

## My feelings are like colors with changing hues and tones

I can use these faces to tell about the colors of my feelings.

I can make my own face pictures.

My happy smile may be a light blue, a bright yellow, or another color I like. When I have different feelings, the colors may be darker, lighter or even a mix of colors.

**color hues:** red, orange, yellow, green, blue, purple, pink

**color tones:** intensity of color from light to dark

**feelings:** happy, hopeful, scared, worried, sad, excited, angry, proud, disappointed, confused, sleepy, shy, embarrassed, jealous, surprised, afraid, bored, hot, cold, sick, joyful
