- Wide 74.57° diagonal field of view
- Compatible with Mac, PC, Chromebook
- No app or software needed
- Single plug-and-play USB-A connection

The Webcam Flex is a versatile webcam for modern meeting challenges. With three camera positions, the Webcam Flex enables more collaborative and connected virtual meetings through improved eye contact in Center View, and easy object or document sharing in full 1080p HD with Table View.

The Webcam Flex delivers remarkably crisp, clear, and detailed images in vibrant colors. The HD auto focus and low light correction adjust to current room conditions to provide a consistently high-definition image. The wide field of view easily accommodates a second person, or perfectly frame your face or remove background distractions with five levels of manual zoom. Dual integrated omnidirectional microphones capture the natural sound of your voice.

The Webcam Flex has an easy to operate Table View mode so business professionals, educators, and hobbyists can share and demonstrate their work. The manual framing controls allow you to adjust the webcam view no matter the UC platform.

The Webcam Flex is perfect for business professionals, financial services professionals with multi-monitor setups, teachers and educators, and vloggers, streamers, and influencers who use video to connect with their audiences. This USB-A plug-and-play camera requires no setup or software installation, works with the UC platform of your choice, and ensures you make a strong impression during all virtual communications.
