Apples: An Origin Story

Apples may seem basic, but that’s where you’re wrong. This superstar fruit is more exotic than it appears!

Where in the world are apples grown?

Wherever apples are grown, tools like pesticides are needed to fight disease, fungus and pests.

Did you know...

- It takes about 36 apples to create one gallon of apple cider.
- It takes the energy from 50 leaves to produce one apple.
- Archeologists found evidence that humans have been enjoying apples since 6500 BC.
- Twenty-five percent of an apple’s volume is air; that’s why they float.
