

The Clean Fifteen - 2024

EWG's 2024 Shopper's Guide to Pesticides in Produce™

Nearly 75 percent of non-organic fresh produce sold in the U.S. contains residues of potentially harmful pesticides, EWG's 2024 Shopper's Guide to Pesticides in Produce™ finds.

This year, EWG determined that 75 percent of all conventional fresh produce sampled had residues of potentially harmful pesticides.

The Clean Fifteen™ shows which fruits and vegetables tested have very low or no traces of pesticides.

EWG's 2024 Shopper's Guide to Pesticides in Produce analyzes data from tests conducted by the Department of Agriculture and Food and Drug Administration on 47,510 samples of 46 fruits and vegetables.
