PLUMS

**Black Diamond plum**  
California: May – Mid-June  
Skin: Black  
Flesh: Red  
The pleasantly tart peel of this refreshing variety contrasts against its sweet flesh making for a balanced eating experience. Sweet, but not too sweet, Black Diamond’s mellow flavor is a delight!

**Early Queen plum**  
California: Late-May – Mid-June  
Skin: Red/Purple  
Flesh: Cream  
One of the first plums to appear each season, Early Queen is juicy with a deliciously soft texture and just a touch of tartness. A tasty way to kick off the plum season!

**Black Splendor plum**  
California: Late-May – Early June  
Skin: Black  
Flesh: Red  
High in sugar and acid, this plum brings the flavor! Black Splendor sizes large, and boasts fantastic shelf stability. Don’t miss this striking red-fleshed plum!

**Black Spice plum**  
California: June  
Skin: Black  
Flesh: Yellow  
The dense flesh of this flavorful variety is slow to ripen, but when it does, it’s worth the wait! The combination of dark skin and light flesh is stunning and the converted sugars are divine.

**Red Haven plum**  
California: June  
Skin: Red  
Flesh: Yellow  
Red Haven is known to be one of the best eating early season plums. Generally sizing on the smaller side, Red Haven is great for packing into lunch boxes and snacking on the go!

**Showtime plum**  
California: June  
Skin: Red  
Flesh: Yellow  
Balanced and sweet with a satisfying light flavor, this plum’s skin lacks the tartness other varieties have. It’s Showtime!

**Westerner plum**  
California: June  
Skin: Red  
Flesh: Red  
One of the newer plum varieties, Westerner eats spectacularly well! With a balanced sugar to acid ratio and striking red skin and flesh, there’s a lot to love about this plum. Be sure to introduce Westerner to eaters!

Yummy Beaut sizes up large and stores well on the shelf, making this red-skinned plum a real keeper! It has earned its name as this tasty plum is a great eater.

The yellow-almost-orange flesh of this black-skinned plum is delicious eaten fresh out of hand and is also lovely in desserts.

So good it’ll make you blush. Extra flashy with its contrasting black skin and red flesh, don’t miss this plum!

This plum’s slightly dusky appearance is thanks to the extra bloom that the skin of Hiromi Red holds. This plum does soften as it ripens, but the flesh still remains fairly firm.

This well-known favorite variety boasts classic plum flavor, tasty red skin and succulent yellow flesh that deepens in color closer to the pit.

Sizing up larger and with higher sugar content than its close relative Black Amber, Owen T is a phenomenal piece of fruit.

Juicy and with a small pit, its sweet flesh contrasts with its tart flesh. Nicely round in shape, Black Friar sizes large.

Super juicy and tasty with a mellow flavor, Burgundy tends to run on the smaller side. However, this variety’s pit is notably smaller than that of other varieties, meaning there is plenty of delicious fruit for eating.

<tbody>
<tr>
<td><em>Catalina</em> plum</td>
<td>California: July</td>
<td>Attractive and tasty, Catalina is another variety that boasts “classic” plum traits. This plum’s window of availability is brief, so grab it when you see it! Skin: Purple Flesh: Yellow</td>
</tr>
<tr>
<td><em>Fortune</em> plum</td>
<td>California: July</td>
<td>When eaters think of quintessential plum flavor, Fortune is the variety that comes to mind. The combination of tart skin and sweet, juicy flesh creates the ideal eating experience. Skin: Red Flesh: Yellow</td>
</tr>
<tr>
<td><em>King Midas</em> plum</td>
<td>California: July</td>
<td>Here and gone before you know it, grab plenty of King Midas when available. Super sweet, low acid and with great sizing, this yellow-skinned plum is a rare and delicious addition to a stone fruit set. Skin: Yellow Flesh: Yellow</td>
</tr>
<tr>
<td><em>Mariposa</em> plum</td>
<td>California: July</td>
<td>Plum aficionados identify Mariposa as a frequently underrated piece of fruit. Often grown as a pollinator variety, when you see it available, don’t hesitate to give it a try! Large and sweet with slightly mottled skin, Mariposa looks great and eats well. Skin: Purple Flesh: Red</td>
</tr>
<tr>
<td><em>Verry Cherry</em> plum</td>
<td>California: July</td>
<td>This cherry and plum cross has a short window of availability. While their size is very small, these super sweet plums come packed with flavor and are available packaged in zip-top cello bags. Get Verry Cherry while you can! Skin: Red Flesh: Yellow</td>
</tr>
<tr>
<td><em>Yummy Giant</em> plum</td>
<td>California: July</td>
<td>A great out-of-hand eater, Yummy Giant came by its name naturally. Generally sized as 20 and 30 count, this substantial plum stands out in displays! Skin: Red Flesh: Yellow</td>
</tr>
<tr>
<td><em>Simka</em> plum</td>
<td>California: Late-July – August Northwest: September</td>
<td>A truly fantastic out-of-hand eater, Simka sizes well and remains firm when ripe. Great for eaters that like a plum with a slightly toothsome texture. Skin: Red Flesh: Yellow</td>
</tr>
<tr>
<td><em>Red Yummy</em> plum</td>
<td>California: August</td>
<td>The yellow flesh of this tasty plum sometimes showcases red veining that runs throughout. Stunning and delicious! Skin: Red Flesh: Yellow</td>

When Royal Diamond appears, it’s a sign that late season, high sugar varieties are on their way. Sweet and great for fresh eating, this variety is also ideal for jam making and desserts!

One of the last plums of the season, Angelino marks the wind-down deliciously! Known for being a great eater, its black/purple skin with yellow flesh is striking.

Calling all canners, bakers and jam-makers, this variety is well-loved for its culinary prowess. Full of flavor and delicious eaten fresh, its dense flesh holds up well to cooking. This plum is good for more than just a dried, chewy snack!

Low in acid and on the smaller side, this late season plum eats well! Fall Fiesta is often the last plum variety available each season, and its autumnal name helps you keep track!

Exceptionally bright in color, this gorgeous plum boasts great shelf-stability. The flesh of September Yummy remains firm when ripe and is delightfully sweet.

What this pluot lacks in size it makes up for in flavor. One of the best early-season eaters, Flavorosa starts pluots off with a bang!

Flavor Supreme is dramatic! Visible through its green skin is the tone of its red flesh. Flashy and intriguing, this pluot is also an excellent eater.

One of the older varieties of pluots, the shape of Sweet Treat is often described as “a little tippy.” Often displays red casting in the flesh, making for lovely visual appeal.

**Description:**
- Sometimes referred to as the “dinosaur egg” pluot, Dapple Dandy is visually intriguing. Crisp and sweet with a subtle tartness, this is a tasty pluot for the eyes and taste buds alike!
- Extremely sweet and with taught skin that clings tightly to its flesh, Dapple Jack is a delightful eating experience!
- Excellent enjoyed both soft or firm and used either fresh, or as a dessert fruit, oblong Flavor Grenade just might win best all-around pluot! Very high in sugar, this is a great eating variety!
- Certainly sweet but slightly more subdued in its sugariness than other members of the Flavor family, Flavor Rich is a great out-of-hand eater!
- Tastes like fruit punch with a truly tropical kick, super sweet Honey Punch is a treat!
- Recognizable by its slightly elongated shape, Crimson Royale is more reminiscent of a plum in flavor than appearance. Sweet and tangy, this pluot is tasty eaten out-of-hand or sliced in fruit salads.
- The name of this tasty, low-acid pluot is derived from its slightly tapered shape. Best enjoyed soft when its meaty flesh is most flavorful.
- Firm and flavorful, Festival Red is certainly delicious and refreshing!
| **Flavor Treat pluot**  
California: August | Described as meaty and with a crisp texture, Flavor Treat is a pluot you can really sink your teeth into. Ideal for slicing, Flavor Treat brightens cheese boards and bowls of fruit salads. |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin: Red/Purple  
Flesh: Yellow | 

| **Dapple Fire pluot**  
Northwest: Mid-August – Mid-September | Similar in appearance to Dapple Dandy, Dapple Fire features darker red, juicy flesh that boasts more apricot flavor. |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin: Red/Pink  
Flesh: Red | 

| **Emerald Beaut pluot**  
California: Mid-August – September | This pluot gets sweeter and sweeter as it ripens while maintaining its crisp, toothsome texture. |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Skin: Green  
Flesh: Yellow | 

| **Flavor Fall pluot**  
California: Late-August – Mid-September  
Northwest: Early October | For those eaters that can’t get enough of stone fruit, Flavor Fall can be thanked for extending the season a couple more weeks. Mild with a balanced sweet-tart flavor, this pluot wraps up the season deliciously! |
