Cyber Safe Fundraising

We take child safety SERIOUSLY. Cyber Security Experts recommend that parents DO NOT upload images of their children online and that's exactly what we've followed. Kids have extra fun selecting from a range of awesome avatars. They then customise them to project their personalities online!

IN ADDITION TO THAT:

- No last names are displayed online

- There is no search function and URL's are completely private & non-guessable. The only way to view a student's profile page, is to have the link shared directly.

- Following every **SCHOOL FUN RUN** the Student Profile Pages are disabled, which removes all information from the internet.

- Private messages cannot be sent to student profiles. Donors can leave a message of encouragement, however it is all displayed publicly, removing any anonymity.

SCHOOL FUN RUN.

We're partnered with a world-leading provider of online fundraising; JustGiving. It means people from all over the world can now support your school. It's great to know that JustGiving is Tier 1 PCI compliant, which means the storage of donor and user information is the highest standard in the world.
