P800 - P2000
Blending, Finishing

TOLE CUT
K800 - K3000
Imperfection
Removal

The Tri-Pro series is the universal disc line for your complete preparation process up to primer finish. To prevent clogging and optimize its durability, Tri-Pro has been treated with an anti-clogging coating.

For the next step we recommend using the Yellow Film series (P800-P2000) to prepare old paint layers for blending, if necessary.
