

Case Study

Arvind Limited is a textile and apparel manufacturing company based in India, specializing in denim, woven fabrics, and garments. Its operations span textiles, advanced materials, retail, and engineering solutions.

SINCE ADOPTING SLCP :

Arvind has saved approximately **150 audits**

\$150,000 USD

300 - 400 man days

60% of Arvind's customers (22 brands) have replaced traditional audits with SLCP.

HOW HAS SLCP SUPPORTED ARVIND TO MAKE WORKPLACE IMPROVEMENTS?

- ✓ By eliminating redundant audits, Arvind **saved significant time and resources**.
- ✓ Resources have been **redirected into high-impact areas** like **worker well-being and engagement**. They have conducted a comprehensive worker survey covering multiple aspects, including **satisfaction with working conditions** such as hygiene, health, and safety. These insights have enabled the organization to make **targeted improvements based on workers' needs**.
- ✓ The Arvind team is able to allocate time to conduct such in-depth surveys thanks to the **resources saved by eliminating the need for multiple audits**, due to the adoption of SLCP.

Case Study

WHAT ARE THE BENEFITS OF BEING AN SLCP SIGNATORY FOR ARVIND?

Being a signatory has provided Arvind with a valuable opportunity to contribute to the way SLCP has been built and shape it into a tool that suits Arvind's needs. It has also allowed Arvind to:

Shape SLCP's priorities by providing in-depth feedback on key topics like the Converged Assessment Framework (CAF) and Data Quality and Integrity (DQI) program through the Signatory Survey.

Actively contribute to SLCP's development by participating in key decision-making processes and shaping strategic priorities.

Serve as an elected Board member, representing the signatory community in high-level governance and steering SLCP's direction.

As a large manufacturer (potentially in the top 10 globally) and working with 45 different brands across the world, the number of audits has always been a big challenge. SLCP is a solution for this, and contributing to the way SLCP was built has been valuable to shape it into a tool that suits Arvind's needs.
