

Solaria® PowerXT® Panels, Deployed by Cazeault Solar, to be Featured on PBS's 'This Old House', during January 13th, 2022 Episode

Industry's Most Aesthetic Solar Panel Deployed on Addition to Massachusetts Country Cape

FREMONT, CA, JAN. 11, 2022 – Solaria® PowerXT® 400W panels, deployed by Cazeault Solar Home of Gloucester, Massachusetts, will be featured in the upcoming January 13th “Sunshine Power” episode of PBS’ revered broadcast *‘This Old House’*. Working with Cazeault, the *‘This Old House’* team incorporated Solaria’s beautiful, high-powered solar panels to outfit an addition to a Concord Country Cape house with state-of-the-art clean energy technologies. The 8kW Solaria PowerXT system, comprised of 20 panels, will generate 10,088 kWh of clean electricity annually. This solar array, paired with battery energy storage and EV charging stations, has transformed this classic 19th Century classic Cape into a green energy beacon for the 22nd Century.

“The owners of this dwelling wanted solar; however, they preferred that the panels not detract from the home’s curb appeal,” said Cazeault’s co-owner Tim Sanborn. “I selected Solaria PowerXT panels because they’re high efficiency, all black and very attractive. Integrated with battery backup, this home is now equipped with state-of-the-art energy features that will save the owners money on their utility bills.”

“Savvy homeowners select Solaria solar panels because they’re visually appealing and provide excellent performance. Solaria is proud to provide our customers with the most powerful and reliable solar panels on the market,” said Tony Alvarez, CEO of Solaria.

This Old House airs Thursdays at 8pm ET on PBS.
