Love is

inspired by the book by Diane Adams

Written by Emily Arrow

Love is if you raise a little chick a little bird that didn't know how to fly

Love is if you try to care for it even if it kept you up half the night

early mornings speak to nose and side by side

That's what love is

Love is if you watch it grow and grow until it's ready for a much bigger pond

you know the time is right to lift its wings and travel on

And love is
Love is

_love is missing, reminiscing, you make a wish__ That's what

love is________________________ That's what

love is________________________

Love is all around Love is lost and found__

Love is letting go____

Love is feathers and friendship Love is knowing in an instant

Love it grows and grows____ Love is if
Love is

you raise a little chick a little bird that didn't know how to fly

And love is understanding that seasons each have their goodbyes

That's what love is

That's what love is and then it flies
