**Julius Simon and Harry Germanow, Co-founders**

**G-S Supplies, Inc.**, originally known as Germanow-Simon Machine Company, was founded in 1916 by Julius Simon and Harry Germanow in Rochester, New York. We are a third generation woman-owned business that continues to pride itself on the production and distribution of quality precision products and excellent customer service.

G-S Supplies is a manufacturer and distributor of plastic and glass watch crystals in a wide range of stock sizes, styles and materials, used for watch repair, jewelry design and gauge repair. We offer custom design and manufacturing services for watch crystals, clocks, lockets, pendants, fine jewelry, gauge windows, technology and industrial devices. We pride ourselves on finding creative design solutions in mineral glass, sapphire, Gorilla® and soda lime glass, acrylic and other materials. Additional product lines include G-S Hypo precision applicator adhesives, magnifiers and precision tools for artisans, hobbyists and watchmakers.

G-S products are distributed worldwide into multiple industries: Watch and Jewelry Repair, Gauge Manufacturing and Repair, Watch and Jewelry Design, Beading, Hobby and Craft, Hardware, Precision Assembly, Wearable Technology, Optical, Aeronautics and Camera Repair.

As we begin our second century of manufacturing, we hope that this catalog will continue to serve as a definitive reference tool for the watchmaking, jewelry making and repair industries. Please see our website, [www.gssupplies.com](http://www.gssupplies.com), for additional information about our products and services.

G-S Cylinder, Flat Fancy and PA style crystals are manufactured from optical quality plastic material. For information about mineral glass and sapphire crystals, see the Mineral Glass and Custom Manufacturing sections.

Crystals marked with a  are items which have limited availability. Customers will be informed when an ordered crystal is unavailable.

Crystals are sequenced by shape and size. Please note that there is no separate flanged crystal section. Flanged crystals are in rotation with crystals without flanges.

Crystals which are similar in shape are cross-indexed in multiple sections of the catalog. For unusual geometric shapes, refer to the CF Cylinder Fancy section.

## VINTAGE CRYSTALS

This e-catalog displays plastic watch crystals that can be used as replacement crystals for vintage, classic and new watch brands and styles. If an exact replacement crystal cannot be found, many times there is a size that is similar and can be modified to fit the case. In addition, G-S has maintained an extensive inventory of vintage forming tools for plastic crystals produced before 1950. These crystals are manufactured by hand and can be purchased by special order. The 1952 vintage crystal catalog displays these vintage crystals and is available for purchase (photocopy).

G-S Supplies, Inc. offers custom manufacturing services for many applications:

- Jewelry Design
  - Locket Covers
  - Pendants
  - Mountings
- Watch Crystals, gaskets and related components
- Wearable Technology
- Clock Glass
- Gauge and Instrument Windows
- Readout Display Windows

**Let your imagination come alive in almost any shape and size:** Round, flat, domed, geometric or abstract.

**Special features available:** Polished, beveled, faceted, magnifying, tinted, printed, etched, coated (anti-reflective, UV, AF, hard coatings)

**Common Materials:**

• **Mineral Glass**

G-S Mineral Glass is a Swiss-grade chemically hardened material. It has a beautiful reflective quality and the hardening process makes it both scratch and impact resistant. Mohs hardness: 5

• **Sapphire Glass**

Luxury watches and jewelry designs utilize Sapphire glass, as it has a brilliant reflective quality and is extremely impact and scratch resistant. Mohs hardness: 9

• **Corning® Gorilla® Glass**

Gorilla® Glass is not only chemically strengthened — its atomic configuration is formulated so that the glass is more durable, and fundamentally tougher and more damage resistant. Often used for technology or industrial applications. Mohs hardness: 6.5

• **Optical Quality Plastic**

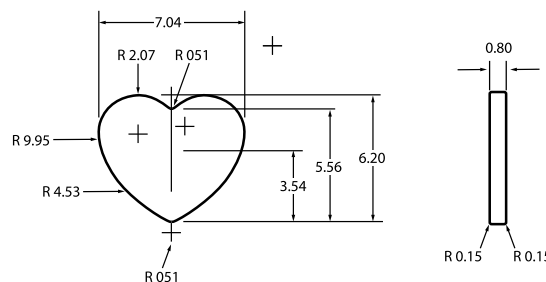

Optical-grade acrylic and other plastic materials are used to manufacture watch crystals, gauge windows and jewelry components, and to cut flat designs with CNC machinery. Only the highest quality optically clear material is used.

**Production quantities from prototypes to large volume orders.**

- Mineral glass, Sapphire, Soda Lime, Gorilla® Glass and other: Prototype orders or production quantities.
- Plastic: Dependent on design.

**To have a custom design quoted:**

- Please provide G-S with an engineering drawing or a sketch showing all dimensions in millimeters. Our design review process includes an engineering review for manufacturability, recommendations for design revisions (if necessary) and a detailed quote.
- Reverse engineering services available.
