DRIVER FRONTAL AIRBAG	YES	SIDE HEAD AIRBAGS	NO	ISOFIX ANCHORAGES	NO
FRONT PASSENGER FRONTAL AIRBAG	YES	DRIVER KNEE AIRBAG	NO	ABS (4 CHANNEL)	NO

ADULT OCCUPANT

The protection offered to the driver and passenger's head and neck was good thanks to the airbag. Driver's chest had weak protection and passenger's marginal protection. The car does not have seatbelt pretensioners. The front passengers' knees could impact with dangerous structures in the dashboard like the Tran fascia tube. The bodyshell was rated as unstable and it was not capable of withstanding any further loadings.

CHILD OCCUPANT

The child seat for the 3 year old child was unable to prevent excessive forward movement during the impact. The recommended CRSs did not show incompatibility. The installation instructions on both child seats were insufficient and not permanently attached to the seat. The vehicle was equipped with a passenger airbag but it could not be disabled in order to prevent high risks of injuries when installing a rearward facing CRS.
