

# Melón Magic

SLICE INTO SUMMER WITH OGC

## CANTALOUPE

Super sweet and deliriously aromatic, orange-fleshed organic cantaloupe is a forever-favorite. This quintessential melon tastes and smells like summer! To determine ripeness, gently press a thumb into the stem end of the melon. If it gives slightly, it's ready to enjoy.

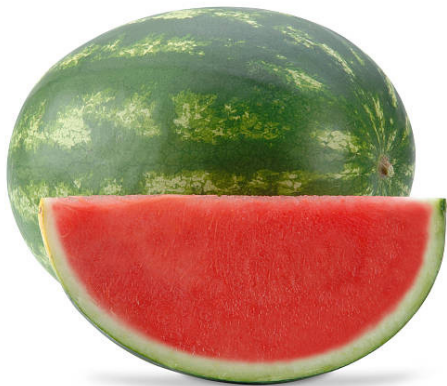

## **GREEN HONEYDEW**

Nothing beats the heat like sweet, chilled organic green honeydew! Pair with salty favorites like cured meat and cheeses for elevated eating. Give this melon a sniff. If its scent is sweet and aromatic, it's ripe and ready to eat.

## **SEEDED WATERMELON**

Looking for the nostalgia of black-studded watermelon? Juicy, vibrantly hued and packed with flavor, organic seeded watermelon delivers. Give this tasty melon a thump to test ripeness. If it produces a deep, hollow sound it's ready to enjoy.

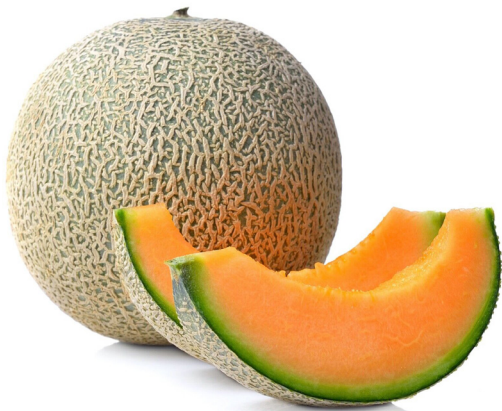

## **SEEDLESS WATERMELON**

Refreshingly sweet and satisfyingly juicy with none of the seeds! Gorgeous organic seedless red watermelon is the perfect warm weather treat. Give this tasty melon a thump to test ripeness. If it produces a deep, hollow sound it's ready to enjoy.

## **MINI SEEDLESS WATERMELON**

Easily packable and personal-sized, this variety is great for eaters on the go and watermelon fans that will happily eat a mini all to themselves. No seeds make organic red mini seedless watermelon practically perfect in every way! Give this tasty melon a thump to test ripeness. If it produces a deep, hollow sound it's ready to enjoy.

## **NW-GROWN CANTALOUPE**

Super sweet and deliriously aromatic, orange-fleshed organic cantaloupe is a forever-favorite. This quintessential melon tastes and smells like summer! To determine ripeness, gently press a thumb into the stem end of the melon. If it gives slightly, it's ready to enjoy.

## **NW-GROWN BLACK SEEDLESS WATERMELON**

Sweet, juicy and conveniently seedless! The contrast of dark skin and vibrant flesh makes this organic watermelon a stunning variety to enjoy. Thump on a watermelon to determine its ripeness. If it sounds deep and hollow, it's ready to enjoy.

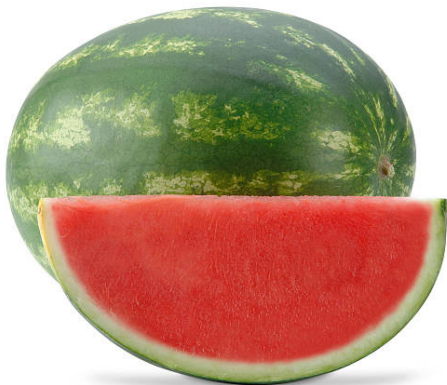

## **NW-GROWN GREEN HONEYDEW**

Nothing beats the heat like sweet, chilled organic green honeydew! Pair with salty favorites like cured meat and cheeses for elevated eating. Give this melon a sniff. If its scent is sweet and aromatic, it's ripe and ready to eat.

## **NW-GROWN SEEDED WATERMELON**

Looking for the nostalgia of black-studded watermelon? Juicy, vibrantly hued and packed with flavor, organic seeded watermelon delivers. Give this tasty melon a thump to test ripeness. If it produces a deep, hollow sound it's ready to enjoy.

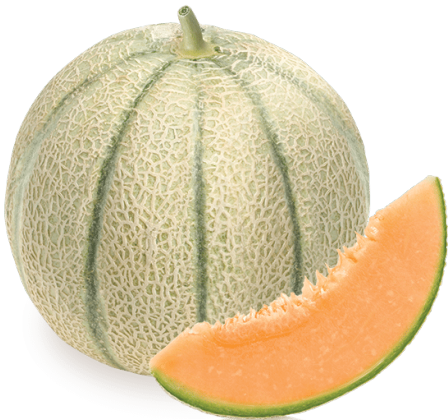

## **NW-GROWN SEEDLESS WATERMELON**

Refreshingly sweet and satisfyingly juicy with none of the seeds! Gorgeous organic seedless red watermelon is the perfect warm weather treat. Give this tasty melon a thump to test ripeness. If it produces a deep, hollow sound it's ready to enjoy.

## **NW-GROWN MINI SEEDLESS WATERMELON**

Easily packable and personal-sized, this variety is perfect for eaters on the go and watermelon fans that will happily eat a mini all to themselves. No seeds make organic red mini seedless watermelon practically perfect in every way! Give this tasty melon a thump to test ripeness. If it produces a deep, hollow sound it's ready to enjoy.

## **NW-GROWN CHARENTAIS**

This quintessential variety's deep orange flesh is rich in flavor with a heady aroma that is its true calling card. So, give organic Charentais melon a good inhale and enjoy its floral scent that's pleasantly musky and reminiscent of tropical fruit!

## **NW-GROWN PIEL DE SAPO**

Meaning “skin of the toad” in Spanish, and sometimes called “Christmas melon” for its long shelf-life, this melon’s flavor is described as a cross between honeydew and pear. Emitting very little aroma when ripe, this melon should feel heavy for its size and its skin will begin to turn more yellow than green as an indication it’s ready to be enjoyed.

## **NW-GROWN GALIA**

The pale green flesh of delicious organic Galia melon is described as tasting sweetly aromatic with notes of tropical fruit. Give this variety a good sniff - its sweet scent is a great indicator that it's ripe and ready!

## **NW-GROWN CANARY**

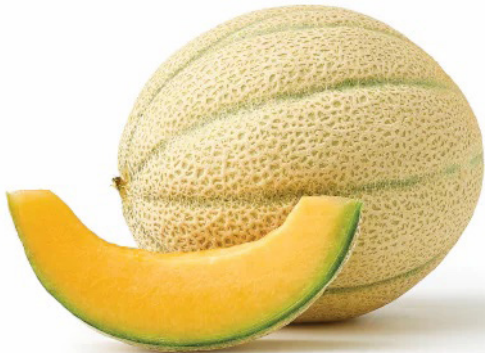

Fans of organic Canary melon crave the succulent texture of its pale green to cream-colored flesh and sweet flavor. Canary's skin begins to take on a waxy quality as it ripens, and its aroma is punctuated with hints of pineapple and banana.

## **NW-GROWN SNOW LEOPARD**

Sweet and juicy with firm white flesh, organic Snow Leopard leaps effortlessly from the grill into a fruit salad or sliced up for snacking. Snow Leopard shares a similar flavor profile with honeydew, but with crunchier flesh that makes this melon satisfying to munch. Give this melon a good sniff to determine ripeness. If it's scent is sweet and robust, it's ready to enjoy.

## **NW-GROWN TUSCAN**

Considered a gourmet cantaloupe variety by many, organic Tuscan melon shares similar but elevated traits with its common cousin. Deep external ridges lighten from deep green towards yellow as the sugar develops, an excellent signal of whether the orange flesh inside is sweet and firm or softer with a richer flavor.

## **NW-GROWN ORANGE HONEYDEW**

Everything you love about a firm-fleshed honeydew, plus a honey-sweet flavor that eaters of all ages will enjoy. Give this melon a sniff. If its scent is sweet and aromatic, it's ripe and ready to eat. Try organic orange honeydew for a delicious twist on a well-loved favorite!

## HAMI

Juicy and sweet, fans of cantaloupe will love organic Hami. Wait until this melon smells aromatic, feels heavy for its size and gives slightly when a thumb is pressed into the stem end to enjoy its firm, crisp flesh.

## **FULL MOON SEEDLESS**

Super sweet and fun to eat, the yellow flesh of this organic watermelon is sure to impress! To determine ripeness, give Full Moon a thump and listen for a deep, hollow sound.

## **DAYBREAK SEEDLESS**

The joy of cutting into the orange flesh of organic Daybreak is unsurpassed. A surprising color pop on the plate, this sweet and flavorful watermelon is unforgettable. To find out if it's ready to eat, give it a good thump and listen for a deep, hollow sound to indicate ripeness.

## **MIDNIGHT SEEDLESS**

With the deep color of its skin and vibrant hue of its flesh, organic Midnight turns the dial up on all the best qualities of a standard watermelon. Stunning to look at and delicious to enjoy, this watermelon requires only a good thump to confirm ripeness. If it emits a deep and hollow sound, it's time!

## **MINI MIDNIGHT SEEDLESS**

With the deep color of its skin and vibrant hue of its flesh, organic Mini Midnight turns the dial up on all the best qualities of a standard watermelon. Stunning to look at and delicious to enjoy, this watermelon requires only a good thump to determine ripeness. If it emits a deep and hollow sound, it's time!

## **NEON MOON SEEDLESS**

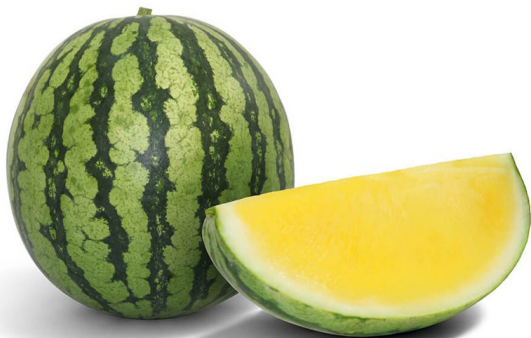

Its firm yellow flesh is stunning and makes organic Neon Moon ideal for slicing into salads or tossing on the grill. Packed with plenty of flavor and a striking skin and flesh contrast, this watermelon is memorable. To check for ripeness, give it a good thump. If it emits a deep, hollow sound is ready to be enjoyed.

## **SUNSHINE SEEDLESS**

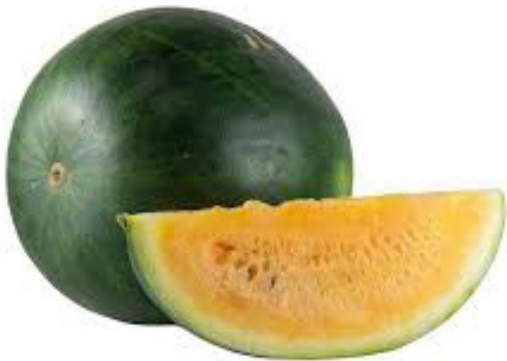

This stunning organic watermelon is the ideal choice for eating fresh and incorporating into summery recipes.

Blend organic Sunshine into slushy drinks, with or without spirits, as a refreshing seasonal sipper. To check for ripeness, simply give organic Sunshine a thump. If the resulting sound is deep and hollow, this ray of light is ripe and ready to enjoy!

## **NW-GROWN FULL MOON SEEDLESS**

Super sweet and fun to eat, the yellow flesh of this organic watermelon is sure to impress! To determine ripeness, give Full Moon a thump and listen for a deep, hollow sound.

## **NW-GROWN DAYBREAK SEEDLESS**

The joy of cutting into the orange flesh of organic Daybreak is unsurpassed. A surprising color pop on the plate, this sweet and flavorful watermelon is unforgettable. To determine if it's ready to eat, give it a good thump and listen for a deep, hollow sound to indicate ripeness.

## **NW-GROWN MIDNIGHT SEEDLESS**

With the deep color of its skin and vibrant hue of its flesh, organic Midnight turns the dial up on all the best qualities of a standard watermelon. Stunning to look at and delicious to enjoy, this watermelon requires only a good thump to determine ripeness. If it emits a deep and hollow sound, it's time!

## **NW-GROWN MINI MIDNIGHT SEEDLESS**

With the deep color of its skin and vibrant hue of its flesh, organic Mini Midnight turns the dial up on all the best qualities of a standard watermelon. Stunning to look at and delicious to enjoy, this watermelon requires only a good thump to determine ripeness. If it emits a deep and hollow sound, it's time!

## **NW-GROWN NEON MOON SEEDLESS**

Its firm yellow flesh is stunning and makes organic Neon Moon ideal for slicing into salads or tossing on the grill. Packed with plenty of flavor and a striking skin and flesh contrast, this watermelon is memorable. To check for ripeness, give it a good thump. If it emits a deep, hollow sound is ready to be enjoyed.

## **NW-GROWN SUNSHINE SEEDLESS**

This stunning organic watermelon is the ideal choice for eating fresh and incorporating into summery recipes.

Blend organic Sunshine into slushy drinks, with or without spirits, as a refreshing seasonal sipper. To check for ripeness, simply give organic Sunshine a thump. If the resulting sound is deep and hollow, this ray of light is ripe and ready to enjoy!

# *NW-Grown Dry Farm* **ORGANIC MELONS**

LATE JULY – EARLY SEPTEMBER

## **Why Dry Farm?**

Requiring significantly less water, this growing practice utilizes soil amendments to help plants thrive on groundwater. Great for conserving resources, it also concentrates flavor in the fruit. Dry farm melons are similar in appearance to traditionally grown melons yet may be smaller in size.

## **NW-GROWN DRY FARM CHARENTAIS**

This French heirloom melon is super rich in flavor with a pleasant muskiness. Charentais is smooth-fleshed and known for being exceptionally aromatic. A sniff at the blossom end of the fruit is the best indication of ripeness. If the smell is full, sweet and sultry, Charentais is ready to be eaten.

## **NW-GROWN DRY FARM CRENSHAW**

Known as one of the sweetest melons available, organic Crenshaw is described as having an almost peppery note. The dynamic flavor of this melon does not disappoint. Crenshaw will emit a sweet, sultry aroma when ripe and some folks report that you can also shake it to hear if some seeds rattle around as another telltale sign.

## **NW-GROWN DRY FARM PIEL DE SAPO**

Meaning “skin of the toad” in Spanish, and sometimes called “Christmas melon” for its long shelf-life, this melon’s flavor is described as a cross between honeydew and pear. Emitting very little aroma when ripe, this melon should feel heavy for its size and its skin will begin to turn more yellow than green as an indication it’s ready to be enjoyed.

## **NW-GROWN DRY FARM SHARLYN**

Sweet, fruity, creamy and luscious, this melon becomes intensely flavored as the sugars develop. When ripe, organic Sharlyn will emit a sweetly tropical smell with notes of pineapple from its blossom end.

## **NW-GROWN DRY FARM SUGAR CUBE**

Known for its exceptionally sweet taste, juicy flesh and perfumed aroma, organic Sugar Cube is a type of cantaloupe that packs a lot of flavor into its small size. Sniff the blossom end of the melon. If it's heady with a sweet scent, Sugar Cube is ready to be enjoyed.
