

Cyber Acoustics CA-2014USB 2.0 Speakers are Simple, Sleek, and Get Surprisingly Loud

Now available, these desktop speakers are the perfect audio upgrade for any laptop or desktop computer, virtual learning, point-of-sale systems, and more

Vancouver, Wash., Oct. 1, 2022 – [Cyber Acoustics](#), a leading manufacturer of reliable and affordable computer peripherals used in schools, businesses, and homes, today announced the [CA-2014USB 2.0 speakers](#) are now available with an MSRP of \$17.99. Whether upgrading built-in laptop speakers, looking for a space-saving option to improve desktop PC/Mac audio, in need of [speakers for virtual school](#), or to [augment a retail point-of-sale system](#), the CA-2104USB 2.0 speakers are a low-cost option with big value.

Designed as a follow up to the popular [CA-2014 AC-powered speakers](#), the CA-2014USB are USB-powered and offer modern connectivity via USB-C or USB-A with the included USB-C to USB-A adapter.

“What makes the CA-2014USB stand apart is how versatile it is, and how easily it fits into many different use cases,” said Steve Erickson, COO at Cyber Acoustics. “While the functions and setup are minimal, the speakers sound great and get surprisingly loud, giving them high price-performance value. After designing speaker systems for over 25 years, we have learned that sometimes simple is best.”

Simple and effective

The CA-2014USB 2.0 speakers provide a great experience for music, movies, or calls, while taking minimal desktop space, and setup is as easy as connecting a single USB cable to any PC, Mac, or Chromebook.

The clean, sleek design features cloth grill covers and magnetically shielded satellite speakers, with volume and mute controls conveniently located on the front. Also on the front are a headphone output jack and LED power indicator.

The CA-2014USB 2.0 Speakers have an MSRP of \$17.99 and are [available now on Amazon](#) and through most IT channel and reseller partners.
