System Selection

Fold Corner

- Cover the accessories on both sides, which makes it more integrated and more beautiful.
- This is an auxiliary option and needs to be purchased at an additional cost.

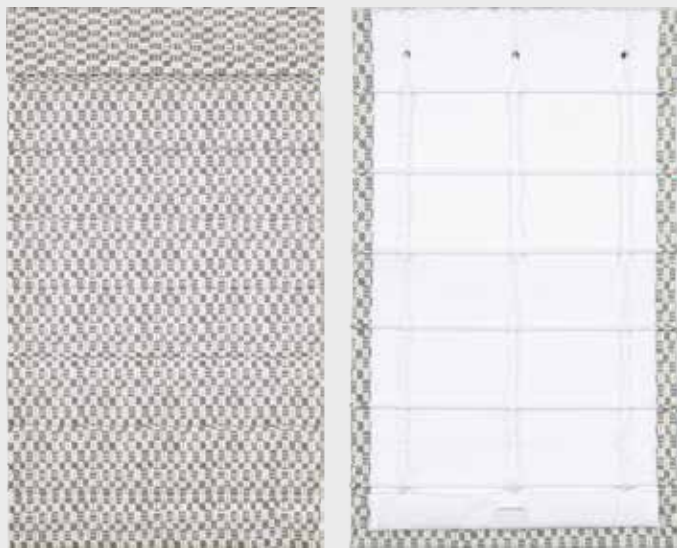

Pullless system

Remote control electric system

WEST | WINDOW TREATMENTS

Style Options

Flat Fold with Batten Back

The rod is sewn into the fabric on the back of the finished product and there will be a sewn pocket on the front.
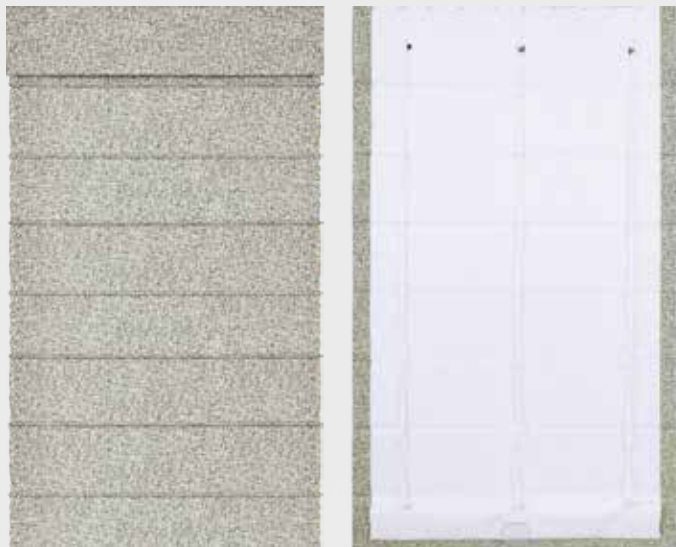

Style Options

Flat Fold

The lay-flat front is a single piece of fabric with no seams.
The padded seam helps the curtain provide additional support by hiding the rod. When light passes through, a rod shadow is displayed on the front of the finished product.

Flat Fold with Batten Front

The piping is sewn into the fabric on the front of the finished product and there will be a sewn pocket on the back.

Soft Fold

Each stacked section is made with extra fabric, which allows them to maintain the stacked look of the Roman shade even when fully lowered, with a 3" fold.

The stackable back has no additional support, only supported by ropes.
