

Problem/Diagnosis Mapping

Since the March 28th code upgrade, the PowerChart system has been using the IMO terminology for problems and diagnosis code selection. All old codes (ICD-9) should have mapped to SNOMEDS for the problem list. The use of SNOMEDS is mandatory for Stage II Meaningful Use compliance. This is regardless of ICD-10 delays.

If a code did not map properly, it will display highlighted in yellow, as seen below. This needs to be corrected.

From either the Problems/Diagnosis tool, or the summary page (screen shots 1 and 2, respectively) you can change the code to the proper SNOMED selection.

From the Problem/Diagnosis page, double click on the highlight term you wish to correct, or “map”.

Problem Search

*Search: Starts with Within: Terminology

Terminology: Terminology Axis: <All terminology axes>

| Term | Code | Terminology | Terminology Axis |
|-------------------------|-------|-------------|------------------|
| Depression with anxiety | 75630 | IMO | |

Do not forget about the search "drop-down" box if you wish to search by "contains", "exact match", or "starts with".

Remembering this trick will make searching for codes anytime a lot less frustrating.

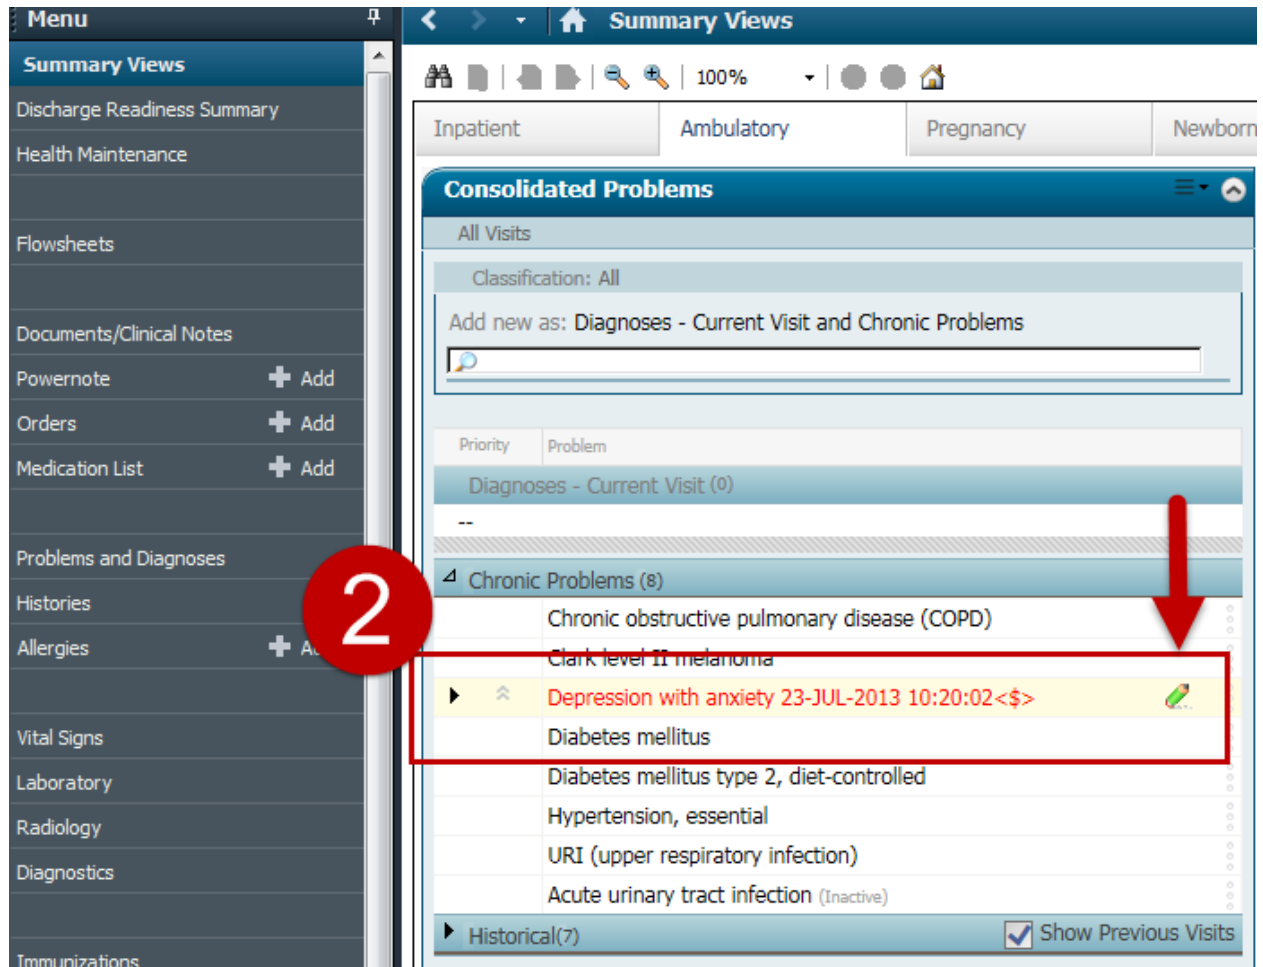

When all is finished, you will now have a correctly “mapped” SNOMED in place, and all will be right in the world.

If you choose to work off of the summary page for this effort, simply select the pencil icon  and it will take you to the same Problem Search page as the previously reviewed workflow.

The screenshot displays the 'Summary Views' interface. On the left is a 'Menu' with various options. The main area shows 'Consolidated Problems' for 'All Visits'. It lists 'Diagnoses - Current Visit (0)' and 'Chronic Problems (8)'. The 'Chronic Problems' list includes: 'Chronic obstructive pulmonary disease (COPD)', 'Clark level II melanoma', 'Depression with anxiety 23-JUL-2013 10:20:02<\$>' (highlighted with a red box and a red circle with the number '2'), 'Diabetes mellitus', 'Diabetes mellitus type 2, diet-controlled', 'Hypertension, essential', 'URI (upper respiratory infection)', and 'Acute urinary tract infection (Inactive)'. A red arrow points to the pencil icon next to the 'Depression with anxiety' entry. At the bottom, there is a 'Historical(7)' section and a 'Show Previous Visits' checkbox.

| Priority | Problem |
