

A Level Computer Science - Summer 2022 Task

The A Level Computer Science course consists of 2 exam papers (Component 1/Component 2) and a Programming Project (Component 3). As part of Component 1, Section 1.3.4 Web Technologies, you are required to have skills in using the programming language HTML.

Task:

- To create a four-page website on a topic of your choice, using the HTML programming language.

You must be confident using the basic tags required to structure a webpage and this project will help you become familiar with requirements for web development.

All completed webpages should be evidenced with a screenshot.
