the Goods he iptended to buy were not ready, nor could he expect to be difpatched in fome Months. Therefore in hopes to defray fome of the Charges he muft be at, he bought a sloop, loaded it with feveral forts of B 2 Goods,

I ObSERVED:ameng them a Dutch sam; whorfermed to be of fome Authority, though he, was not Cpmmander of either Styip. He knew us by our Countenances to :be Englifomen, and jabbering to us in his own Language, fwore wf, Ihould be tied $\mid$ Back to Back, and Hhrown into the, Sea. I fpoke Dutch tolerably well; I told him who we were, and begged him, in confideration of pur being Chriftians and Proteftants, of neighbouring Countries, in ftrict Alliance, that he would move the Captains to take fome Pity on us. This inflamed his Rage; he repeated his Threatnings, and, turning to his Companions, fpoke with great Vehemence, in the Fapanefe Language, as I fuppofe, often ufing the 'Word Cbriftiano s.

The largeft of the two Pyrate Ships was commanded by a fapanefe Captain, B 3
who
who fpoke a little Dutch, but very im. perfecly. He came.up to me, and after feveral Queftions, which I anfwered in great Humility, he faid we fhould not die. I made the Captain a yery low Bow, and then turning to the Dutchman, faid, I was forry to find more Mercy in a Heathen, than in a Brother Chriftian, But I had foon Reafon to repent thofe foolifh Words, for that malicious Reprobate, having often endeavoured in vain to perfuade both the Captains that I might be thrown into the Sea, (which they would not yield to after the Promife made me, that I fhould not die,) however prevailed fo far as to have a Punifhment inflicted on me, worle in all human Appearance than Death it felf. My Men wese fent by an equal Divifion into both the PirateShips, and my Sloop new manned. As to my felf, it was determined that I fhould be fet a drift in a fmall Canoe, with Paddles and a Sail, and four Days Provifions, which laft the forapanefe Cap=

tain was fo kind to double out of his own Stores, and would permit no Man to fearch me. I got down into the Canoe, while the Dutchman ftanding upon the Deck, loaded me with all the Curfes and injurious Terms his Language could afford.

Авоит an Hour before we faw the Pirates, I had taken an Obfervation, and found we were in the Latitude of 46 N . and of Longitude 183 . When I was at fome Diftance from the Pirates, I difcovered by my Pocket-Glafs feveral illands to the South-Eaft. I fet up my Sail, the Wind being fair, with a Defign to reach the neareft of thofe Illands, which I made'a Shift to do in about three Hours. It was all rocky ; however, I got many Birds Eggs, and ftriking Fire I kindled fome Heath and dry Sea-Weed, by which I roafted my Eggs. I eat no other Supper, being refolved to fpare my Provifions as much as I could. I paffed the Night under the Shelter of a Rock, B 4 ftrow-

ftrowing fome Heath under me $_{x /}$ and flept pretty well.

The next Day I failed to another, Ifland, and thence to a third and fourth, fometimes ufing my Sail, and fometimes my Paddles: But not to trouble the Reader with a particular Account of my Diffreffes, let it fuffice, that on the 5 th Day I arrived at the laft Ifland in my Sight, which lay South-South-Eaft to the former.

This Inland was at a greater Diftance than I expected, and I did not reach it in lefs than five Hours. I encompaffed it almoft round betore I could find a convenient Place to land in, which was a fmall' Creek, about three Times the Widenefs of my Canoe.: I found the Ifland to be all rocky, only a little intermingled with Tufts of Grafs, and fweet-finelling Herbs. I took out my, fmall Provifions, and after having refrelhed my felf, I fecured the Remainder
in, a. Caue, whereof there were great Numbers: 1 gathered plenty of Eggs upon the Rocks, and got a Quantity of dry Sea-Weed and parched Grafs, which I defigned to kindle the next Day, and roaft my Eggs as well as I could. (For I had about me my Flint; Steel; Match, and Burning-Glafs. I lay all Night in the Cave where I had lodged my Provifions. My ; Bed was the Yame dry Grafs and Sea-weed which $I$ intended for Fewel. I nept very little, for the Difquiets of my Mind prevalled over my Wearinefs, and kept me áwake. I confidered hpw infipoffible it was to preferve myilife in fo défolate a Place, and how miferable my End muft be- Yet I found my felf fo liftlefs and defponding, that I had not the Heart to rife, and before I could get Spirits enough to creep out of my Cave, the Day was far advanced. I walked a while among the Rocks; the Sky was perfectly clear, and the Sun fo hot, that I was forced to turn my Face from it: When all on a fudden

den it became obfcured, as I thought, in a Manner very different from what happens by the Interpofition of a Cloud. I turned back, and perceived a vaft Opake Body between me and the Sun, moving forwards towards the Ifland: It feemed to be about two Miles high, and hid the Sun fix or feven Minutes; but I did not obfarve the Air to be much colder, or the Sky more darkned, than if I had ftood under the Shade of a Monntain. As it approached nearer over the Place where I was, it appeared to be a firm Subftance, the Bottom flat, fmooth, and fhining very bright from the Reflection of the Sea below. I food upon a Height about two hundred Yards from the Shoar, and faw this valt Body defcending almoft to a Parallel with me, at lefs than an Englifb Mile diftance. I took out my Pocket-Perfpective, and could plainly difiover Numbers of People moving up and down the Sides of it, which appeared to be floping, but what

## to LAPUTA, $\mathbf{o v c h}_{0}$ 11

what there People were doing, I was not able to diftinguifh.
T.he natural Love of Life gave me fome inward Motions of Joy, and I was ready to entertain a Hope; that this Adventure might fome Way or other help to deliver me from the defolate Place and Condition I was in. But at the fame Time the Reader can hardly conceive ny Aftonifhment, to behold an Ifland in the Air, inhabited by Men, who were able, (as it fhould feem,) to raife, or fink, or put it into a Progreflive Motion, as they pleafed. But not being at that Time in a Difpofition to philofophife upon this Phænomenon, I rather chofe to obferve what Courfe the Illand would take, becaufe it feemed for a while to ftand ftill. Yet foon after it advanced nearer, and I could fee the Sides of it encompaffed with feveral Gradations of Galleries and Stairs, at certain Intervals, to defcend from one to the other. In the loweft Gallery I beheld

beheld fome People fifhing with long Angling Rods, and others looking on, I waved my Cap, (for my Hat was long fince worn out, ) and my Handkerchief towards the Illand ; and, upont its nearer Approach, I called and houted with the utmoft Strength of my Voice, and then looking circumfpectly, I bebeld a Crowd gathered to that Side which was moft in my View: I found by their pointing towards me, and to each other, that they plainly: difcovered me, although: they made no Return to my Shouting. But I could fee four or five Men fynning. in great Hafte up the Stairs to the Top of the Ifland, who then difappeared. I happened rightly to conjecture, that: there were fent for Orders to fome Perfon in Authority upon this Occafion.

The Number of People increared, and in lefs than half an Hour the Illand was moved and raifed in fuch a Manner, that the loweft Gallery appeared in $\ddagger$ Parallel of leff than an Hundred Yards diftance

diffance from the Height wheve I food.
I then put my felf into the moft fupplicating Poftures, and fooke in the humbleft Accent, but received, Anfwer. Thofe who ftood neareft over-againft me, feemed to be Perfons of Diftinction, as I fuppofed by their Habit. They conferred earnefly with each other, looking often upon me. At length one of them called out in a clear, pplite, fmooth Dialect, not undike in Sound to the Italian; and therefore I returned an Anfwer in that Ladiguage, hoping at leaft that the Cadence : might be more agreeable to his Ears. Alchough neither of us underftood the other, yet my Meaning was eafily known, for the People faw the Diftrefs I was in.

They made Signs for me to come down from the Rock, and go towards the Shoar, which I accordingly did; and the flying Ifland being raifed to a convenient Height, the Verge directly over me,

Shapes, Habits, and Countenances. Their Heads were all rectined eirher to the Right, or the Left; one of their Eyes turned inward, and the other directly up to the Zenith. Their outward Garments were adorned with the Figures of Suns, Moons, and Stars, interwoven with thofe of Fiddles; Flutes; Harps, Trumpets, Guittars, Harpficords, and many more Inftruments of Mufick, unknown to us in Europe. I obferved here and there many in the Habit of Servants, with a blown Bladder faften'd like a Flail to the End of a fhort Stick, which they carried in their Hands. In each Bladder was a fmall Quantity, of dried Peafe, or little Pebbles, (as I was afterwards informed.) With thefe Bladders they now and then flapped the Mouths and Ears of thofe who ftood near them, of which Practice $\mathbf{I}$ could not then conceive the Meaning: It feems, the Minds of thefe People are fo taken up̀ with intenfe Speculations, that they neither can fpeak, nor attend to the Difcourfes of others, without be-

ing rouzed by fome external Taction upon the Organs of Speech and Hearing; for which Reafon, thofe Perfons who are able to afford it always keep a Flapper (the Original is Climenole) in their Family, as one of their Doinefticks, nor ever walk abroad or make Vifits without him. And the Bufinefs of this Officer is, when two or three more Perfons are in Company, gently to ftrike with his Bladder the Mouth of him who is to fpeak, and the right Ear of him or them to whom the Speaker addreffeth himfelf. This Flapper is likewife employed diligently to attend his Mafter in his Walks, and, upon occafion, to give him a foft Flap on his Eyes, becaufe he is always fo wrapped up in Cogitation, that he is in manifeft Danger of falling down every Precipice, and bouncing his Head againft every Poft, and in the Streets of juftling others, or being juftled himfelf into the Kennel.

I r was neceflary to give the Reader this Information, without which he would be at the fame Lofs with me, to underftand the Proceedings of thefe People, as they conducted me up the Stairs, to the Top of the Ifland, and fram. thence to the Royal Palace. While we were afcending, they forgot feveral Times what they were about, and left me to my felf, till their Memories were again rouzed by their Flappers ; for they appeared altogether unmoved by the Sight of my foreign Habit and Countenance, and by the Shouts of the Vulgar, whofe Thoughts and Minds were more difengaged.

A t laft we enter'd the Palace, and proceeded into the Chamber of Prefence, where I faw the King feated on his Throne, attended on each Side by Perfons of Prime Quality. Before the Throne, was a large Table filled with Globes and Spheres, and Mathematical Inftruments of all Kinds. His Majefty taok

took not the leaft Notice of us, although our Entrance was not without fufficient Noife, by the Concourfe of all Perfons belonging to the Court. But he was then deep in a Problem, and we attended at leaft an Hour, before he could folve it. There ftood by him on each Side, a young Page, with Flaps in their Hands, and when they faw he was at Leifure, one of them gently fruck his Mouth, and the other his riglt Ear, at which he farted like one awaked on the fudden; and looking towards me, and the Company I was in, recollected the Occafion of our coming, whereof he had been informed before. He fpoke fome Words, whereupon immediately a young Man with a Flap came up to my Side, and flapt me gently on the right Ear, but I made Signs, as well as I could, that I had no Occafion for fuch an Inftrument; which as I afterwards found gave his Majefty and the whole Court a very mean Opinion of my Underftanding. The King, as far as I could conC 2
jecture,

jecture, asked me feveral Queftions, and I addreffed my feef to him in all the Languages I had. When it was found, that I could neither underftand, nor be un-. derftood, I was conducted, by the King's. Order, to an Apartment in his Palace, (this Prince being diftinguifhed above all his Predeceffors for his Hofpitality to Strangers,) where two Servants were appointed to attend me. My Dinner was brought, and four Perfons of Quality, whom I remember'd to have feen very near the King's Perfon, did me the Honour to dine with me. We had two Courfes, of three Difhes each. In the firf Courfe there was a Shoulder of Mutton, cut into an 世quilateral Triangle, a Piece of Beef into a Rhomboides, and a Pudding into a Cycloid. The fecond Courfe was two Ducks, truffed up into, the Form of Fiddles, Saufages and Fuddings refembling Flutes and Hautboys, and a Breaft of Veal in the Shape of a Harp. The Servants cut our Bread into

Cones, Cylinders, Parallelograms, and feveral other mathematical Figures.

- While we were at Dinner, I made bold to ask the Names of feveral Things in their Language, and thofo noble Perfons, by the Affiftance of their Flappers, delighted to give me Anfwers, hoping to raife my Admiration of their great Abilities, if I could be brought to converfe with them. I was foon able to call for Bread, and Drink, or whatever elfe I wanted.

After Dinner my Company withdrew, and a Perfon was fent to me by the King's Order, attended by a Flapper. He brought with him Pen, Ink, and Paper, and three or four Books, giving me to underftand by Signs, that he was fent to tedch me the Language. We fat together. four Hours, in which Time I wrote down a great Number of Words in Columns, with the Tranflations over againft them. I hikewife made a Shift to learn feveral C 3 : fhort
fhort Sentences. Formy Tutor would order one of my Servants to fetch fomething, or turn about, to make a Bow, to fit, or ftand, or walk, and the like. Then I took down the Sentence in writing. He fhewed me alfo in one of his Books, the Figures of the Sun, Moon, and Stars, the Zodiack, the Tropics, and Polar Circles, together with the Denominations of many Figures of Planes and Solids. He gave me the Names and Defcriptions of all the mufical Inftruments, and the general Terms of Art in playing on each of them. After he had left me, I placed all my Words with their Interpretations in Alphabetical Order. And thus in a few Days, by the help of a very faithful Memory, I got fome Infight inta their Lánguage.

The Word, which I interpret the - Flying or Floating IJand, is in the Original Laputa, whereof I could never learn the true Etymology. Lap in the old obfolete Language fignifieth High, and
and Untub a Governor, from which, they fay, by Corruption was derived Laputa from Lapuntub. But I do not approve of this Derivation, which feems to be a little ftrained. I ventured to offer to the Learned among them a Conjecture of my own, that Laputa was quafi Lap outed, Lap fignifying properly the Dancing of the Sun-Beams in the Sea, and outed a Wing ; which, however, I fhall not obtrude, bat fubmit to the judicious Reader.

Those to whom the King had entrufted me, obferving how ill I was clad, ordered a Taylor to come next Morning, and take my Meafure for a Suit of Clothes. This Operator did his Office after a different manner from thofe of his Trade in Europe. He firft took my Altitude by a Quadrant, and then with Rule and Compaffes, defrribed the Dimenfions and Out-lines of my whole Body, all which he enter'd upor Paper, and in fix Days brought my Clothes very ill made, and $\mathrm{C}_{4}$ quite ogymeaty Google
quite out of fhape, by happening to miftake a Figure in the Calculation. But my Comfort was, that I obferved fuch Accidents very frequent, and little regarded.

During my Confinement for want of Clothes, and by an Indifpofition that held me fome Days longer, I much enlarged my Dictionary; and when I went next to Court, was able to underftand many Things the King fpoke, and to return him fome kind of Anfwers. His Majefty had given Orders that the Ifland fhould move North Eaft and by Eaft, to the Vertical Point over Lagado, the Metropolis of the whole Kingdom below upon the firm Earth. It was about ninety Leagues diftant, and our Voyage lafted four. Days and an half. I was not in the lealt fenfutede of the progreffive Motion made in the Air by the Ifland, ': On the fecond Motning; about. Eleven a-Clock, the King himtelf in Petfor, :"atteaded by his Nobility, Courtiers,

Courtiers, and Officers, having prepared all their mufical Inftruments, played on them for three Hours without Intermiffion, fo that I was quite ftunned with the Noife; neither could I poffibly guefs the Meaning till my Tutor informed me. He faid that the People of their Illand had their Ears adapted to hear the Mufick of the Spheres, which always played at certain Periods, and the Court was now prepared to bear their Part in what ever Inftrument they moft excelled.

In our Journey towards Lagado the capital City, his Majefty ordered that the Illand fhould ftop over certain Towns and Villages, from whence he might roceive the Petitions of his Subjects. And to this Purpofe feveral Packthreads were let. down with frall Weights at the Bottom. On thefe Packthreads the People ftrung their Petitions, which mounted up directly lite the Scraps of Paper faftned by School-Boys at the End of the String that

that holds their Kite. Sometimes we received Wine and Victuals from below, which were drawn up by Pullies.

T н е Knowledge I had in Mathematicks gave me great Affiftance in acquiring their Phrafeology, which depended much upon that Science and Mufick; and in the latter I was not unskilled. Their Ideas are _perpetually converfant in Lines and Figures. If they would, for Example, praife the Beauty of a Woman, or any other Animal, they defcribe it by Rhombs, Circles, Parallelograms, Ellipfes, and other Geometrical Terms, or by Words of Art drawn from Mufick, needlefs here to repeat. I obferved in the King's Kitchen all Sorts of mathematical and mufical InAruments; after the Figures of which they cut up the Joints that were ferved to his Majefty's Table.

Angle in any Apartment; and this Defeet arifeth from the Contempt they bear to practical Geometry, which they defpife, as Vulgar and Mechanick, thofe Inftructions they give being too refined for the Intellectuals of their Workmen; which occafions perpetual Miftakes. And although they are dextrous enough upon a Piece of Paper in the Management of the Rule, the Pencil, and the Divider, yet in the common Actions and Behaviour of Life, I have not feen a more clumfy, awkward, and unhandy People, nor fo flow and perplexed in their Conceptions upon all other Subjects, except thofe of Mathematicks and Mufick. They are very bad Reafoners, and vehemently given to Oppofition, unlefs when they happen to be of the right Opinion, which is feldom their Cafe. Imagination, Fancy, and Invention, they are wholly Strangers to, nor have any Words in their language by which thofe Ideas can be expreffed; the whole Compals of their Thoughts and

and Mind being fhut up within the two forementioned Sciences.

Most of them, and efpecially thofe who deal in the Aftronomical Part, have great Faith in judicial Aftrology, althaugh they are afhamed to own it publickly. $\cdot$ But what I chiefly admired, and thought altogether unaccountable, was the frong Difpofition I obferved in them towards News and Politicks, perpetually enquiring into publick Affairs, giving their Judgments in Matters of State, and paffionately difputing every Inch of a Party Opinion. These People are under continual Difquietudes, never enjoying a Minute's Peace of Mind; and their Difturbances proceed from Caufes which very little affect the reft of Mortals. A Pbenomenon folved by modern PbiLofophy and Aftronomy. The Laputians great Improvements in the latter. The King's Method of fup--prefing Infurrections.
 Defired leave of this Prince to fee the Curiofities of the Illand, which he was gracioully pleafed to grant, and ordered my Tutor to attend me. I chiefly wanted to know to what Caufe in Art, or in Nature, it owed its feveral Motions, whercof I will now give a Philofophical Account to the Reader.

The Flying or Floating Illand is exactly circular, its Diameter 7837 Yards, or about four Miles and an

D 2 half,
half, and confequently contains ten thoufand Acres. It is three hundred Yards thick. The Bottom or under Surface, which appears to thofe who view it from below, is one even regular Plate of Adamant, fhooting up to the Height of about two hundred YardsAbove it lie the feveral Minerals in their ufual Order, and over all is a Coat of. rich Mould ten or twelve Foot deep. This Declivity of the upper Surface, from the Circumference to the Center, is the natural Caufe why all the Dews and Rains which fall upon the Illand, are conveyed in fmall Rivulets towards the Middle, where they are emptied into four large Bafons, each of about half a Mile in Circuit, and two hundred Yards diftant from the Center. From thefe Bafons the Water is continually exhaled by the Sun in the Day-time, which effequally prevents their overflowing. Befides, as it is in the Power of the Monarch to raife the Illand above the Region of Clouds ańd Vapours,

pours, he can prevent the falling of Dews and Rains when ever he pleafes: For the higheft Clouds cannot rife above two Miles, as Naturatifts agree, at leaft they were never known to do in that Country.

A t the Center of the Illand there is a Chafm about fifty Yards in Diameter, from whence the. Aftronomers defcend inte a large Dome, which is therefore called Flanidona Gagnole, or the Aftronomers Cave, fituated at the Depth of a hundred Yards beneath the upper Surface of the Adamant. In this Cave are twenty Lamps continually burning, which from the Reflection of the Adamant caft a ftrong Light into every Part. The Place is ftored with great Variety of Sextants, Quadrants, Telefcopes, Aftrolabes, and other Aftronomical Inftruments. But the greateft Curiofity, upon which the Fate of the Illand depends, is a Load-ftone of a prodigious Size, in Shape refembling a Weaver's Shuttle. It $D_{3}$ is
$3^{8} \quad \therefore \mathrm{AVOYAGE}$
is in Lengeh fix Yards, and in the thickeft Part at leaft three Yards over. This Magnet is fuftained by a very ftrong Axle of Adamant paffing through its Middle, upon which it plays, and -is poized fo exactly, that the weakef Hand can turn it. It is hooped round . with an hollow Cylinder of Adamant, four Foot deep, as many thick, and twelve Yards in Diameter, placed Horizontally, and fupported by eight Adimantine Feet, each fix Yards high. In the middle of the Concave Side there is a. Groove twelve Inches deep, in which the Extremities of the Axle are lodged, and turned round as therr is Occafion.

The Stone cannot be moved from its Place by, any Force, becaufe the Hoop and its Feet are one continued Piece with that Bodyi of : Adamant, which conftitutes the totuon of the mand.

B $\ddagger$

## to LAPUTA, *oc.

By Means of this Load-fone, the Hland is made to rife and fall, and move from orie Place to another. For, with Refpect to that Part of the Earth over which the Monarch prefides, the Stone is endued at one of its Sides with an attractive Power, and at the other with a repulfive. Upon placing the Magnet erect with its attracting End towards the Earth, the Ifland defeends; but when the repelling Extremity points downwards, the Illand mounts directly upwards. When the Pofition of the Stone is oblique, the Motion of the Illand is fo too. For in this Magnet the Forces always act in Lines parallel to its Direction.

By this oblique Motion the Illand is conveyed to different Parts of the Monarch's Dominions. To explain the manner of its Progrefs, let $A B$ reprefent'a Line drawn crofs the Dominions of Balsibarki, let the line $c d$ reprefent

the Load-ftone, of which let $d$ be the repelling End, and $c$ the attracting End; the Ifland being over $C$, let the Stone be placed in the Pofition $c d$, with its, repelling End downwards, then the Illand will be driven upwards obliquely towards $\mathcal{D}$. When it is arrived at $\mathcal{D}$, let the Stone be turned upon its Axle till its attracting End points towards $E$, and then the Illand will be carried obliquely towards $E$; where, if the Stone be again turned upon its Axle till it fands in the Pofition $E F$, with its repelling Point downwards, the Illand will rife obliquely towards $F$; where, by directing the attracting End towards $G$, the Illand may be carried to $G$, and from $G$ to $H$, by turning the Stone, fo as to make its repelling Extremity point directly downwards. And thus by changing the Situation of the Stone as often as there is Occafion, the Illand is made to rife and fall by Turns in an oblique Direction; and by thofe alternate Rifings and Fallings (the Obliquity being not confiderable

But it muft be obferved, that this Illand cannot move beyond the Extent of the Dominions below, nor can it rife above the Height of four Miles. For which the Aftronemers (who have written large Syftems concerning the Stone) affign the following Reafon; That the magnetick Virtue does not extend beyond the Diftance of four Miles, and that the Mineral which acts upon the Stone in the Bowels of the Earth, and in the Sea about fix Leagues diftant from the Shoar, is not diffured through the whole Globe, but terminated with the Limits of the King's Dominions; and it was eafy from the great Advan. tage of fuch a fuperior Situation, for a Prince to bring under his Obedience whatever Country lay within the Attraction of that Magnet.

When the Stone is put parallel to the Plane of the Horizon, the Ifland ftandeth filly for in that Cale; the Extremities of it being at equal Diftanee from the Earth, act with equal Force, the bee in drawing downwards, the other in pulhing upwards, and confequently no Motion can enfue.

with great Stones, againft which they have no Defence but by creeping into Cellars or Caves, while the Roofs of their Houfes are beaten to Pieces. But if they ftill continue obftinate, or offer to raife Infurrections, he proceeds to the laft Remedy, by letting the Ifland drop direCly upon their Heads, whicly makes a univerfal Deftruction both of Houfes and Men. However, this is an Extremity to which the Prince is feldom driven, neither indeed is he willing to put it in Execution, nor dare his Minifters advife him to an Action, which, as it would render them odious to the People, fo it would be a great Damage to their own Eftates, which lie all below, for the IIland is the King's Demefn.

But there is ftill indeed a more weighty Reafon, why the Kings of this Country have been always averfe from executing fo terrible an Action, unlefs upon the utmolt Neceffity. For if the Town intended to be deftroyed hould have

Of all this the People are well apprized, and underftand how far to carry their Obftinacy, where their Liberty or Property is concerned. And the King, when he is higheft provoked, and moft determined to prefs a City to Rubbifh, orders the Ifland to defcend with great Gentlenefs, out of a Pretence of Tendernefs to his People, but indeed for fear of breaking the Adamantine Bottom; in which Cafe, it is the Opinion of all their

I went into another Chamber, but was ready to haften back, being almoft overcome with a horrible Stink. My Conductor preffed me forward, conjuring me, in a Whifper, togive no Offence, which would be highly refented, and therefore I durft not fo much as ftop my Nofe. The Projector of this Cell was the moft ancient Student of the Academy : His Face and Beard were of a pale Yellow ; his Hands and Clothes dawbed over with Filth. When I was prefented to him, he gave me a very clofe Embrace, (a Compliment I could well have excufed.) His Employment from his firft coming into the Academy, was an Operation to reduce human Excrement to its original Food, by feparating the feveral Parts, removing the Tincture which it receives from the Gall, making the Odour exhale, and fcumming off the Saliva. He had a weekly Allowance from the Society, of a Veffel filled with Human Ordure, about the Bignefs of a Brifol Barrel.

IN another Apartment I was bighly pleafed with a Projector, who had found a Device of Plowing the Ground with Hogs, to fave the Charges of Plows, Cattle and Labour. The Method is this; In an Acre of Ground you bury at fix Inches diftance, and eight deep, a quantity of Acorns, Dates, Chefnuts, and other Mafte or Vegetables whereof thefe Animals are fondeft: then you drive fix hundred or more of them into the Field, where in a few Days they will root up the whole Ground in fearch of their Food, and make it fit for Sowing, at the fame time manuring it with their Dumg; it is true upon Experiment they found the Charge and Trouble very great, and they had little or no Crop. However, it is not doubted that this Invention may be capable of great Improvement.

I went into another Room, where the Walls and Ceiling were all hung round with Cobwebs, except a narrow Paffage for

He lamented the fatal Miftake the World had been fo long in of ufing Silk-Worms, while we had fuch plenty of Domeftick Infects, who infinitely excelled the former, becaufe they undertood how to weave as well as fin. And he propofed fatther, that by employing Spiders; the Charge of dying Silks fhould be whelly faved, whereof I was fully convinced when he fhewed me a valt number of Flies moft beautifully coloured; wherewith he fed his Spiders; affuring us, that the Webs would take a Tincture from them; and as he had them of all Hues, he hoped to fit every body's Fancy, as foon as he could find proper Food for the Flys of certain Gums, Oyls; and other glutinous Matter to give a Strength and Confiftence to tho Threads.

He had a large pair of Bellows with a long flender Muzzle of Ivory. This he conveyed eight Inches up the Anus, and drawing in the Wind, he affirmed he could make the Guts as lank as a dried Bladder. But when the Difeafe was more ftubborn and violent, he let in the Muzzle while the Bellows were full of Wind, which he difcharged into the Body of the Patient, then withdrew the Inftrument to replenifh it, clapping his Thumb frongly againft the Orifice of the Fundament; and this being repeated three or four times,

He had two large Rooms full of wonderful Curiofities, and fifty Men at work. Some were condenfing Air into a dry tangible Subftance, by extracting the Nitre, and letting the Aqueous or fluid Particles percolate ; others foitening Marble for Pillows and Pincufhions; others petrifying the Hoofs of a living Horfe to preferve them from foundring, The Artift himfelf was at that time bufy upon two great Defigns; the firit to fow Land with Chaff, where jn he alfirmed the true feminal Virtue to be contained, as he demonftrated by feveral Experiments which I was not skilful enough to comprehend. The other was, by a certain Compofition of Gums, Minerals, and Vegetables outwardly applied, to prevent the Growth of Wool upon two young Lambs; and he hoped in a reafonable time to propagate the Breed of naked Sheep all over the Kingdom.

We croffer a Walk to the other part of the Academy, where, as I have already faid, the Projector in feeculative Learning refided.

The firlt Profeflor I faw was in a very large Room, with forty Pupils about him. After Salutation, obferving me to look earneflly upon a Frame, which took up the greateft part of both the Length and Breadth of the Room, he faid perhaps I might wonder to fee him employed in a Project for improving fpeculative Knowledge by practical and mechanical Operations. But the World would foon be fenfible of its Ufefulnefs, and he flattered himelf that a more noble exalted Thought never fprung in any other Man's Head. Every one knew how laborious the ufual Method is of attaining to Arts and Sciences; whereas by his Contrivance, the moff ignorant Perfon at a reafonable Clarge, and with a little bodily Labour, may write both in Philofophy, Poetry, Politicks, Law, F 4 Ma-

Mathematicks and Theology, withठut the lealt Affiftance from Genius or Study. He then led me to the Frame, about the fides whereof all his Pupils ftood in Ranks. It was twenty Foot Square, placed in the middle of the Room. The Superficies was compofed of feveral bits of Wood, about the bignefs of a Dye, but fome larger than others. They were all linked together by flender Wires. Thefe bits of Wood were covered on every Square with Paper pafted on them, and on thefe Papers were written all the Words of their Language in their feveral Moods, Tenfes, and Declenfions, but without any Order. The Profeffor then defired me to obferve, for he was going to fet his Engine at Work. The Pupils at his Command took each of them hold of an Iron Handle, whereof there were fourty fixed round the Edges of the Frame, and giving them a fudden turn, the whole Difpofition of the Words was entirely changed. He then commanded

fix and thirty of theLads to read the feveral Lines foftly as they appeared upon the Frame; and where they found three or four Words together that might make part of a Sentence, they dietated to the four remaining Boys who were Scribes. This Work was repeated three or four times, and at every turn the Engine was fo contrived, that the Words fhitted into new Places, or the fquare bits of Wood moved upfide down.

Six Hours a-day the young Students were employed in this Labour, and the Profeffor fhewed me feveral Volumes in large Folio already collected, of broken Sentences, which he intended to piece together, and out of thofe rich Materials to give the World a compleat Body of all Arts and Sciences; which however might be ftill improved, and much expedited, if the Publick would raife a Fund for making and employing five hundred fuch Frames in Lagado, and oblige the Managers to contribute in

He affured me, that this Invention had employed all his Thoughes from hia Youth, that he had employed the whole Vocabulary into his Frame, and made the flricteft Computation of the general Proportion there is in the Book between the Numbers of Particles, Nouns, and ,Verbs, and other Parts of Speech.

I made my humbleft Acknowledgment to this illuftrious Perfon for his great Communicativenefs, ante promifed if ever I had the good Fortune to return to my Native Country, that I would do him Juftice, as the fole Inventer of this wonderful Machine; the Form and Contrivance of which I defired leave to delineate upon Paper as in the Figure here annexed. We next went to the School of Language, where three Profeffors face -in Confultation upon improving that of their own Country'.

The firft Project was to fhorten Difcourfe by curting Polyfyllables into one, and leaving out Verbs and Participtes, becaufe in reality all things imaginable are but Noums.

The other was a Scheme for entirly abolifhing all Words whatieever; and this was urged as a great Advantage in point of Health as well as Brevity. For it is plain, that every Word we feak is in fome Degree a Diminution of our Lungs by Corrofion, and confe-' quently contributes to the §ortning of ${ }^{\text {. }}$ Qu:

And this Invention would certainly have taken Place, to the great Eafe as well as Health of the Subject, if the Women in conjunction with the Vulgar and illiterate had not threatned to raife a Rebellion, unlefs they might be allowed the Liberty to fpeak with their Tongues, after the manner of their Anceftors; fuch conftant irreconcilable Enemies to Science are the common People. However, many of the moft Learned and Wife adhere to the New Scheme of expreffing themfelves by Things, which hath only this Inconvenience attending it, that if a Man's Bufinefs be very great, and of various kinds, he muft be obliged in Proportion to carry a great Bundle of Things upon his Back, unlefs he can afford

I have often beheld two of thofe Sages almoft finking under the Weight of their Packs, like Pedlers 2mong us; who when they meet in the Streets would lay down their Loads, open their Saddles, and hold Converation for an Hour together ; then put up their Implements, help each other to refume their Burthens, and take their Leave.

But for fhort Converfations a Man may carry Implements in his Pockets and under his Arms, enough to fupply him, and in his Houfe he cannot be at a lofs: Therefore the Room where Company meet who practife this Art, is full of all Things ready at Hand, requifite to furnifh Matter of this kind of artificial Converfe.

Another great Advantage propofed by this Invention, was that it would ferve as an Univerfal Language to be underftood in all civilized Nations,

A furtber Account of the Academy. The Author propofes fome Improvements wobich are bonourably rereceived.

N the School of Political Projectors I was but ill entertained, the Profeffors appearing in my Judgment wholly out of their Senfes, which is a Scene that never fails to make me melancholy. Thefe unhappy People were propofing Schemes for perfuading Monarchs to chufe Favourites upon the Score of their Wifdom, Capacity and Virtue ; of teaching Minifters to confult the Publick Good; of rewarding Merit, great Abilities, and eminent Services; of inftructing Princes to know their true Intereft by placing

it on the fame Foundation with that of their People: Of chufing for Employments Perfons qualified to exercife them; with many other wild impoffible Chimxras, that never entred before into the heart of Man to conceive, and confirmed in me the old Obfervation, that there is nothing fo extravagant and irrational which fome Philofophers lave not maintained for Truth.

But, however I fhall fo far do Juftice to this Part of the Academy, as to acknowledge that all of them were not fo vifionary. There was a molt lngenious Doctor who feemed to be perfectly verfed in the whole Nature and Syftem of Government. This illuftrious Perfon had very ufefully employed his Studies in finding out effectual Remedys for all Difeafes and Corruptions, to which the feveral kinds of publick Adminiftration are fubject by the Vices or Infirmities of thofe who govern, as well as by the LicentioufPart III.

nefs of thofe who are to obey. For inftance ; whereas all Writers and Reafoners have agreed, that there is a frrict miverfal Refemblance between the Natural and the Political Body; can there be any thing more evident, than that the Health of both muft be preferved, and the Difeafes cured by the fame Prefription? It is allowed, that Senates and great Councils are often troubled with redundent, ebullient, and other pecant Humours, with many Difeafes of the Head and more of the Heart; with ftrong Convulfions, with grievous Contractions of the Nerves and Sinews in both Hands, but efpecially the Right: With Spleen, Elatus, Vertigos and Deliriums; with Scrophulous Tumours full of fatid purulent Mater; with fower frothy Ructations, with Canine Appetites and crudenefs of Digeftion, befides many others needlefs to mention. This Doctor therefore propofed, that upon the meeting of a Senate, certain Phyficians fhould attend

at the three firft Days of their fitting, and at the Clofe of each day's Debate, feel the Pulfes of evéry Senator; after which häving maturely confidered, and confulted upon the Nature of the feveral Maladies, and the method of Cure, tiney fhould on the fourth Day return to the Senate Houfe, attended by their Apothecaries fored with proper Medicines, and before the Members fate, adminifter to each of them Lenatives, Aperitives, Abfterfives, Currofives, Reftringents, Palliatives, Laxatives, Cephalalgicks, IEericks, Apophlegmaticks, Acoufticks, as their feveral Cafes required, and aecording as thefe Medicines fhould operate, repeat, alter, or omit them at the next Meeting.

This Proje $C$ could not be of any great Expence to the Publick, and would in my poor Opinion, be of much Ufe for the difpatch of Bufines in thofe Countifies where Senates have any fhare in the Legillative Power, beget Unanimity, hortenDebates, open a few Mouths

which are now clofed, and clofe many more which are now open; curb the Petulancy of the Young, and correct the Pofitivenfs of the Old; rouze the Stupid, and damp the Pert.

Again, Becaufe it is a general Complaint that the Favourites of Princes are troubled with fhort and wealdMemories; the fame Doctor propofed, that whoever attended a Firf Minifter, after having told his bufinefs with the utmoft Brevity, and in the plaineft Words; fhould at his Departure give the faid Minifter a Tweak by the Nofe, or a kick in the Belly, or tread on his Corns, or lug him thrice by both Ears, or run a Pin into his Breech, or pinch his Arm black and blew, to prevent Forgetfulnefs : and at every Levee Day repeat the fame Operation, till the Bufinefs were done or abfolutely refufed.

He likewife directed, that every Senator in the great Council of a Nation, after

## to L AP UTA, orc. 85

after he had delivered his Opinion, and argued in the Defence of it, fhould be obliged to give his Vote directly contrary; becaufe if that were done, the Refult would infallibly terminate in the Good of the Publick.

When $^{\text {Parties in a State are violent, }}$ he offered a wonderful Contrivance to reconcile them. The Method is this. Fou tals an Hundred Leaders of each Party, you difpofe of them into Couples of fuch whofe Heads are neareft of a fize; then let two nịce Operaters faw off the Occiput of each Couple at the fame time, in fuch a manner that the Brain may be equally divided. Let the Occiputs thus cut off be interchanged, applying each to the Head of his oppofite Party-man. It feems indeed to be a Work that requireth fome exactnefs, but the Profeffor affured us, that if it were dextroully performed, the Cure would be infallible. For he argued thus; that the two half Brains being left to debate

86 A V O Y A G E
the Matter between themfelves within the fpace of one Scull, would foon come to a good Underttanding, and produce that Moderation as well as Regularity of Thinking, fo much to be wifhed for in the Heads of tho!e, who imagine they come into the World only to watch and govern its Motion: And as to the difference of Brains in Quantity or Quality, among thofe who are Directors in Faction; the Doctor affured us from his own knowledge, that it was a perfect Trifle.

I heard a very warm Debate between two Profeffors, about the moft commodious and effectual Ways and Means of raifing Money without grieving the Subject. The firft affirmed the jufteft Method would be to lay a certain Tax upon Vices and Folly, and the Sum fixed upon every Man, to be rated after the faireft manner by a Jury of his Neighbours. The fecond was of an Opinion directly contrary, to tax thofe

Qpalities of Body and Mind for which Men chiefly value themfelves, the Rate to be more or lefs according to the Degrees of excelling, the Decifion whereof fhould be left entirely to their own Breaft, The higheft Tax was upon Men, who are the greateft Favourites of the other Sex, and the Affeffments according to the Number and Natures of the Favours they have received; for which they are allowed to be their own Vouchers, Wit, Valour, and Politenefs were likwife propofed to be largely caxed and collected in the fame manner, by every Perfons giving his own Word for the Qantum of what he poffeffed. But as to Honour, Juftice, Wifdom and Learning, they fhould not to taxed at all, becaufe they are Qualifications of fo fingular a kind; that no Man will either allow them in his Neighbour, or value them in himfelf,

The Women were propofed to be taxed according to their Beauty and G 4 skill

skill in Drefling, wherein they had the fame Priviledge with the Men, to be determined by their own Judgment. But Conftancy, Chaftity, good Senfe, and good Nature were not rated, becaufe they would not bear the Charge of Collecting.

To keep Senators in the Intereft of the Crown, it was propofed that the Members fhould raffle for Employments, every Man firft taking an Oath, and giving Security that he would Vote for tlie Court, whether he won or no, after which the Lofers had in their Turn the liberty of Rafling upon the next Vacancy. Thus Hope and Expectation would be kept alive, none would complain of broken Promifes, but impute their Difappointments wholly to Fortune, whofe Shoulders are broader and ftronger than thofe of a Miniftry.

Another Profeffor fhewed mea large Paper of Inftructions for difcovering

ing Plots and Confpiracies againft the Governments. He advifed great Statefmen to examine into the Dyet of all fufpected Perfons; their times of eating; upon which fide they lay in Bed; with which Hand they wiped their Pofteriors; take a ftrick View of their Excrements, and from the Colour, the Odour, the Tafte, the Confiftence, the Crudenefs, or Maturity of Digeftion from a Judgment of their Thoughts and Defigns. Becaufe Men are never fo Serious, Thoughtful, and Intent, as when they are at Stool, which he found by frequent Experiment: For in fuch Conjunctures, when he ufed meerly as a Trial to confider which was the beft way of murdering the King, his Ordure would have a Tinture of Green, but quite different when he thought only of raifing an Infurtection or burning the Metropolis.

[^1]Obfervations both curious and ufeful for Politieians, but as I conceived not altogether compleat. This I ventured to. tofl the Author, and offered if he pleafed to fupply him with fome Additions. He received my Propofition with more Compliance than is ufual among Writers, ofpecially thofe of the projecting Species, profefling he would be glad to receive farther Information.

I told him, that Gould I happen to live in a Kingdom where Plots and Confpiracies were either in yogue from the turbulency of the meaner People, or could be turned to the ufe and fervice of the higher Rank of them, I firt would take care to cherifh and encourage the breed of Difcoverers, Witnefles, Informers, Ac: cufers, Profecutors, Evidences, Swearers, together with their feyeral fubfervient and fubaltern Inftruments; and when $I$ had got a competent Number of them of all forts and Capacities, I would put them under the Colour and conduct of fome dextrous

dextrous Perfons in fufficient power both to protect and reward them. Men thus qualified and thus empowered might make a moft excellent ufe and advantage of Plots, they might raife their own Characters and pais for moft profound Politicians, they might reftore new Vigor to a crazy Adminiftration, they might ftifle or divert general Dif contents; fill their Pockets wirh Forfeitures, and advance or fink the Opinion of Publick Credit, as either might anfwer their private Advantage. This might be done by firft agreeing and fettling among themfelyes what fuppected Perfons hould be accufed of a Plot. Then effectual care is taken to fecure all their Letters and Papers, apd put the Criminal in fafe and fecure Cuftody. Thefe Papers might be delivered to a Sett of Artifts of Dexterity fufficient to find out the myfterious Meanings of Words, Syllables, and Letters. But fhould this Method fail, recourfe might be had to others more effectual, by Learned Men called Acrofticks and Anagrams. Firft, might be found Men of Skill and Penetration who can difcern that all initial Letters have political Meanings. Thus $N$ fhall fignify a.

It would be tedious to trouble the Reader with relating what valt numbers of illuftrious Perfons were called up, to gratify that iniatiable Defire I had to fee the World in every Period of Antiquity placed before me. firf fight, yot only from the Croud, but from each other. Homer was the taller and comelier Perfon of the two, walked very erect for one of his Age, and his Eyes were the moft quick and piercing I ever beheld. Ariftotle ftooped much, and made ufe of a ftaff. His Vifage was meager, his Hair lank and thin, and his Voice hollow. I foon difcovered that both of them were perfect Strangers to the reft of the Company, and had never feen or heard of them before. And I had a Whifper from a Ghoft, who fhall be namelefs, that thefe Commentators always kept in the moft diftant Quarters from their Principals in the lower World, through a Confciournefs of Shame and Guilt, becaufe they had fo horribly mifreprefented the meaning of thofe Authors to Pofterity. I introduced Didymus and Euftathius to Homer, and prevailed on him to treat them better than perhaps they deferved, for he foon found they wanted a Genius to enter into the Spirit of a Poet. But

But Ariftotle was out of all Patience with the account I gave him of Scotus and Ramus, as I prefented them to him, and he asked them whether the reft of the Tribe were as grear Dunces as themfelves.

- I then defired the Governor to call up Defcartes and Gafendi, with whom I prevailed to explain their Syftems to Arifetle. This great Philofopher freely acknowledged his own Miftakes in Natural Philofophy, becaufe he proceeded in many things upon Conjecture, as all Men mult do; and he found, that Gajendi, who had made the Doctrine of Epicurus as palatable as he could, and the Vortices of Defcartes were equally exploded. He faid, that new Syftems of Nature were but new Fafhions, which would vary in every Age ; and even thofe who pretend to demontrate them from Mathematical

up a dozen or two of Kings with their Aaceftors in order for eight or nine Generations. But my Difappointment was grievous and unexpected. For inftead of a long train with Royal Diadems, I faw in one Family two Fidlers, threa fpruce Courtiers, and an Italian Prelate. In another a Barber, an Abbot, and two Cardinals. I have too great a Venerar tion for Crowned Heads to dwell any longer on fo nice a Subject. Butas to Counts, Marqueffes, Dukes, Earls, and the like I was not fo frrupulous. And I confers it was not without fome Pleafure that I found my felf able to trace the particular Features, by which certain Families are diftinguifhed up to their Originals. I could plainly!difcover from whence one Family derives a long Chin, why a fecond hath abounded with Knaves for two Generations, and Fools for two more; why a third happened to be crack-brained, and a fourth to be Sharpers. Whence it came what Poly, dore Virgil fays of a certain great Houfe,

Neither could I wonder at all this, when I faw fuch an Interruption of Lineages by Pages, Lacqueys, Valets, Coachmen, Gamefters, Captains, and Pick-pockets.

I was chiefly difgufted with modern Hiftory. For having ftrietly examined all the Perfons of greateft Name in the Courts of Princes for an hundred Years paft, I found how the World had been mined by proftitute Writers, to afcribe the greateft Exploits in War to Cowards, the Wifef Coumfel to Fools, Sincerity to Flatterers, Roman Virtue to Betrayers of their Country, Piety to A theifts, Chaftity to Sodomites, Truth to Informers. How many innocent and excellent Per. fons
fons had been condemned, to Death or Banifhment, by the practifing of great Minifters upon the Corruption of Judges, and the Malice of Faction. How many Villains fiad been exalted to the higheft Places of Truft, Power, Dignity, and Profit: How great a flare in the $\mathrm{Mo}-$ tions and Events of Courts, Councils, and Senates might be challenged by : Bawds, Whores, Pimps, Parifites, and Buffoons: How low an Opinion I had of human Wiffom and Integrity, when I was truly informed of the Springs and Motives of great Enterprizes and Revolutions in the World, and of the contemptible Accidents to which they owed their Succefs.

Here I difcovered the Roguery and Ignorance of thofe who pretend to write Anecdotes, or fecret Hiftory who. fend fo many Kings to their Graves with a Cup of Poifon; will repeat the Difcourfe, between a Prince and Chief Minifter, where no Witnefs was by; unlock

Here I difcovered the fecret Caufes of many great Events that have furprized the World, how a Whore can govern the Back-flairs, the Back. ftairs a Council, and the Council a Senate. A General confeffed in my Prefence, that he got a Victory purely by the force of Cowardice and ill Conduct: and an Admiral that for want of proper Intelligence, he beat the Enemy to whom he intended to betray the Fleet. Three Kings protefted to me, that in their wholeReigns they did never once prefer any Perfon of Merit, unlefs byMiftake or Treachery of fomeMinifter in whom they confided: Neither would they do it if they were to live again; and they fhewed with great Atrength of Reafon, that the Royal Throne could not befupported without Corruption, becaufe that poffitive, confident reftive Temper, which

which Virtue infufed into Man, was a perpetual Clog to publick Bufinefs.

I had the Curiofity to enquire in a particular manner, by what Method great Numbers had procured to themfelves high Titles of Honour, and prodigious Eftates ; and I confined my Enquiry to a very modern Period: however without grating upon prefent times, becaufe I would be fure to give no Offence even to Foreigners (for I hope the Reader need not be told that I do not in the leaft intend my own Country in what I fay upon this occafion) a great number of Perfons concerned were called up, and upon a very flight Examination, difcovered fuch a Scene of Infamy, that I cannot reflect upon it without fome Serioufnefs. Perjury, Oppreffion, Subornation, Fraud, Pandarifm, and the like Infirmities were amongft the moft excufable Arts they had to mention, and for thefe I gave, as it was reafonable, great Allowance. But when fome confeffed they

they owed their Greatnefs and Wealth to Sodomy or Inceft; others to the proftisuting of their own Wives and Daughters; others to the betraying their Country or their Prince; fome to Poifoning, more to the perverting of Juftee in order to deftroy the innocent: I hope I may be pardoned if thefe Difcoveries inclined me a little to abate of that profound Veneration which I am naturally apt to pay to Perfons of high Rank; who ought to be treated with the utmoft Refpect due to their fublime Dignity, by us their Inferiors.

I had often read of fome great Services done to Princes and States, and defired to fee the Perfons by whom thofe Services were performed. Upon enquiry I was told that their Names were to be found on no Record, except a fêw of them whom Hiftory hath reprefented as the vileft Rogues and Traitors. As to the reft, I had never once heard of them. They all appeared with dejected Looks, and Part III.

He added, that upon the Confidence of fome Merit, this War being at an end, he went to Rome, and folicited at the Court of $A v$ guftus to be preferred to a greater Ship, whofe Cammander had been killed ; but without any regard to his Pretenfions,

it was given to a Youth who had never feen the Sea, the Son of Lilertina, who waited on one of the Emperor's' Miftreffes. Returning back to his own Veffels, he was charged with neglect of Duty, and the Ship given to a Favourite Page of Publicola the Vice-Admiral ; whereupon he retired to a poor Farm, at a great diftance from Rome, and there ened his Life. I was fo curious to know the truth of this Story, that I defired $A$ grippa might be called, who was Admiral in that Fight. He appeared and confirmed the whole Account, but with much more Advantage to the Captain, whole Modefty had extenuated or concealed a great part of his Merit.

I was furprized to find Corruption grown fo high and fo quick in the Empire, by the force of Luxury fo lately introduced, which made me lefs wonder at many parallel Cafes in other Countries, where Vices of all kinds have reigned fo much longer, and where the whole

As every Perfon called up made exactly the fame appearance he had done in the World, it gave me melancholy. On the 21ft of eApril, 17 ri . we failed in the River Clumegnig, which is a Sea-port Town, at the South-Eaft Point of Luggnagg. We caft Anchor within a League of the Town, and made a Signal for a Pilot. Two of them came on board in lefs than Half an Hour, by whom we were guided between certain Shoals and Rocks which are very dangerous in a Paflage to a large Bafin, where a Fleet may ride in fafety within a Cable's Length of the Town Wall.

Some of our Sailors, whether out of Treachery or Inadvertenee, had informed the Pilots that I was a Stranger and $\boldsymbol{x}$ great Traveller, whereof thefe gave notice to a Cuftom-Houfe Officer, by whom I was examined very ftrictly upon my landing. ted with Humanity enough, being mainitained all the time at the King's Charge. I was invited by feveral Perfons, chiefly out of Curiofity, becaufe it was reported that I came from Countries very remote of which they never heard.

I hired a young Man who came in the fame Ship to be an Interpreter; he was a Native of Likgragg, but had lived fome Years at Maldonada, and was a perfect Mafter of both Languages. This is the Court Style, and I found it to be more than matter of form. For upon my Admittance two Days after my arrival, I was commanded to crawl on my Belly, and lick the Floor as I advanced; but on account of my being a Stranger, care was taken to have it fwept fo clean that the Duft was not offenfive. However, this was a peculiar Grace, not allowed to any but Perfons of the higheft Rank, when they defire an Admittance. Neither is there any Remedy, becaufe it is ${ }^{\circ}$ Capital for thofe who receive an Audience to fpit or wipe their Mouths in his Majefty's Prefence. There is indeed another Cuftom, which I cannot altogether approve of. When the King hath a mind to put any of his Nobles to Death in a gentle indulgent manner, he commands to have the Floor frowed with a certain brown Powder, of a deadly Compofition, which being licked up infallibly kills him in twenty-four Hours. But in Jaftice to this Prince's' great Clemency, and the care he hath of his Subjects Lives, (wherein it were much to be wifhed that the Monarchs of Europe would imitate him ) it muft be mentioned for his Honour, that ftrict orders are given to bave the infected parts of the Floor well wafhed after every fuch Execution, which if his Domefticks neglect, they are in danger

I my felf heard him give Directions, that one of his Pages fhould be whipt, whofe turn it was to give notice about walhing the Floor after an Execution, but malicioully had omitted it,' by which Neglect a young Lord of great Hopes coming to an Audience, was unfortunately poifoned, although the King at that time had no defign againft his Life. But this good Prince was fo gracious, as to for. give the poor Page his Whipping, upon promife that he would do fo no more, without fpecial Orders.

To return from this Digreffion; when I had crept within four Yards of the Throne, I raifed my felf gently upon my Knees, and then ftriking my Forehead feven times on the Ground, I pronounced the following Words, as they had been taught me the Night before, Ickpling Glofftbrobb Squutferumm blbiop Mlafhalt, Zwoin twodbalkgufth Slhiophad Gurdlubb eAfbt, This is the Compliment

I freely own my felf to have been ftruck with inexpreffible Delight upon hearing this Account: And the Perfon who gave it me happening to underftand the Balnibarbian Language, which I fpoke very well, I could not forbear breaking out into expreffions perhaps a little too Extravagant. - These Struldlruggs and I would mutually communicate our Obfervations and Memorials through the Courfe of Time, remark the feveral Gradations by which Corruption fteals into the World, and oppofe it in every ftep, by giving perpetual Warning and Infruction to Mankind; which, ataded to the ftrong Influence of our own Example, would' probably prevent that continual Degeneracy of Human Nature fo juflly complained of in all Ages.

What wonderful Difcoveries fhould 'we make in Aftronomy, by outliving and confirming our own Predictions, by obferving the Progrefs and Returns of Comets, with the changes of Motion in the Sun, Moon and Stars.

I enlarged upon many other Topicks which the natural defire of eidlefs Life and fublunary Happinefs could eafily furnilh me with. When I had ended, and

and the Sum of my Difcourfe had been interpreted as before, to the reft of the Company, there was a good deal of Talk among them in the Language of the Country, not without fome Laughter at my Expence. At laft the fame, Gentleman who had been my Interpreter faid, he was defired by the reft to fet me right in a few Miftakes, which I had fallen into through the common Imbecillity of human Nature, and upon that allowance was lefs anfwerable for them. That, this Breed of Struldbruggs was peculiar to their County, for there were no fuch People either in Balnibarbi or fapan, where he had the Honour to be Embaffador from his Majefty, and found the Natives in both thefe Kingdoms very hard to believe that the Fact was pofible, and it appeared from my Aftonifhment when he fiflt mentioned the matter to me, that I received it as a thing wholly new, and fcarcely to be credited. That in the two Kingdoms above mentioned, where during his Refidence he had

converfe very much, he obferved long Life to be the univerfal Defire and Wifh of Mankind. That whoever had one Foot in the Grave, was fure to hold back the other as ftrongly as he could. That the eldeft had ftill hopes of living one Day longer, and looked on Leath as the greateft Evil, from which Nature always prompted him to retreat; only in this Ifland of Luggnagg, the Appetite for living was not fo eager, from the continual Example of the Struldbruggs before their Eyes.

That the Syftem of Living contrived by me was unreafonable and unjuft, becaufe it fuppofed a Perpetuity of Youth, Health, and Vigour, which no Man could be fo foolifh to hope, however extravagant he may be in his Wifhes. That the Queftion therefore was not whether a Man would chure to be always in the Prime of Youth, attended with Profperity and Health, but how he would pafs a perpotual Life under all

the ufual Difadvantages which old Age brings along with it. For although few Men will avow their Defires of being immortal' upon fueh hard Conditions, yet in the two. Kingdoms before-mentied of 'Balnibarbi and Fapan, he obferved that every Man defrred to put off Death for fometime longer, let it approach ever fo late, and he rarely heard of any Man who died willingly, except he were ins cited by the Extremity of Grief or Torture. And he appealed to me whether in thofe Countries I had travelled as well as my own, I had not obferved the fame general Difpofition.

After this Preface he gave me a particular Account of the Struldbruggs among them. He faid they commonly . acted like Mortals, till about thirty Years old, after which by degrees they grew melancholy and dejected, encreafing in both till they came to four-ficore. This. he learned from their own Confeffion; for otherwife there not being above two

or three of that Species born in an Age, were too few to form a general Obfervation by. When they came to fourfcore Years, which is reckoned the Extremity of living in this Country, they had not only all the Follies and Infirmities of other old Men, but many more which arofe from the dreadful Profpects of never dying. They were not only Opinionative, Peevifh, Covetous, Morofe, Vain, Talkative, but uncapable of Friend/hip, and dead to all natural Affection, which never defcended below their Grand-children. Envy and impotent Defires are their prevailing Paffions. But thofe Objects againft which their Envy feems principally directed, are the Vices of the younger fort, and the Deaths of the old. By reflecting on the former, they find themfelves cut off from all poffibility of Pleafure; and whenever they fee a Funeral, they lament and repine that others are gone to an Harbour of Reft, to which they themfelves never can hope to arrive.

They

They have no Remembrance of any thing but what they learned and obferved in their Youth and middle Age, and even that is very imperfect. And for the Truth or Particulars of any Fact, it is fafer to depend on common Traditions than upon their beft Recollections. The leaft miferable among them appear to be thofe who turn to Dotage, and entirely lofe their Memories; thefe meet with more Pity and Affiftance, becaufe they want many bad Qualities which abound in others.

> I f a Struldbrugg happen to marry one of his own kind, the Marriage is diffolved of courfe by the Courtefy of the Kingdom, as foon as the younger of the two come to be four-fcore. For the Law thinks it a reafonable Indulgence, that thofe who are condemned without any Fault of their own to a perpetual Continuance in the World, fhould not have their Mifery doubled by the Load of a Wife.

## $142^{\circ}-2$ VOYAGE

As foon as they have compleated the the term of eighty Years, they are look'd on as dead in Law; their Heirs immediately fucceed to their Eftates, only a fmall Pittance is referved for their Support, and the poor ones are maintained at the publick Charge. After that Pe riod they: are held incapable of any Employment of Trult or Profit, they. cannot puochafe Lands or take Leafes, neither are they allowed to be Witneffes in any Caule, either Civil or Criminal, not even for the Decifion of Meers and Bounds.

- A t Ninety they lofe their Teeth and Hair, they have at that age no Diftinction of Tafte, but eat and drink whatever they can get, without Relifh or Appetite. The Difeafes they were fubject to ftill continuing without encreafing or diminifhing. In talking they forgot the common Appellation of things, and the-Names of Perfons, even of thofe who are their nearef Friends, and

and Relations. For the fame reaton they never can amufe themfelves with reading, becaufe their Memory will not ferve to carry them from the beginning of a Sentence to the end ; and by this Defect they are deprived of the only. Entertainment whereof they might otherwife be capable.

The Language of this Country be' ing always upon the Plux, the Struld bruggs of one Age do not underftand thofe of another, neither are they able after two hundred Years to hold any Converfation (farther than by a few general Words) with their Neighbours the Mortals, and thus they lye under the Difadvantage of living like Foreigners in sheir own Country.
$\mathrm{T}_{\mathrm{H}}$ is was the Account given me of the Struldbruggs, as near as I can remember. I afterwards faw five or fix of different Ages, the youngeft not above two hundred Years old, who were brought

brought me at feveral times by forme of my Friends; but although they were told that I was a great Traveller, and had feen all the World, they had not the leaft Curiofity to ask me a Queftion; only: defired I would give them Slumskudask, or a Token of Remembrance, which is a modeft way of begging, to avoid the Law that ftrictly forbids it, because they are provided for by the Pablick, although indeed with a very fcanty Allowance.

They are deprived and hated by. all fort of People; when one of them is born, it is reckoned ominous, and their Birth is recorded very particularly; fo that you may know their Age by confulting the Regiftry, which however hath not been kept above a thoufand Years part, or at leapt hath been deftroyed by time or publick Difturbances. But the ufual way of computing how old they are is by asking them what Kings or great Perfons they can remember, and then

then confulting Hiftory, for infallibly the laft Prince, in their Mind, did not begin his Reign after they were fourfore Years old.

They were the molt mortifying Sight I ever beheld, and the Women more horrible than the Men. Befides the ufual Deformities in extreme old Age, they acquired an additional Ghaftlinefs in Proportion to their Number of Years, which is not to be defcribed, and among half a Dozen I foon diftinguifhed which was the eldeff; although there was not above a Century or two between them.

The Reader will eafily believe, that from what I had heard and feen, my keen Appetite for Perpetuity of Life was much abated. I grew heartily alhamed of the pleafing Vifions I had formed, and thought no Tyrant could invent a Death into which I would not run with Pleafure from fuch Part III. L a Life

a Life. The King heard of all that had paffed between me and my Friends upon this Occafion, and rallied me very. pleafantly, wifhing I would fend a Couple of Struldbruggs to my own Country, to arm our People againft the Fear of Death; but this it feems is forbidden by the fundamental Laws of the Kingdom, or elfe. I fhould have been wefl content with the Trouble and Expence of tranf porting them.

I could not but agree that the Laws of this Kingdom, relating to the Strulabruggs, were founded upqn the ftrongeft Reafons, and fuch as any other Country would be under the Neceffity of enacting in the like Circumftances. Otherwife, as Avarice is the neceffary Confequent of old Age, thofe Immortals would in time become Proprietors of the whole Nation, and engrofs the Ci vil Power, which, for want of Abilities to manage, mult end in the Ruin of the Pubick.

The Autber leaves Luggnagg, and fails to Japan. From thence be returns in a Dutch Ship to Amfterdam, and from Amfterdam to England.

THOUGHT this Account of the Struldbruggs might be fome Entertainment to the Reader, becaufe it feems ta be a little out of the common Way, at leaft, $I$ do not remember to have inet the like in any Book of Travels that hath come to my Hands: And if I am deceived, my Excufe muft be, that it is neceffary for Travellers, who defcribe the fame Country, very often to agree in dwelling on the fame Particulars, without deferving the Cenfure of having borrowed or tragfcribed from thge who wrote before them.

There is indeed a perpetual Commerce between this Kingdom and the L 2 great
great Empire of Fapan, and it is very probable that the Fapanefe Authors may have given fome Account of the Struldbruggs ; , but my Stay in 7 apan was fo fhort,' and I was fo intirely a Stranger to that Language, that I. was not qualified to make any Enquiries. But I hope the Dutch; upon this Notice, will be curious and able enough to fupply my Defects.

His Majefty having often preffed me to accept fome Employment in his Court,' and finding me abfolutely determined to return to my Native Country, was pleafed to give me his Licence to depart, and honoured me with a Letter of Recommendation under his: own Hand to the Emperor of fapan. He likewife prefented me with tour hundred forty four large Pieces of Gold (this Nationdelithting ineven Numbers) and a red Diamond, which I fold in England for eleven hưndred Pounds.
$\mathrm{ON}_{\mathrm{N}}$ the fixth Day. of May, 1709, I took a folemn Leave of his Majefty, and
and all my Friends. This Prince was fo gracious, as to order a Guard to conduct me to Glanguenfald, which is a Royal Port to the South-Weft Pait of the Illand. . In fix Days I found a Veffel ready to carry me to Fapan, and fpent fifteen Days in the Voyage. We landed at a fmall Port-Town called Xamofchi, fituated on the SouthEaft Part of $7 a p a n$; the Town lies on the Weftern Point, where there is a narnow Streight, leading Nortbward into a long Arm of the Sea, upon the NorthWeft Part of which Yedo, the MetropoJis, ftands. As. Landing, I hewed the Cultom-houfe OOfficers my Letter from the King of Luggnagg to his Imperial Majefty. They knew the Seal perfectly well; it was as broad as the Palm of my Hand. The Impreftion was, $\boldsymbol{A}$ King lifting up a Lame Beggar from the Earth. The. Magiftrates of the Town hearing of my Letter, received me as a Publick Minifter; they provided me with Carriages and Servants, and bore my Charges to Yedo, where 1. was admitted to an Audience, and deli-

delivered my Letter, whicl "was opened with great Ceremony, and explained to the Emperor by an Interpreter, who then gave me notice; by his Majefty's Order, that I fhould fignify my Requeft, and whatever it were, it fhould be granted for the fake of his Royal Brother of 'Luggnagg. This Interpreter was a Perfon employed to tranfact Affairs with the HolLanders; he foon conjectured by my Countenance that I was an Europear, and therefore repeated his 'Majefty's Commands in Low-Dutch, which he fpoke perfectly well. I anfwered, (as I had before determined,) that I was a Dutch Merchant, fhipwrecked in a very remote Country, from whence I travelled by Sea and Land to Luggnagg, and then took Shipping for 7apan, where I' knew my Countrymen often traded, and with fome of thefe I hoped to get an Opportunity of returning into Earope: I therefore moft humbly entreated his Royal Favour to give Order, that I fhould be conducted in Safety to Nangafac: To this I added another Petition,

tion, that for the fake of my Patron the King of Luggnagg, his !Majefty would condefcend to excufe my performing the Cerernony impofed on my Countrymen of trampling mpan the Crucifix, becaufe I had been thrown into his Kingdom by my Misforturles, without any Intention of Trading. When this latter Petition was interpreted to the Emperor, lie feemed a little furprized, and faid, he believed I was the firft of nay Countrymen who ever made any Scruple in this Point, and that he began to doubt whether I was a real Hotlander, or no, but rather fufpected I muft beachristian. However, for the Reafons I had offered, but chiefly mo gratify the King of Luggnagg, by an uncommon Mark of his Favour, he would comply with the Singularity of my Humour ; but the Affair muft be managed with Dexterity, and his Officers fhould be commanded to let me pafs, as it were, by Forgetfalnels. For he affured me, that if the Secret fhould be difcovered by my Countrymen, the Dutch, they would cut my Throat in the

the Voyage. I returned my Thanks by the Interpreter, for fo unufual a Favour, and fome Troops being at that Time on their March to Nangafac, the Commanding Officer had Orders to convey me fafe thither, with particular Inftructions about the Bufinefs of the Crucifix.
$\mathrm{On}_{\mathrm{s}}$ the 9th Day of 7une, 1709. I arrived at Nangafac, after a very long and troublefome Journey. I foon fell into Company of fome Dutch Sailors, belonging to the 1 Imboyna of Amfterdam, a ftout Ship of 450 Tuns. ' I had lived long in Holland, purfuing my Studies at Leyden, and I fpoke Dutch well. The Seamen foon knew from whence $\mathbf{I}$ came laft; they were curious to enquire into my Voyages and Courfe of Life. I made up a Story as fhort and probable as I could, but concealed the greateft Part. I knew many Perfons in Holland; I was able to invent Names for my Parents, whom I pretended to be oblcure People in the Province of Gelderland. I would have given the Captain

Before we took shipping, I was often asked by fome of the Crew, whether I had-performed the Ceremony above-mentioned: I evaded the :Queftion by general Anfwers, that I hat fatisfied the Emperor and Court in all Particulars However; a malicious Rogue of a Skipper went to an Officer, and pointing to me, told him, I had not yek traxpledd on tbe Cricifix: But the other, who had received Infructions to let me pafs, gave the Rafcal twenty Strokes on the Shoulders with a Bamboo, after which I was no more troubled with fuch Queftions.

Nothing happened worth mentioning in this Voyage. We failed with a fair Wind to the Cape of Clood Hope, where we ftaid only to take in frefh Water. On the 16 th of April we arrived

rived fafe to Amferdam, having loft only three Men by Sicknefs in the Voyage, and a fourth who fell from the Fore-maft into the Sea, not far from the Coaft of Guinea. From Amfferdam I foon after fet fail for England, in a fhall Veffel belonging to that City,

On the 10th of April, 1710, we put in at the Downs. I landed the next Morning, and faw once more my native Country, after an Abfence of five Years and fix Months compleat. I went frait to Redriff, where I arrived the fame Day at Two in the Afternoon, and found my Wife and Family in good Health.

On the Sixteenth, he was parted from us by a Storm; I heard fince my Return, that his ship foundered, and none efcaped, but one Cabbin-Boy. He was an honeft Man, and a good Sailor, - but a little too pofitive in his own Opinions, which was the Caufe of his Deftruction, as it hath been of feveral others. For if he bad followed my Advice,

## the Hoxyhnunms

Advice, he migho have been 'fafe at', home with his Family at this Time, as well as myfulf.:
I. fAD feveral Men died in my Ship of Calentures, fo that I was forced to get Recruits out of Barbadoes, and the Leeteard Iflands, where I touched bythe Direetion of the Merchants who employed me, which I had foon too mukh caule to repent ; for I found afterwards that moft of them had been Bucaneers. I had Fifty Hands oin boârd, and my Orders wete; that is fhould trade with the Trutians, in the Soultbisea; and make what Diftoveries F cóoulas. Thefe Rogues whom I häd pickeed up debauctied my other Menj and tidey ald formed atconfpiracy to feize the ship and 9 recture me; which, they did one Morfing, rufhing into my Cabbin, and bindifg me Hand and Foor, threatning to throw me over-board, if I offered to fitir. I told them, I was their Prifonet, and would fubmit: This they made me fweat to B 2 do,

do, and then they unbound me, only faftening one of my Legs with a Chain near my Bed, and placed a Centry at my Door with his Piece charged, who was commanded to fhoot me dead, if I attempted my Liberty. They fent me down Vituals and Drink, and took the Government of the Ship to themfelves. Their Defign was to turn Pyrates; and plunder the Spaniards, whịch they could not do, till they got more Men. But firft they refolved to fell the Goods in the Ship, and then go to Madagafcar for Recruits, . feveral among them having died fince my Confinement. They failed many Weeks, and traded with the Indians, but I knew not what Courfe they took, being kept a clofe Prifonep in my Cabbin, and expecting nothing lefs then to be murdered, as they often threatned me.

Upon the Ninth Day of May 1711. one Fames Welch came down to my Cabbin; and faid he had Orders from

the Captain, to fet ma a-fhore. I expoftulated with him, but in vain; neither "would he fo much as tell me who their new Captain was. They forced me into the Long-boat, letting me put on my beft Suit of Cloaths, which were ás good as New, and a fmall Bundle of Linnen, but no Arms except my Hanger ; and they were fo civil as not to fearch my Pockets, into which I con: veyed what Money I had, with fome other little Neceflaries. They rowed about a League; and then fet me down on a Strand. I defired them to tell me, what Country it was. They all fwore, they knew no more than myfelf, but faid, that the Captain (as they called him) was refolved, after they had fold the Lading, to get rid of me in the firft Place, where they could difover Land. They pufhed off immediately, advifing me to make hafte, for fear of being overtaken by the Tide, and fo bad me Farewell.

6 Votage to:

In this defolate Condition I advanced forward, and foon got upon firm Ground, where I fate down on a Bank to reft myfelf, and confider what I had beft ta do. When I was 2 little refrehned, I went up into.the Country, refolving to deliver myfelf to the fritt Savages I hould meet, and purchafe my Life from them by fome Bracelets, Glafs-rings,: and other Toys, which Sailors ufually provide themfelves with in thofe Voyages, and whereof I had fome about, me: The Land was divided by long Rows of Trees not regularly planted, but naturally grow-ing:- there was great plenty of Grafs, and feveral Fields, of Oats. I walked very circumfeectly for fear of being furprized, or fuddenly fhot with an Arrow from, behind or on either fide. fell ; into, a beaten Road, where I faw mani Tracks of human Feet, and fome of Cows, but moft of Horfes. Some of them coming forward near the place where I lay, gave me an Opportunity: of diftinctly marking their Form. Their Heads and Breafts were covered with a thick Hair, fome frizled and others lank, they had Beards like Goats; and a long ridge of Hair down their Backs and the fore-parts of their Legsand Feet, but the reft of their Bodies were bare fo that I might fee their Skins, which were of a brown buff Colour. They had no Tails, nor any Hair at all on their Buttocks, except about the Anus' which, I prefume, Nature had placed there to defend them as they fate on the Ground ; for the Pofture they ofed as well as lying dôwn, and often frood on their hind Feet. The Females were not fo large as the Males, they had long lank Hair on their Faces, nor any thing more than a fort of Down on the reft of their Bodies, except about the Anus, and pudenda. Their Dugs hung between their Fore-feet, and often reached almoft so the Ground as they walked. The Hair of both Sexes was of feveral Colours, brown, red, black and yallow. Upon the whole, I never beheld in all my Travels fo. difagreeable an Animal nor one againft which I naturally conceived fo ftrong an Antipathy: So that thinking I had feen enough,' full of Contempt and Averfron, I got up and purfued the beaten Road, hoping it might direat me to the Cabbin of fome Indian. But I drew my Hanger, and gave him a good Blow with theflat Side of it, for I durft not ftrike him with the Edge, fearing the Inhabitants might be provoked againft me, if they fhould come to know, that I had killed or maimed any of their Cattle. When the Beaft felt the fmart, he drew back, and roared fo loud, that a Herd of at leaft forty came flocking about me from the next Field, houling and making odious Faces; but I ran to the Body of a Tree, and leaning my Back againft it, kept them off, by waving my Hanger. THE/Reader may pleafe to obferve, that the following Extract of many Converfations I had with my Mafter, contains a Summary of the moft material Points, of which were dif: courfed at feveral times for above Two Years; his Honour eften defiring fuller Satisfaction as I father improved in the Houybnbnm Tongue. I laid before him, as well as I could, the whole State of Europe; I difcourfed of Trade $\therefore: i, 1$ and

and Manufactures, of Arts and Seiv ences; and the Anfwers I gave to all the Queftions he made, as they arofe. upon feveral Subjects, were a Fund of Converfation not to be exhaufted. But I fhall here only fet down the subftance of what paffed between us cencerning my own Country, reducing it into Order as well à I can, without any Regard to Time or ocher Circumftances, while I furetly adhere to Truth. My only Concern is, that I fhall bardly be able to do Joftice to my Maftert Arguments and Expreffions, which muft nteds faffer by my want of capacity, as well as by a Tranflation into our barbad rous Exslijh.

Is Obedience therefore to his Hot nour's Commands, I related to him the Revolution under the Prinoe of Oramere, the long War with France entered into by the faid Prince, and renewed by his succeffor tha prefent Quden, whercia the greateft Powers of Cbriftexdom were engaged

He asked me what were: the ufual: Caufes or Motives that , made: one Country go to War with another. I anfwered they were innumerable, but I thould only mention a few of the chief. Sometimes : the Ambition :of Princes ${ }_{2}$ : who never think they have! Neither are any Wars fo furious and bloody, or of fo long Contintuance, as thofe occafioned by Difference in Opinion, efpecially if it be in things indifferent.

Sometimes.the Quarrel between two Princes is to decide which of them fhall difpoffefs a: Third of his Dominions, where' neither of them pretend to any • Right, . Sometimes one Prince quarrelleth with another, for fear the other fhould quarrel with him. Sometimes a War is entered upon, becaufe the Enemy is too ftrong, and fometimes becaufe he is too reeak. Sometimes our Neighbours want the Things which we bave, or bave the Things which we want; and we both fight, till they take

take ours or give us theirs It is d very juftifiable Caufe of War to invald a Country fiter the People have beet mafted by Fanine, deftroyed' by Peftilance, of embroiled by Factions among, thenfolves. It is joftifiable to enter into War againft our neareft Ally, whem one of his Towns lies convenient for the, or a Territory of Lania, that would rent der our Dominions tound and compleat. If a Prince fends Forces inso a Nation, where the People are poor and ignorant, he may lawfully put half of them to Death, and make Slaves of the reff, in order to civilize and reduce them from their barbarous Way of Liw ing. It is a very kingly, honourabie, and frequent Practice, when one Prince defires the Affiftance of andother to focure him againit an Invafion, that the Affiftant, when be hath driven out the Invader, fhould feize on the Domiph ons himfelf, and kill, imprifoin or benilh the Prince he came to relieve, Allyance by Blood or Marriger, is a frequẹt

## the Houyhnhnms. 65

frequant Caufe of War between Princes, and the nearer the Kindred is, the greater is their Difpofition to quarrel : Poor Nations are bungry, and rich Nations are proud, and Pride and Hunger will ever be at Variance. For thofe Reafons, the Trade of a Soldier is held the moft honourable of all others: Becaufe a Soldier is a Yaboo hired to kill in cold Blood as many of his own Species, who have never offended him, as poflibly he can.

There are likewife another Kind of Princes in Europe, not able to make War by themfelves, who hire out their Troops to richer. Nations, for fo much a Day to each Man; of which they keep three fourths to themfelves, and it is the beft part of their Maintenance; fuch are thofe in many Northern Parts of Europe.

What you have told me, (faid my Mafter) upon the Subject of War, does Partiv. F indeed

Then as to the Claws upon your Feet before and belind, they are fo fhort and tender that one of our Yaboos would drive a dozen of yours before him. And therefore in recounting the Numbers of thofe who have been killed in Battle, I cannot but think that you have faid the Thing that is not.

I could not forbear fhaking my Head and fmiling a little at his Ignorance. And being no Stranger to the Art of War, I gave him a Defcription of Cannons, Culverins, Muskets, Carabines $_{2}$ Piftols, Bullets, Powder, Swords,

Death under Horfes Feet; Flight, Purfuit, Vittory; Fields ftrewed with Carcafes left for Food to Dogs, and Wolves, and Birds of Prey; Plundering, Stripping, Ravifhing, Burning, and Deftoying. And to fer forth the Valor of my own dear Countymen, I affured him, that I had feen them blow up a Hundred Enemies at once in a Siege, and as many in a. Ship, and beheld the dead Bodies come down in pieces from the Clouds, to the great Diverfion of the Spectators.

I was going on to more Particulars, when my Mafter commanded me Silence. He faid, Whoever underftood the Nature of raboos might eafily believe it poffible for fo vile an Animal,

to be capable of every Action I had named, if their Strength and Cunning equalled their Malice. But as my Difcourtfo had increafed his Abhorrence of the whole Speicies, fo he found it gave him a Difturbance in his Mind, to which he was wholly a Stranger before. He thought his Ears being ufed to fuch aböminable Words, might by Degrees admit them with lefs Deteftation. That although he hated' the raboos of this Country, yet he no more blamed them for their odious Qualities, than he he did a Grnayb (a Bird of Prey) for its Cruelty, or a fharp Stone for cutting my Hoof. But when a Creature pretending to Reafon, could be capable of fuch Enormities, he dreaded left the Corruption of that Faculty might be worfe than Brutality itfelf. He added, That he had heard too much upon the Subject of War, both in this, and fome former Difcourfes: There wats, another Poine which a little perplexed him at prefent. I had informed him, that fome of our Crew left their Country on account of being ruined by Laze; that I had already explained the mdaning of the Word; but he was a Lofs how it Ibould eome to pafs, that the 'Lawe which: was in-t-nded for every. by following the Diftates of Nature and Reafon, which are fufficient Guides for a Reafonable Animal, as we pretended to be, in fhewing us what we ought to do, and what to avoid.

I assured his Honour, that Laze was a Science wherein I had not mueh converfed, having little more Knowledge of it than what I had obtained by employing Advocates, in vain, upon fome .Injuftices that had been done. me, and by converfing with fome others who by the fame Method had firft loft their Subftance, and then left their own Country under the Mortification of fuch Diappointments. however I would give him all the Satisfaction I was able.

I said that thofe who made profeffion of this Science were exceedingly mutielied, being almolt equal to the Caterpillars in Number; that they were of divers Degreis, Diftinctions, and Denominations: The Numeroufnefs of thofe

thofe that dedicated themfelves to this Profeflion were fuch that the fair and juftifiable Advantage and Income of the Profeflition was not fufficient for the decent and hạndfome Maintenance of Multitudas of thofe who followed it. Hence it came to pafs that it was found needfull to fupply that by Artifice and Cun: ning, which could not be procured by juft and honeft Methods: The better to bring which about, very many Men among us were bread up from their Youth in the Art of proving by Words multiplied for the Purpofe that Whate. is Black, and Black is Wbite, according as they are paid. The Greatnefs of thefe Mens Affurance and the Boldnefs of ther Pretenfions gained upon the Opinion of the Vulgar, whom in a Manner they made Slaves of, and got 'into' their Hands much the larger Share of the Practice of their Profeffion. Thefe Practitioners were by Men of Difcernment called Pettifoggers, (that is, Con. founders', or rather, Defrajers of Right,)

as it was my ill Hap as well as the Misfortune of my fuffering Acquaintance to be engaged only with this Species of the Profeffion. I defired his Honour to underftand the Defcription I had to give, and the Ruin I had complained of to relate to thefe SeCtaries only, and how and by what means the Misfortunes we met wlth were brought upon us by the Management of thefe Men, might be more eafily conceived by explaining to him their Method of proceeding, which could not be better done than by giving him an Example:

My Neighbour, faid I, I will fuppofe, has a mind to my Coze, he hires one of thefe Advocates to prove that he ought to have my Coze from me. I muft then hire another of them todefend my Right, it being againft all Rules of Laze that any Man fhould be allowed to fpeak for himfelf. Now in this cafe, I who am the Right Owner lie under two great Difadvantages. Firft, ply Advocate, being' as I faid

## the Houyhnhnms. 73

faid before practifed almoft from his Cradle in defending Falfhood, is quite out of his Element when he would argue for Right, which as an Office unnatural he attempts with great Awkwardnefs, if not with an Ill-will. The Second Difadvantage is that my Advocate mult proceed with great Caution; for, fince the Maintenance of to many depend on the keeping up of Bufinefs, Should he proceed too fummarily, if he does not incur the Difpleafure of his Superiors, he is fure to gain the Ill-wih and hatred of his Brethren, as being by them efteemed one that would leffen the Practice of the Law. This being the Cafe, I have but two Methods to preferve my Coze. The firft is, to gain over my Adverfary's Advocate with a double Fee; from the Manner and Defign of whofe Education before mentioned it is eafy to expect he will be induced to drop his Client and let the Ballance fall to my Side. The Second Way is for my Advocate not to

infift on the Juftice of my Caufe, : by allowing the Cow to belong to my Adverfary; and this if it be dexteroully and skilfully done will go a great. Way towards obtaining a favourable Verdict, it having been found, from a careful Obfervation of Iffues. and Events, that the wrong Side, under the Management of fuch Practitioners, has the faiter Chance for fuccefs, and this more efpecially if it happens, as it did in mine and my Friend's Cafe, and may have done fince, that the Perfon appointed to decide all Controverfies of Propriety as well as for the Tryal of Criminals, who fhould be taken out of the moft knowing and wife of his Profeffion, is by the Recommendation of a great Favourite, or Court-Miftrefs chofen out of the Sect before mentioned, and fo, having been under a ftrange Biafs all his'Life againft Equity and fair dealing, lies as it were under a fatal Neceffity of favouring, fhifting, double dealing and Oppreffion, and befides through Age,

In fuch Cafes, the Decifions and Determinations of Men: : $f=$ bred, and fo qualified, may with Reafon be expected on the wrong fide of the Caufe fince thofe who can take Harangue and Noife, (if purfued with Warmth, and drawn out into a Length;) for Reafoning, are nbt much to be wondered at, if they infer the weight of the Argument from the heavinefs of the Pleading.

It is a Maxim among thefe Men, That whatever has been done before may legally be done again: And therefore they take fipecial Care to record all the Decifions formedy made; even thofe which have thirough i.Ignorance or Corituption contridided. the Rules of common Juftice and the gene-

In pleading, they ftudioully avoid entring into the Merits of the Caufe; but are loud, violent and tedious in dwelling upon all Circumftances which are not to the Purpofe. For Inftance, in the Cafe already mentioned; They never defire to know what Claim or Title my Adverfary had to my Core, but whether the faid Cowe were Red or Black, her Horns long or fhort; whether the Field I graze her in be round or fquare, whether fhe was milked at home or abroad, what Difeares the is fubject to, and the like; after which they confult Precedents, adjourn the Caufe, from Time to Time.

In the Tryal of Perfons accufed for Crimes againft the State the Method is much more fhort and commendable: For if thofe in power, who know well how to choofe Inftruments fit for their Purpofe, take care to recommend and promote out of $\cdot$ this Clan a proper Per-' fon,

A grand Debate at the General Aljembly of the Houyhnhnms, and bowe it reas" determined.' The Learning of the Houyhnhnms. Their Buildings. Their manner of Burials. The De " fettivenefs of their Language.

ONE of thefe Grand Affemblies was held in my time, about threé Months before my Departure, whither my Mafter went as the Reprefentativo of our Diftrict. In this Council was refumed their old Debate, and indeed; the only Debate that ever happened in that Country; whereof my Mafter after his Return gave me a very particular Account.

[^5]
## the Houyhnhnms. 'I33

The Queftion to be debated, was, Whether the Yaboos fhould be extirminated from the Faoe of the Earth? One of the Menbers for the Affirmative offered feveral arguments of great Strength and Weight, alledging, That as the raboos were the moft filthy; noifome, and deformed Animal which Nature ever produced; fo they were the mof reftive and indocible, mifchievous and malicious: 'They would privately fuck the Teats of the Honybibinms Cows, kill and devour their Cats, trample down their Oats and Grafs, if they were not continually watched, and commit a thoufand other Extravagancies. He took notice of a general Tradition, That Yaboos had not been always in that Country: But, that many Ages ago, two of theife Brutes appeared togéther upon a Mountain, whether produced by the Heat of the Sun upon corrupted Mud and Slimé, or from the Ooze or Froth of the Sea, K 3 was

That the Honybubnms to get rid of this Evil, made a general. Hunting, and at laft enclofed the whole Herd, and deftroying the old Ones, every Houybzbnnz kept two young Ones in a Kennel, and brought them to fuch a degre of Tamenefs, as an Animal fo favage by Nature can be capable of acquiring; ufing them for Draught and Carriage That there feemed to be much Truth in this Tradition, and that thofe Creatures could not be Mlubniauzhy (or Aborigines of the Land) becaufe of the violent Hatred the Houybubnms, as well as all other Animals, bore them; whicla al: though their evil Difpofition fufficiently deferved, could never have arrived at fo high a Degree, if they had been Aborigines, or elfe they would have long fince been rooted out. That the Ini. habitants, taking. a Fancy to ufe the Service

Several others declared their Sentiments to the fame purpofe, when my Mafter propofed an Expedient to the Affembly, whereof he had indeed borrowed the Hint from me. He approved of the Tradition, mentioned by the Honourable Member, who spoke before, and affirmed, that the Two Yaboos faid to be firt feen among them had been driven thither over the Sea; that coming to Land, and being forfaken by their Companions, they retired to the Mountains, and degenerating by degrees, became in procefs of time, much

But he was pleafed to conceal one Particular, which related perfonally to myfelf, whereof I foon felt the unhappy Effect, as the Reader will know in its proper Place; and from whence I date all the fucceeding Misfortunes of my Life.

The Honybubnums have no Lettars, and confequeatly, their Knowledge is all Traditional. But there happening few Events of any Moment among a People fo well united, naturally difpofed to every Virtue, wholly governed by Reafon, and cut off from all Commerce with other Nations, the Hiftorical Part is eafily preferved without burthening their Memory. I have atready obferved, that they are subject to no Difeafes, and therefore can have

I complied at laft, finding $I$ could not do better. I left Lisbon the 24th Day of November, in an Englifh Merchant-Man, but who was the Mafter I never enquired. Don Pedro accompanied me to the Ship, and lent me Twenty Pounds. He took kind leave of me, and embraced me at parting, which I bore as well as I could. During the laft Voyage I had no Commerce with the Mafter or any of his Men, but pretending I was fick kept clofe in my Cabbin. On the Fifth of December, 1715. we caft Anchor in the Downs about Nine in the Morning, and at Three in the Afternoon I got fafe to my Houfe at Rotherbith.

My Wife and Family received me with great Surprize and Joy, becaufe N 3 they

they concluded me certainly dead; but I muft freely confets the fight of them filled me only with Hatred, Difguft and Contempt, and the more by reflecting on the near Alliance I had to them. For, although fince my unfortunate Exile from the Houybnbnm Country, I had compelled myfelf to tolerate the Sight of Yaboos, and to converfe with Don Pedro de Mendez; yet my Memory and Imaginations were perpetually filled with the Virtues and Ideas of thofe exalted Houybubnnss. And when I began to confider, that by copulating with one of the Taboo-Species I became a Parent of more, it ftruck me with the utmoft Shame, Confufion and Horror.

As foon as I entered the Houfe, my Wife took me in her Arms, and kiffed me; at which having not been ufed to the Touch of that odious Animal for fo many Years, $I$ fell in a Swoon for almolt an Hour. At the Time I am writing

To this hour they dare not prefume to touch my Bread, or drink out of the fame Cup, neither was I ever able to let one of them take me by the Hand. The firt Money I laid out was to buy two young Stone-Horfes which I keep in a good Stable, and next to them the Groom is my greateft Favourite; for I feel my Spirits revived by the Smell he contracts in the Stable. My Horfes underftand me tolerably well ; I converfe with them at leaft four Hours every Day. They are Strangers to Bridle or Saddle, they live in great Amity with me, and Friendathip to each other.

It is eafy for us who travel into re: mote Countriss, which are feldom vifited by Exiglifhmen or other Europeans; to form Defrriptions of wonderful Animals both at Sea and Land. I have perufed feveral Books of Travels with great Delight in my younger Days; but having fince gone over moft Parts of the Globe, and been able to coitradict many fabulous Accounts from my own Obfervation, it hath given me a great Difguft againft this Part of Reading, and fome Indignation to fee the Credulity of Mankind fo impudently abufed. Therefore fince my Acquaintance were pleafed to think my poor Endeavours might not be unacceptable to my Country, I impofed on myfelf as a Maxim, never to be fwerved from, that I would frictly adbere to Truth; neither indeed can I be ever under the leaft temptations to vary from it, while I retain

I know very well how little Reputation is to be got by Writings which require neither Genious nor Learning, nor indeed any other Talent, except a good Memory, or an exat Fournal. I know likewife, the Writers of Travels, like Difionary-Makers, are funk into Oblivion by the Weight and Bulk of thofe who come after, and therefore lie uppermoft. And it is highly probable, that fuch Travellets who ihall hereafter vifit the Countries defcribed in this Work of mine, may by deteCting my Errors, (if there be any) and adding many new Difcoveries of their

This indeed would be too great a Mortification if I wrote for Fame: But, as my fole Intention was the Publick Good, I cannot be altogether difappointed. For who can read of the Virtues I have mentioned in the Glorious Houybubnms, without being afhamed of his own Vices, when he confiders himfelf as the reafoning, governing Animal of his Country? I fhall fay nothing of thofe remote Nations where Caboos prefide, amonglt which the leaft corrupted are the Brobdingnagians, whofe wife Maxims in Morality and Government, it would be our Happinefs to obferve. But I forbear defcanting farther, and rather leave the Judicious Reader to his own Remarks and Applications.

I have carefully avoided every Fault with which com. mon Writers of Travels are often too juftly charged. Befides, I meddle not with any Party, but write without Paffion, Prejudice, or Ill-will againft any Man or number of Men whatfoeiver. I write for the nobleft End, to inform and inftruct Mankind, over whom I may, without Breach of Modefty, pretend to fome Superiority from the Advantages I received by converfing fo long among the moft accomplifhed Houybnbnms. I write without any view towards Profit or Praife. I never fuffer a Word to pafs that may look like Reffection, or poffibly give the leaft Of. fence even to thofe who are moft ready to take it. I-confess, it was whifpered to me, that I was bound in Duty as a Subject of England, to have given in a Memorial to a Secretary of State at my firft coming over; becaufe whatever Lands are difcovered by a Subject, belong to the Crown. But I doubt whether our Conquefts in the Countries I treat of, would be as eafy as thofe of Ferdinando Cortez over the naked Americans. The Lilliputians I think are hardly worth the Charge of a Fleet and Army to reduce them, and I queftion whether it might be prudent or fafe to attempt the Brobdingnagians.Or whether an Emglifh Army would be much at their eafe with the Flying Illand over their Heads.
