The Bluegrass Institute is Kentucky's free-market think tank, dedicated to the principles of free markets, individual liberty and limited, transparent government. Founded in 2003, the institute is a 501(c)3 nonprofit educational organization.

Warranty of Scholarship Excellence

The Bluegrass Institute commits itself to delivering commentary and research on Kentucky issues with unquestionable quality and reliability. Thus, we guarantee that the information we originate is true and accurate, and the sources from which we quote are accurately represented. We invite you to investigate our work and encourage you to report any material error, inaccuracy or misrepresentation you find. If you do, we will respond to your inquiry in writing. If we have made a mistake, we will prepare an errata sheet and attach it to all future distributions and include it in the posted online version of the particular publication, which will be the complete and final resolution under this warranty.

K-12 in Kentucky: A summary of facts and trends

John Garen, Ph.D.

Board of Scholars, Bluegrass Institute for Public Policy Solutions and
BB&T Professor Emeritus of Economics, University of Kentucky

January 2024

Overview

This policy point summarizes a host of notable facts and trends in Kentucky K-12 over the past decades, up to the most currently available data. Generally speaking, overall funding has risen dramatically and nearly continuously since 1990, but educational test scores have changed very modestly. Moreover, the gap between Black and White student test scores is large and has risen. Also, teacher salaries have no longer kept up with inflation, but hiring of non-teaching staff in schools has grown dramatically. Additionally, as of 2022, at least half of Kentucky students are not proficient in grades 4 and 8 reading and math.

More specifically:

- Total K-12 per pupil funding, after adjustment for inflation rose, from \$7,793 in 1990 to \$17,337 in 2022 – a 122% increase. The increase from 2013 to 2022 was 24%.
- Changes from the 1990s to 2022 in statewide average scores for grades 4 and 8 math and reading national (NAEP) tests ranged from a decline of 1.6% to an increase of 8.8%. All four of these test scores declined from 2013 to 2022.
- The gap between the average White student and average Black student scores was wider in 2022 than in 1990 for each of these four NAEP tests.
- According to Kentucky’s testing in 2022 (the KSA), over half of students are not proficient on grades 4 and 8 reading and math tests. The 2022 national NAEP test indicates that over two-thirds are not proficient.
- For Black students, the 2022 KSA shows that over three-fourths are not proficient on any of these tests. The 2022 NAEP indicates over 85% are not proficient.
- From 1990 to 2020, the number of non-teacher staff grew by 55%, while the number of students in Kentucky grew by 5% and the number of teachers rose by 21%.
- Average teacher salaries, after inflation adjustment, rose in the 1990s and 2000s, but have fallen since then. Comparing 2022 to 1990, teacher salaries were 1.08 times higher while per-pupil funding was 2.22 times higher.
- Inflation-adjusted federal, state, and local funding per pupil all rose from 1990 to 2009, experienced a decline after the Great Recession, then resumed rising. State per-pupil funding has not kept pace with inflation, however.
- Within state funds, on an inflation-adjusted, per-pupil basis, contributions for pension and health benefits (“on behalf” of school districts) have risen sharply, while SEEK funds and “other” funds have declined.

Overall K-12 Funding

Figure 1 shows the total of federal, state, and local K-12 funding per pupil in Kentucky, adjusted for inflation using the Personal Consumption Expenditures (PCE) Price Index.¹ It rose from \$7,793 in 1990 to \$17,337 in 2022, i.e., 2.22 times more (after inflation) in 2022 than in 1990, equivalent to a 122% rise.² Nearly every year showed an increase except for the years following the Great Recession.

For selected sub-periods:

1990-2000: 54.4% increase	2000-2010: 24.7% increase
2010-2014: 8.7% decrease	2014-2022: 26.5% increase

Figure 1

Total Funds per pupil, adjusted to 2022 dollars, 1990-2022
(total of federal, state, and local)

NAEP Test Score Performance

Table 1 shows the percentage changes in national (NAEP) test scores for Kentucky for grades 4 and 8 reading and math. Test scores showed modest increases up to 2013, but have all declined since then. Overall changes are small.

Table 1

NAEP Test	Percentage Changes in NAEP Test Score over Selected Time Periods		
	Test inception to 2013	2013 to 2022	Overall: test inception to 2022
Grade 4 reading	5.6%	-3.5%	2.3%
Grade 4 math	12.3%	-3.1%	8.8%
Grade 8 reading	2.8%	-4.3%	-1.6%
Grade 8 math	9.2%	-4.1%	4.6%

² Funding data are from federal sources through 2021. See <https://nces.ed.gov/programs/digest/> and <https://nces.ed.gov/ccd/files.asp#Fiscal:1,LevelId:2,SchoolYearId:37,Page:1>. Data for 2022 (the latest available year) are from <https://www.education.ky.gov/districts/FinRept/Pages/Fund%20Balances,%20Revenues%20and%20Expenditures,%20Chart%20of%20Accounts,%20Indirect%20Cost%20Rates%20and%20Key%20Financial%20Indicators.aspx>

³ All NAEP data are from <https://www.nationsreportcard.gov/ndecore/xplore/NDE>.

Comparing Funding Changes to Test Score Changes

Figure 2 presents a comparison of changes in funding to changes in test scores. Each data series (i.e., funding and test scores) is indexed to 1.00 at its starting point and subsequent values indicate the percent increase since the data began.

Funding per pupil (inflation adjusted) is 2.22 times as high as in 1990. The test scores range from 0.984 to 1.088 times as high as their beginning years.

Black – White Test Score Gaps

Figure 3 shows the gaps between the average score for White students and the average score for Black students for grade 4 and 8 reading and math tests for selected years. The gaps generally have risen over time and were substantially higher in 2022 than in 1990.

Teachers and Staffing

Figure 4(a) shows the numbers of pupils, teachers, and non-teacher “other staff” relative to 1990.⁴ The number of non-teaching staff was 1.55 times higher in 2022 than in 1990; the number of teachers was 1.21 times higher; the number pupils was 1.05 times higher.

Figure 4(b) shows pupils per teacher and pupils per other staff. The pupil-teacher ratio fell, rose, and fell again. In 2022, it was 13.8 compared to 15.9 in 1990. The other staff-pupil ratio fell from 1990 to 2003 and generally stabilized since then. In 2022, it was 10.8 compared to 16.0 in 1990.

Teacher Salaries

Figure 5(a) shows inflation-adjusted average teacher salaries.⁵ They rose through the 1990s and early 2000s and have fallen since then. Figure 5(b) shows inflation-adjusted total funds per pupil and teacher salaries. Teacher salaries in 2022, were 1.08 times as high as in 1990 while funds per pupil were 2.22 times higher.

⁴ Staffing data are from the Digest of Education Statistics, <https://nces.ed.gov/programs/digest/index.asp>.

⁵ Salary data are from <https://www.education.ky.gov/districts/FinRept/Pages/School%20District%20Personnel%20Information.aspx>

Composition of Funding

Figure 6 shows local, state, and federal funding per pupil (inflation adjusted) separately. Local funds per pupil have increased nearly every year, except following the Great Recession. State funds rose from 1990 to 2009, fell somewhat during the Great Recession, rose again, then fell for the past few years. State funding per pupil in 2022 was just above its 2017 level, though total funding has risen every year since 2014. Federal funds have risen, then fell after 2011 and have risen again recently.⁶

Figure 6

Components of State Funding

Figure 7 shows the components of state funding per pupil, inflation adjusted (only available from 2001 or later). From 2001, SEEK funds rose somewhat, but have fallen for the past several years. The “On Behalf” funding (mostly for school employees’ pension and health benefits) has risen sharply since 2004 (the first year in the data). Other state funding has slowly drifted downward since 2001.⁷

Figure 7

⁶ Data sources are as listed in footnote 2.

⁷ These data are from the state source listed in footnote 2.

Other Current Data

Table 2 shows the 2021-2022 school year per pupil funding, by source.

Table 2

2021-22 Per Pupil Funding	
Local	\$5,782
State	\$8,048
Federal	\$3.507
Total	\$17,337

Table 3 presents the percentages of students below proficient in grades 4 and 8 reading and math according to Kentucky’s test in 2022 (KSA) and the national test in 2022 (NAEP).⁸ According to the KSA, over half of Kentucky students are not proficient for any of these tests. The NAEP shows over two-thirds are not proficient.

For Black students, KSA indicates three-fourths or more are not proficient. NAEP indicates over 85% are not proficient.

Table 3

2022 Percentages of Below Proficient Students, Ky. and NAEP Tests		
	<u>% below proficient, Ky. KSA Test, 2022</u>	<u>% below proficient, NAEP test, 2022</u>
<u>All Students</u>		
Grade 4 reading	54%	69%
Grade 4 math	60%	67%
Grade 8 reading	56%	71%
Grade 8 math	63%	78%
<u>Black Students</u>		
Grade 4 reading	76%	85%
Grade 4 math	84%	91%
Grade 8 reading	78%	88%
Grade 8 math	86%	91%

⁸ KSA data are from <https://www.kyschoolreportcard.com/organization/20?year=2022>. The NAEP data source is in footnote 3.
