

Bringing the world's biggest problem to the world's highest court:

the World's Youth for Climate Justice ("WYCJ") is seeking an Advisory Opinion from the International Court of Justice, to contribute to the progressive development of international law on human rights and the climate crisis. The WYCJ is seeking the support of state and non-state actors in a bid to break the deadlockon climate justice and to secure the rights of present and future generations.

# **Human Rights and the Climate Crisis**

The link between the climate crisis and human rights is now well established. Climate impacts have been shown to exacerbate pre-existing inequalities and human rights challenges such as poverty, well-being, wealth inequality, gender relations, and many others,1 and to affect vulnerable groups most acutely.2 Many people's current and future ability to enjoy their human rights to life, water and sanitation, food, education and self-determination will be greatly impacted by the impacts of climate mitigation and adaptation measures. Achim Steiner, Executive Director of UNDP, remarks "(...) While the United Nations and national governments acknowledge that climate change and the responses toit can impact on human rights3, there is less agreement on the corresponding obligations of governments and private actors to address this problem."4 An authoritative clarification of the 'depth of obligations' is needed. This demand for authoritative guidance from the Court on climate justice was initiated by students from the Pacific Islands, one of the regions most affected by the climate catastrophe. This leadership with overwhelming moral clarity has received the backing of 139 CSOs and Pacific States, and has inspired youth worldwide to join efforts and push for global cooperation to seek climate justice for current and future generations.

## **The Advisory Opinion**

By giving an Advisory Opinion, the Court can provide impetus for more ambitious action under the Paris Agreement, provide authoritative baselines for state action on mitigation and international cooperation and assistance, integrate areas of international law that are currently separate, namelyhuman rights and environmental law, provide impetus and guidance for domestic, regional and international adjudications, and cement consensus on the scientific evidence of climate change. With young people having contributed the least to historic CO2 emissions, but increasingly facing adverse climate impacts, it is not surprising that youth all over the world are seeking climate justice for current and future generations.

### Requesting the Advisory Opinion

The link between the climate crisis and human rights is now well established. Climate impacts have been shown to exacerbate pre-existing inequalities and human rights challenges such as poverty, well-being, wealth inequality, gender relations, and many others,1 and to affect vulnerable groups most acutely.2 Many people's current and future ability to enjoy their human rights to life, water and sanitation, food, education and self-determination will be greatly impacted by the impacts of climate mitigation and adaptation measures. Achim Steiner, Executive Director of UNDP, remarks "(...) While the United Nations and national governments acknowledge that climate change and the responses toit can impact on human rights3, there is less agreement on the corresponding obligations of governments and private actors to address this problem."4 An authoritative clarification of the 'depth of obligations' is needed. This demand for authoritative guidance from the Court on climate justice was initiated by students from the Pacific Islands, one of the regions most affected by the climate catastrophe. This leadership with overwhelming moral clarity has received the backing of 139 CSOs and Pacific States, and has inspired youth worldwide to join efforts and push for global cooperation to seek climate justice for current and future generations.

#### We, Youth of the World

We are working towards securing global state and non-state support for the ICJ Advisory Opinion. At the UN, we have received the support of the UN Special Rapporteur on human rights and the environment, David Boyd. Youth groups and individuals all around the world are uniting to bring attention to the positive impacts of an Advisory Opinion. We are spreading the word by story-telling in our communities, communicating with our governments, and peer-educating on the role of international law and the inherent connection between the climate crisis and human rights. For more stories please visit www.wy4cj.org.

#### Ways to Support

Become friend of the initiative, get your government on board, donate expertise, or donate money.

We, the World's Youth, are hopeful on this journey to the International Court of Justice to secure the human rights of present and future generations.

We hope to see you stand with us.

ational Court of Justice.
