The modular Gastro System  
for indoor and outdoor use

Gastro stands for enjoyment, taking time out and communication. For invigoration in everyday life and celebration in the evening hours.

Modularity and flexibility lay the foundation for the new Gastro System as the core competences of IKONO furniture. The very fact that both the interior and exterior of a restaurant can be designed uniformly opens up a host of new possibilities. The lotus blossom effect on all fabric surfaces means that any red wine faux pas, no matter how severe, is a thing of the past, ensuring relaxed working conditions.

The Gastro System allows you to constantly reinvent your floor space. Permanent fixtures on the walls no longer play a role and the otherwise time-consuming process of dismantling can be accomplished in just a few simple steps.

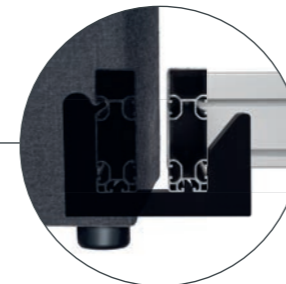

Flexible conversions can be made without tools thanks to the reliable plug-in system.

## Innovation at all levels.

The foundation for all modules lies in a specially developed and patented aluminium frame. Whereas other materials can easily be deformed as the climate changes and cannot offer a guaranteed standard of quality, an aluminium frame boasts absolute resistance to moisture. What's more, it is many times lighter than its wooden predecessor. Connecting two modules is done by means of a bracket which is hooked onto both sides of the respective frame.

In the case of seating modules, a slatted structure is attached to the frame, enabling dynamic cushioning thanks to synthetic fibreglass rods. Several layers of foam with varying degrees of hardness reinforce the comfort. An inner waterproof cover prevents waterlogging under the cover fabric.

The innovation of our outdoor fabrics lies in their feel and finish. The so-called „lotus blossom effect“ means that any kind of liquid will run off. The fabrics used are therefore treated to be not only easy to clean when handling food and drinks, but also weatherproof in heavy rain and snowfall.

We offer fabrics and artificial leather that have been tested for fire protection for indoor areas.

## Solution of the Year award in the furniture design category.

„The Most Beautiful Restaurants & Bars 2021“ is a competition and book by Callwey Verlag, published in cooperation with the bdiä bund deutscher innenarchitekten, the Deutscher Hotel- und Gaststättenverband e. V. (DEHOGA Bundesverband), INTERNORGA, the leading trade fair for gastronomy, as well as the media partners AHGZ, Allgemeine Hotel- und Gastronomie-Zeitung, SALON and the architecture magazine Baumeister.

*The success of a restaurant or bar not only hinges on the high quality of the product and service, but also on an inviting atmosphere and on conveying a genuine sense of well-being. The overall impression must be right. The interior is the first aspect that guests encounter when they enter an establishment. It's about the light, the colours, shapes and materials. This is where a pioneering composition, coordinated design elements, unique ideas, surprising accents, high-quality fabrics as well as precision and attention to detail are crucial. Much the same as with what is offered on the menu, a clear profile and a consistent positioning on the market are also important when it comes to interiors.*
