RADIATION RESEARCH

Radiation Research publishes articles dealing with radiation effects and related subjects in the areas of physics, chemistry, biology, and medicine, including epidemiology and translational research. The term radiation is used in its broadest sense and includes specifically ionizing and ultraviolet, visible and infrared light as well as microwaves, ultrasound, and heat. Related subjects include (but are not limited to) studies with chemical agents contributing to the understanding of the effects of radiation, isotope techniques, and dosimetry methods and instrumentation.

Print ISSN: 0033-7587  eISSN: 1938-5404
Peer Reviewed: Yes  Subscription Term: Calendar Year
Frequency: Monthly
Back Issue Availability: Volumes 137–180 available from business office.
Back Issue Price: Contact business office.
Subject(s): Biology, Biophysics, Chemistry, Health Science/Medicine, Physics, Radiation, Radiology-Nuclear Medicine & Medical Imaging

Abstracted and/or Indexed in: Biochemistry and Biophysics Citation Index, Biological Abstracts/BIOSIS, Chemical Abstracts Service (CAS), Current Awareness in Biological Sciences (CABS), Current Contents Life Sciences, EMBASE/Excerpta Medica, Energy Research Abstracts, Environmental Periodicals Bibliography, Index Medicus/MEDLINE (including Spaceline), Science Citation Index, SciSearch, INSPEC® (1988–), International Aerospace Abstracts, Reference Update, ISI Alerting Services
