LEL: N/A

UEL: N/A

Not applicable

Foam, Carbon dioxide (CO2) or dry chemical. Dry sand.

May denigrate ammonia gas. May generate toxic nitrogen oxide gases. Use of water may result in the formation of very toxic aqueous solutions. Do not allow run off from fire fighting to enter drains or water courses. Incomplete combustion may form carbon monoxide. No special precautions required. Burning produces noxious and toxic fumes.

Not available

Use personal protective equipment. Wear self contained breathing apparatus for fire fighting.

Firefighters, and others exposed, wear self-contained breathing apparatus.

SECTION 6. ACCIDENTAL RELEASE MEASURES

Stop leak. Dike or contain spill. Pump into slavage tanks and/or absorb with suitable material. If possible slow flow of material. Prepare a decontamination solution of .2-5% liquid detergent and 3-8% concentrated ammonium hydroxide in water. Treat spill area with decontamination solution, using about 10 parts of the solution for each part of the spill and allow it to react for at least 10 minutes for trace amounts and 48 hours for large spills. Neutralize the waste. Carbon dioxide will evolve, leaving insoluble polyreas.

Use appropriate containment and clean up immediately.

Stop leak, Dike and contain spill. Prevent spilled material from entering the ground, water and/or air by using appropriate containment methods

SECTION 7. HANDLING and STORAGE

Avoid breathing vapor. Avoid contact with eyes, skin and clothing. Keep away from heat and flame. Keep container closed. Use with adequate ventilation. Wash thoroughly after handling.

Avoid exposure to heat, light, and air for prolonged periods of time. Do not store near acids. Keep containers tightly closed in a dry, cool and well ventilated area.
